

FIG. 154.

FIG. 155.

FIG. 156.

Fig. 154 represents one of several "bangles" found with the crosses on Beausoleil Island. They appear to be made of silver, or else of some other soft white metal. Figs. 155 and 156 are of thin silver, and were, no doubt, simply used as brooches.

FIG. 157.

Fig. 157 was found near Mindemoya (Old Woman) Lake, Manitoulin Island, by the late Mr. John McPherson of this city, and by him presented to the museum. It is extremely thin. A slender pin is still connected with it.

FIG. 158. (Full Size).

From Mr. John McPherson we also received the odd combination here figured. It consists of a cylindrical copper bead and a flat, triangular one, both made from European sheet metal. Between these are strung four small glass beads, two white and two blue, in an alternate arrangement. These were found on Manitoulin Island.
