QUESTIONS AND ANSWERS.

Miscellaneous.

SICK SERVANT.

Have man hired by the year. He has been off work with la grippe about a month. Am I liable for his time on the sick-list, and, if so, for how long?

A SUBSCRIBER.

Ans.—We think so, and for the entire period of such illness.

GOVERNMENT AID IN REFORESTATION.

Would like information as regards reforestation. Is it possible for me, a farmer, to secure trees such as pine and spruce, from the Government? If so, under what conditions?

A. H.

Ans.—The Forestry Department, Ontario Agricultural College, Guelph, has the following varieties of evergreen trees for distribution in 1911: White pine, Scotch pine, White cedar. Applications for material must be in on or before the 31st of March, and will be filled in order of arrival. Late applications may have to be held over till next season if the material is exhausted. The Department prefers that plantations be made on such waste portions of the farm as steep hillsides, light sandy, rocky, or gravelly spots, swamp land, portions of farm cut off by streams or otherwise. The Department reserves the right to accept or refuse applications, if, in the opinion of the officers in charge, the location offered does not afford satisfactory facilities for the experimental and educational features of the work. Two acres will be the largest area for which the Department will undertake to furnish planting material for any one year. Trees are sent by express to nearest station, the receiver paying express charges. The owner, on his part, must prepare the soil, plant and care for the trees, and do all the actual work in connection with the plantations, in accordance with the directions of the officers of the Department, one of whom directs as to preparation of soil, varieties to plant, manner of planting, and after care. The owner shall also agree to provide protection for the planted trees against animals by fencing or otherwise, and, where necessary, against fire, by some effective means. Anyone interested in reforestation, and it is hoped that many are, would do well to send to E. J. Zavitz, B.A., Forester, Guelph, Ont., for literature on the subject, which will be furnished promptly and free.

Ans.—We think so, and for the entire period of such illness.

How "Eastlake" Steel Shingles will save you money

Talk No. 3

Economy In Laying

By

The Philosopher of Metal Town

It's a one-man job laying "Eastlake" Shingles—that means a big reduction in first cost.

Most roofs can only be laid properly by practical roofers.

The laying of all roofings calls for the time and labor of two or three men—Excepting "Eastlake" Metallic Shingles.

The "Eastlake" is easy to lay—takes just one quarter the time and labor of the four-lock shingles.

There is only one side-lock and gutter, which prevents all leaking and allows for ample expansion and contraction.

Then the "Eastlake" counter-sunk cleat, a special patented feature, holds the bottom of the shingles solidly in place, allows for no sifting in of rain or snow.

"Eastlake" Steel Shingles are absolutely weathertight.

Roofs covered with "Eastlakes" 25 years ago are in perfect condition today. That is the only sure test of quality.

Read about these roofs—some may be in your neighborhood. Send for our illustrated booklet, "Eastlake Metallic Shingles." Write to-day.

N.B.—An "Eastlake" roof means clean rain water for household use.

We also manufacture Corrugated Iron, House and Barn Siding, Metallic Ceilings, Eavetrough, Conductor Pipe, Ventilators, etc.

The Metallic Roofing Co.

LIMITED

Toronto - Winnipeg A62

"EASTLAKE" STEEL SHINGLES

AGENTS WANTED IN SOME SECTIONS.
