Crystalized Poison! Your blood is always full of poison—the poison you eat and drink and breathe into your system. It is the purpose of the blood to absorb and carry off this large term region. the blood to absorb and carry off this very poison. And the kidneys, which are the blood filters, are expected to cleanse the blood and send it back through the system clean, to gather more poison, which they, in turn, will eliminate. But sometimes the kidneys fail. And sometimes, from some other cause, the blood gets so full of poison that they cannot absorb it all. This is the start of Rheumatism. The poison accumulates of Rheumatism. The poison accumulates and crystalizes. The crystals look like and crystalizes. The crystals look like little grains of sugar or of fine white sand. The blood carries them and they increase in size. Then, when it can carry them no longer, it deposits them in a joint—on a bone—anywhere.

The twinge in your leg—the dull ache in your arm on a rainy day—these are the contrary of the suffering—the end of the pain and swelling—the end of the suffering—the end o outward signs of the unseen crystals. #### Simply Write Me

Plainly, the first thing to do is to remove the poison. But this is not enough. The FORMATION of the poison must be stopped, so that nature may have a chance to dissolve and eliminate the crystals which have already formed. Unless this is done there can be no cure—no permanent relief.

I searched the whole earth for a specific for Rheumatism—something that I or any physician could feel safe in prescribing—something that we could count on, not only occasionally, but ALWAYS. For the ravages of Rheumatism are everywhere, and genuine relief is rare. I spent twenty years in experimenting
