Canada.

[Handwritten initials]

Dear Sirs:

Your letter 30054 at hand and contents carefully noted, in reply would say that you have relieved my mind of a great amount of worry withal regards to wood for Indians on the Cambridge Reserve, by assuring me that there is plenty of wood for this winter's use on the reserve.

Now I am a practical man and should know a little something about such things and I would say that if the department can find wood on the Cambridge Reserve for the coming winter, they possess supernatural powers, for there are not fifty cords of wood on the reserve and what is there is yellow pine.

I know for the amount paid by you for that lot of land there should be enough wood for several years, but there is not.

Yours truly.
