## THE NEDICAL STUDENTS' DINNER.

The seventh annual dinner of the Manitobs Medical Students' Association took place on the evening of the 19th, at the Clarendon. A large gathering assembled around the festive board, consisting of the past and present stadeuts of the college, to the number of fifty, the various professors, and several guests. After doing ample justice to the recherche and varied menu provided by "Mine Host Bennetr," gastronomic exertions being stimulated by the melolicas strains of a string band, the toast list was attacked, the president of the Society, Mr. Toddl, and VicePresident Westbrook, who gracefully perforned their several duties, proposing them. T'ie various professors in their replies fondly patted themselves, and the students still further laid it on, so that these august individuals were in a perfect condition of beatitude during the evening, their Santorini muscles folded into permanent graceful curves. Thure can be no question that the gentlemen who founded the Medical School and have uiligently worked it up to the perfection which it has already attained to, have every right to feel proud of their success, which wa practically demonstrated at this gathering, hy the number and unusuallyintelligent appearance of those whom they have taught and ure teaching. It is to be earnestly hoped that the great and gratifying success which has attended iheir endeavors in the past will stimulste them to increased exertions in the fature. The crude machinery which was only attainable at the initistion of the school is now by no means sufficient for its rapidly extending work-regard must be had for the position the graduates of Manitoba College take alongside those of older colleges, and this will be largely determinad by the machinery of education which is provided for them. Their own merits, thougb superiative they may be, will count for little, if tie Institution from which they graduate is notin accord in its system of teaching with the spiritof the age, and thatreciprocitywhich theynight, under other circtumstances, reasonably ask for, will be unattainable. We believe, how-- ever, that the Faculty have grasped this
fuct; and that their desire is to render as perfect as possible the educational advantages obtainaole in the Medical School es. tablished in Wimipeg. If the material continues to be as ollastic and adaptabie for the creation of medical practitioners as the great hulk of that which has hitherto passed through their hands, the medical gradiates of Manitolia will become known in the world of s-ience.

## THE DUCTOR.

[Sympathetically dodicested to tho medical fraternity corsvalerca nt.]
Who works from inorn till set of sun, Is d'l day long upon a run.
And yet whose work is never dinne:
The Doctor.
Who, when at last he soeks repose,
And falls into a gentle dose, And makes sweet music through hin nose?

The Doctor.
Who's roused up in the ceal of night,
By some ane in u dreadful fright,
Who's sure she's going to die outright?
The Doctor.
Who, when the days are scorching bot, Can seek no cool, sequestered spot, Because he must be on the trot?

The Doctor.
Who must an even tomper keef.
And hide his thoughts and feelings deep, To cheer up those who wail and werp?

The Doctor.
Who has to hear of countiess ills, And deal out multitudes of pills to those who nover pay their bills?

The Doctor.
Who munt lec always very wise,
Ready to give profound replies,
Whatever yuestion may arise?
The Doctor:
Who, when the mercury is low,
Long, weary miles must oft $\mu \mathrm{n}$ no
Through catting winde and blinding snow?
The Doctor.
Who must not show that it's a bowe:
To bear each family history o'er
Five generations back or more?
Tbe Dactor.
Who takes our aches and paiss away; And gives us courage day by day, To cheer us on our healthward way?

The Doctor.:
Who should be placed among the saints, Whom history with u's aciuaints, $\cdot$
For patieut list'ning to complaints?
