PUBLISHER'S DEPARTMENT:
THE MASSE Y MANUFACTURING COMPANY.
REMOVAL TO TORONTO.

## extensive establishment.

Of the various enterprising industries located in Toronto, probably none are more important than the business of the Massey Manufacturing Company, whose works are situated on six acres of the old Crystal
Palace grounds in the western part of the Palace grounds in the western part of the
city. whose wants were met by a foundry and ma-
chine shop of modest proporions, established chine shop of modest proportions, established at Newcastle, Ont., in 1847, by Mr. H. A. Massey, the business has gradually spread until it overstepped Provincial lines and
has even spread beyond the limits of the Dohas even spread beyond the limits of the Do
In 1870 this business merged into the pres ent joint stock company, with Mr. H. A. Massey as President and Mr. C
as Vice-President and Manager.

Last fall the entire business was removed from Newcastle to Toronto, owing to the superior shipping and other advantages afforded by this city.

The new buildings are laid out on a magnificent scale, embodying the experience not only of the Company but also of several leading American concerns in the endeavour to erect an establishment convenient in all
its appointments and perfect in all its its appointments and perfect in all its
parts. The arrangements are so complete that the rough, raw materials enter one end of the building, are passed forward from one machine to another through the several processes of manufacture, and ultimately reach the store-house at the other end perfect reap-- ers, mowers and rakes, whence they are shipped all over the country

The buildings are of brick, the main part being $350 \times 50$ feet, with an elevation of
four storeys. The foundry and blacksmit shop are 200x60 feet. They are connected with the main building by the engine room wat boiler house, $50 \times 35$ feet. In the conasd biler house, $50 \times 35$ feet. In the con-
struction of the buildings one million brick, a half million feet of lumber, six hundred loads of stone and nine thousand panes of glass of stone and nine thousand panes of glass
were used. The institution, which is heated thoroughly by steam, is well lighted and thoroughly by steam, is well lighted and
thoroughly ventilated. Every department is provided with its hydrant and hose in case of fire.

The works are connected by a switch with the several lines of railway, thus facilitating
the receipt of raw material and the shipment of new machines. The offices are exceedingly fine, and are connected by telegraph with all parts of the country, as well as by telephone with the business parts of the city. In the
basement we pass between tier after tier ol basement we pass between tier after tier of
compartments filled with unfinished parts of compartments filled with unninished parts of
machines, each kind by itself. Taking one of the large steam elevators, of which there of the large steam elevators, of which there
are three, we pass up to the first floor. Here are three, we pass up to the first floor. Here
are saws and planers of various kinds at are saws and planers of various kinds at
work, and one machine turning oval spokes work, and one machine turning oval spokes
out of rough billets of wood. Passing through out of rough billets of wood. Passing through
the boiler-house and by the two sixty-horse the boiler-house and by the two sixty-horse
power boilers, we enter the engine-room and power boilers, we enter the engine-room and
see the magnificent Brown-Corliss engine of see the magnificent Brown-Corliss engine of
one hundred horse power capacity, made one hundred horse power capacity, made
specially for the Company at Fitchburg, specially for the Company at Futchburg,
Mass. This is really a beautiful piece of Mass. This is really a beautiful paece dol-
workmanship, and cost several thousand dol workmanship, and
lars. Through the grinding room we enter lars. Through the where stands the cupola
the moulding floor, whe in which over four tons of iron are melted daily. The steel rake tooth department is under the management of an expert from the
United States. In the blacksmith shop the United States. In the blacksmith shof the
ponderous trip-hammer and the steam shears ponderous trip-hammer and the steam shears
and punch, call for more than a passing reand punch, call for more than a passing re-
mark, but we must hasten on. Among the iron working tools and machinery are some marvels of inventive ingenuity. In a separate department the tools used in the establishment are made and repaired. Every reaping and mowing machine is tested at a
high rate of speed before going to the paint high rate of speed before going to the paint
rooms, which occupy the third storey, where the finishing touches are given. A visit to the works cannot fail to be full of interest to anyone having a taste for mechanical appli-ances. A number of cottages for the work-
men have been erected on the property by men have been erected on the propery by
the Company, and they purpose building several more. The tradesmen employed are machinists, blacksmiths, moulders, woodworkers and painters. From 150 to 200 men are constantly employed, their monthly pay sheet averaging $\$ 6,000$. The factory pro-duces daily ifteen Massey Mowers and Reapers, and forty Sharp's Rakes. As an instance of the capacity of the works we may state that the entire production of this $y<a r$, if arranged in one continuous straight hive, would reach
over thirteen miles. It would seem as though over thirteen miles. It would seem as though
the whole factory had been supplied with
new tools and machinery, regardless of expense, from the most noted American and Canadian builders. Perfect work seems to be the principal object to be attained. If the
great growth of the Company's business in the past, combined with their experience, cap. ital and splendid facilities, may be considered. any guarantee of satisfactory dealings with customers then Canadian farmers may feel every confidence in placing their orders for mowers, reapers, and horse rakes with the Massey Manufacturing Company.

Christmas and Holiday Presents.I have a choice selection of ladies' and gentlemen's gold and silver watches, guards and chains to suit, coloured and bright gold jewellery, and electro silver plated ware. A sarge assortment or such articles as are most and ear presents, all or the finest finish and heavily plated, not made to special ler, but such as will reflect credit on the ler, but such as will reflect credit on the
manufacturers and give satisfaction to the manufacturers and give satisfaction to the
purchaser. W. WHARIN, 23 King street, West.
Hats for gentlemen -at popular prices. Current styles ready. Fine silk hats $\$ 3.25$. Coxwell, hatter, 146 Yonge street, four doors north of Temperance stree.
A Good Account. - "To sum it up, six long years of bed-ridden sickness and suffering, costing $\$ 200$ per year, total, $\$ 1,200-$ all of which was stopped by three bottles of Hop Bitters taken by my wife, who has done her own housework for a year since withont the loss of a day, and I want everybody to know it for their benefit. ## ABOUT BUYING.

Buy only what you require and when you require eit, is perhaps the safest rult that can be adopted in buying for pri
vate use But this rule will not always $h$, ld good
with the merchan'; and this is one of the years when to look ahead is both saf and profitable. All kinds of goods have been steadily
advanciug, and the man who bought early is the oniy one who can sell at old
ent and and
 tuicds, 1 ordered my stock early, and
will now give my customers the privilege
