for all Farm Products. Special Rooms with proper temperatures for meats and butter, also room fitted with Cold Blast System for Egg Storage.

The Merchants Cold Storage Co. Ltd. CALGARY ALBERTA**SEASONABLE REMINDERS**

Many of the Western farms are very bare and unattractive. The country in many places is quite devoid of trees. The homestead is a forlorn looking place, even in the summer time, when a few flowers around the house would do so much to make the place more homelike. Just now preparation can be made to change matters a little next summer. By planting a few hardy bulbs in a flower-bed or around the house, flowers may be looked forward to in the early summer. By planting even now a fairly good root growth may be obtained before the final freezeup.

Make allowance for a few flower-beds around the house right now. Dig up the sod and fill in with some good rich earth from the nearby field. Mix some well-rotted manure with the earth and then figure out what seeds you will need for planting next spring.

Seeds are likely to be dear next year and some kinds will be very scarce since a very large quantity of garden seed sold in this country comes from Germany and will now be unobtainable.

All the home-grown plants which have this year produced seed should be kept, dried and the seed put in a dry, cool place in the cellar. Don't burn up the stocks, peas, lettuce, etc., which have gone to seed this year, save them and gather the seed. Next spring you will find that it has been well worth your while to do this.

How about a wind-break or a few trees planted around the farm? Figure it out and decide whether you can't afford to spare a strip of the summerfallow near the buildings for tree planting early next summer.

Don't forget that a very valuable asset in the garden is a straw mulch. Light strawy manure put over the strawberries,

GROWING BUSINESS

As an example of the growth of the farmers' business organizations, the record of the Grain Growers' Grain Company's on October 21 is significant. On that date the Company received 112 shipping bills out of 261 total inspections or nearly one half of the grain passing thru Winnipeg. On the same date one year ago the Company received only 117 shipping bills out of a total inspection of 1510 cars, or about one thirteenth. This shows a remarkable growth in business as compared with last year.

around the trees and shrubs will practically insure their coming thru the winter unharmed.

Get your seed grain tested for germination soon. If it isn't good enough you will have ample time to get some that is.

It is not too late to decide to send the boy or girl to college for the winter. Better late than never. The expense may seem heavy to start with, but in after years the satisfaction of having the children leaders in the community and fitted to make the most of life's opportunities will more than recompense any sacrifices made.

Now that the long evenings are coming and the heavy field work is over, farmers have a chance to take advantage of the opportunity afforded by the Dominion and Provincial Departments of Agriculture in the way of securing bulletins containing advice on the various branches of farm work. Notices appear in the farm journals from time to time relating to the new publications of the various departments. This experimental work is carried on at the expense of the farmers and the natural thing to do to get value for this money is to obtain, read and make use of the information which is being distributed. Write to your provincial department of agriculture either for any bulletins available on some subject you are particularly interested in or for all the literature on hand which relates to agriculture. By the outlay of a stamp a large amount of most valuable reading material for the winter months will be only too gladly sent by the department written to.

SHARE IN PROFITS

This security is backed up by a long-established and substantial manufacturing business, embracing a number of the most modern plants in existence, that has always paid dividends and the investor shares in all profits, and dividends are paid twice a year, on 1st June and December.

NATIONAL SECURITIES CORPORATION, LIMITED
Confederation Life Building, Toronto, Ont.

The successful mechanical milker must squeeze the teat between each suck of milk, otherwise it would draw too much blood down into it and result, in time, in injury to the udder.

EMPIRE MECHANICAL MILKER

accomplishes this massage perfectly, yet with simpler apparatus and less power than any other, by vacuum and atmospheric pressure. The "Empire" is the very latest development of the mechanical milker, embodying all the ideas demonstrated to be correct by former experiments. As there is no compressed air used, only one pipe line and one air tank is necessary, and the whole apparatus is much simplified. It is absolutely guaranteed. Teat cups fit all teats—can be easily taken apart and cleaned. It is less expensive to install and less trouble and expense to operate than any other successful milker.

The Empire Mechanical Milker is in successful operation at present in many dairies. With it one man can see to the milking of 20 to 30 cows in an hour. Cows are milked more regularly and its use usually increases the milk yield. The milk is kept hygienically clean. More cows can be kept without more help to care for them or your same herd with less help.

Write us telling how many cows you keep and we will send you more complete information and quote the cost of a milker installed in your barn.
