ACTON ONT.

Robt. Cochran received this despatch from Chandler, Brown & Co. to-day:—
CHICAGO, Sept. 14.—The action of the wheat market during the past two days would seem to indicate that the bulls are wearing out their horns trying to hold the market. No improvement is noted in the situation. On the contrary, foreign markets continue weak and are steadily declining of their own weight, owing to a poor cash and speculative demand. Crop reports from the Northwest are unimproved, but the crop killers abroad now admit that foreign crops are threshing out much better than expectad, although the quality is inferior. The crowd are decidedly bearish and don't expect and atthick that the market has first broken several per cents. Curb is and is

The further rise in sugars predicted last week has come. Rafineries have no yellows at less than 8 cents a pound and granulated is placed at 8. Even at these prices it is hard to yet orders filled. The market is years have placed at 8. Even at these prices it is hard to get orders filled. The market is very bare. There are no raws and Trinidads to be got. Where the rise will start is a question of considerable interest to dealers. Teas are firm and steady. Coffees are featureless, with the exception that there is a scarolty of Rios. In canned goods the situation is exchanged. The market is stripped of dried fruit. Not a box of Valencia raisins are to be had and other lines are almost equally scarce. One wholesale merchant a day or two age brought 50 boxes of Valencias from Montreal and filled an order at a loss. Now, fruit will advance next week, and certainly the market is in a capital state to receive it. The general grocery trade shows satisfactory conditions. The buyers are at present off the road in considerable numbers to meet their onetomers who are daily, visiting the Industrial Exhibition. Payments are coming in well. One firm received \$15,000 during the

nthracite during the past week has been active ind amply satisfactorily. Though lacking the argent nature of previous weeks, it was suffi-tion to absorb the tonnage as fast as produced. clear to absorb the tonnage as fast as produced.
Indeed the inquiry is decidedly better and inrges than usual at this time of the year. Though producers are fully supplied with orders, yet new commissions are not as heavy as during August, but orders booked ahead are now being satisfied as rapidly as circumstances will permit, though there are yet unfilled many orders that have been standing for weeks. As a matter of fact there is not much let up in the demand, and everything indicates one of the most remarbable movements in the history of the trade.
