DISCIPLINING THE DOCTORS.

THREE CASES BEFORE THE MEDICAL COUNCIL.

A Man Who Made \$15,000 in Three Months by Getting the Public-Advertisement Which Dr. Parsons Says Are More Demoralizing Than Obsolete Publications - Cure-Alls Brought to Book.

The Disciplinary Committee of the College of Physicians and Surgeons of Ontario held court in this city yesterday to investigate the charges of unprofessional conduct preferred against Dr. W. F. McEbride, Toronto; Dr. H. MacGregor Wilson of Windsor and Dr. J. R. McCulloch of Enniskillen.

The members present were Dr. W. H. Belleville, chairman; Dr. Logan, Ottawa; Dr. Payne, Toronto; Dr. Gray, Chatham. Mr. Alex. Downey was the official stenographer.

The Wilson case was brought up first. Hugh MacGregor Wilson was charged with gross violation of professional law, which are characterized as infamous and disgraceful.

The charges are sufficiently proven. Wilson's name will be erased from the register of the college. It seems that this enterprising physician traveled through the country accompanied by a brass band and a dozen of camp followers, who acted as the capacity of entertainers at the public meetings and dispensers and general abettors in private.

FOR A MONARCHY IN BRAZIL.

THE GOALS OF MELLO AND THE INSURGENTS.

Many States Said to Favor it and Also a Large and Important Section of Rio de Janeiro Opposes it.

LONDON, Dec. 6.—The Times to-day publishes a letter dated Nov. 14, from its special correspondent at Rio de Janeiro.

In reviewing the causes leading up to the revolt, the Times correspondent says that with the fall of Dom Pedro the aristocracy withdrew all connection with the Government, and that the wealthy men who were in office were then replaced by needy adventurers, whose sole object has been personal aggrandizement.

Continuing, the Times correspondent says: "President Peixoto opened his administration by cancelling the decree permitting the Bank of the Republic to coin money and to issue notes, which had been done in the interest of a ring of speculators."

But the hopes of reform were soon disappointed when he began removing the governors of states in an undignified manner. Thenceforward he took the bit in his mouth and made a series of blunders, and set aside the spirit and letter of the Constitution in every way.

The correspondent then proceeds to show President Peixoto's alleged breach of faith regarding Rio Grande do Sul in prosecuting the removal of military and naval forces from the state, and the resignation of the minister of Marine in consequence.

Each sympathy, the correspondent says, was shown in Rio Janeiro for the people of Rio Grande do Sul who had been engaged in the revolt, and popular subscriptions were opened between May and August, 1893, for the relief of the insurgent soil.

These subscriptions were crowned with success, and it is said the constantly swelling fund was very largely to President Peixoto, and led to his promotion. Dr. Góes, being impressed.

Coming to the history of the present time the Times correspondent states that on Nov. 7 the insurgent leaders held a conference on board the warship Aquidauana and discussed the question of re-establishing a monarchy in Brazil.

It was then shown that the States of Pernambuco, Bahia, Santa Catarina, Rio Grande do Sul and Parana had a population of 2,500,000, which means 3,411,625 in a separate condition.

The fact that Gen. Góes, a well-known monarchist, was in command of a division under President Peixoto, and that a Republican, commands the National Guard, is positive proof that there was no intention of overthrowing the present administration.

A Brazilian in high office has just reported to the Times correspondent that he believed the end of the war would see the final of the pretorian system of government in Brazil, no matter which side won.

This is the quarantine station of Rio de Janeiro, and the Admiral's appearance there would seem to indicate that he has reconsidered his determination to give his resignation.

It is believed that Mello's return to Rio de Janeiro is due to the fact that the blow on the head from the case will produce brain fever.
