## POTATO CANKER.

(Experimental Farm Note.)... Potato Canker or "wart disease" of the potato is a disease happily only known to most Canadian farmers by its name, perhaps to some few by its notoriously dangerous character to the potato growing industry in other countries.

Some ten years ago the Federal Department of Agriculture succeeded in averting the very near danger of its introduction into Canada from abroad, principally from Europe. The Department then placed an embargo against the importation of potatoes from Europe with the usual emphatic objections generally resulting from such measures. To-day Canada has every reason to be grateful for the foresight of the Department. In Great Britain, notwithstanding every effort towards the eradication of the disease, some 22,000 cases and more have been reported during the period of one (recent) year. The disease affects potatoes in various degrees of severity; either there may be slight infection or wholesale destruction of the crop, rendering useless all efforts to harvest a yield. Moreover, the disease persists under certain conditions in the soil for 10-15 years, alters re-infecting a crop even when planted after an interval of so many years' duration. The presence of this disease has caused Great Britain

and other European countries serious losses, not alone within their own borders but also in the valuable export trade in potatoes. Canada is quite free from this disease which causes such serious losses in other countries; but the danger once more looms on the horizon, since this disease has been discovered in certain areas of the United States.

Canadian farmers are well advised to continue their vigilance, especially as potatoes imported from the States are concerned. The persons who through neglect on his part causes the disease to become established in Canada, will cause this country serious injury, probably of a lasting and irreparable character.

## \$10,000 REWARD FOR MURDERER

Sensational Murder of Paul Delorme, Ottawa Student—Clues Being Followed.

Montreal, Jan. 15.—A reward of \$10,000 was offered here tonight by Rev. Adelard Delorme for information that will lead to the arrest and conviction of the person or persons who murdered his half-brother, Raoul Delorme, the 24 year old Ottawa College student, whose dead body was found with six bullet wounds in the head in a shack in the north end of this city on the morning of January 7 last.

The reward will be paid immediately after conviction of the guilty parties.

Progress in the case was reported by the police today to consist in the discovery of an automatic pistol of the same calibre as the bullets found in the young man's head. It was found in an automobile said to have been seen around the district about the time the body was found. Other clues have also been followed with the result that much information is available for the second sitting of the coroner's court scheduled for Tuesday next. In the meantime the contents of the stomach have been analyzed and a report on this will be made to the coroner's jury by medical experts tomorrow.

Much talk is heard around town of a sensational arrest which may be expected shortly in the case but no definite information as to this was forthcoming tonight.

Scientific Proof.

The teacher was having a first grade class in physiology. She asked them if they knew that there was a burning fire in the body all of the time. One little girl spoke up and said:

"Yes'm; when it is a cold day I can see the smoke."

He Will Do.

The shoe dealer was hiring a clerk. "Suppose," he said, "a lady customer were to remark, 'Don't you think one of my feet is bigger than the other?' what would you say?"

"I should say, 'Oh the contrary, madam, one is smaller than the other.'"

"The job is yours."
