732 78.

rate of ten per cent, per annum upon the paid-up capital without drawing upon the Company's ample Reserve Fund of \$900,000. The amount estimated as necessary to reinsure, or run off all existing risks, is \$578,-654.19. Deducting this from the total surplus funds of the Company, a net surplus of \$325,527.17 is shown over capital and all other liabilities.

One important result from the generally adverse experience in fire underwriting for the year 1891 has been the withdrawal of a number of Companies from the business. The risks of these retiring Companies have been assumed by other and stronger Companies, so that in no case have the policyholders been sufferers; while the terms on which the business has been taken over have, in most instances, been such as will permit the winding up of the Companies without loss to stockholders. The natural effect of these withdrawals will be the concentration of the 21- business among a smaller number of offices, and concerted action, where necessary, to place it upon a more satisfactory basis. These movements, with a return to a normal loss ratio, which may be reasonably looked for, must eventually result favorably to the Companies remaining in the field.

KENNY, Managing Director. AUDITORS' REPORT. To the President and Directors of the Western GENTLEMEN,-We hereby certify that we have audited the books of the Company for the year ending December 31, 1891, and have examined the vouchers and securities in connection therewith, and find the same carefully kept, correct, and properly set forth in the above Statement. R. R. CATHRON, JOHN M. MARTIN, F.C.A., Auditors.

In moving the adoption of the Report the resident said :-

"The Annual Report of the Directors which has just been read, with its accompanying statements of the accounts of the Company, presenting as they do a clear synopsis of the past year's business and its results, render unnecessary any lengthened remarks or explanations from me. Compared with the figures of the preceding year, you will have noticed a moderate and satisfactory gain in the net premium income, a considerable increase in the amount of losses incurred, and a marked reduction from

able to show as the result of our operations for the year 1890; and yet, notwithstanding this diminution in the profits on the business transacted last year, those of us who have watched from month to month the fiery record of 1891, and have noted the inroads which in many instances it has made into the surplus funds which Companies have accumulated in more prosperous years, cannot but feel that we are exceptionally fortunate in making so favorable a showing as is pre-sented to you to day. To Fire Insurance Companies the past year has proved a veritable "Waterloo," and in addition to wind-ing up a number of smaller American Compaules, we, as Canadians, must regret that it has resulted in the retirement of two of our own companies, which have reinsured their risks with offices whose wider experience leads them to look beyond the records of such an exceptional year as the past one has proved.

"The effect of this reduction in the number of competitors for business-judging from our own receipts thus far for the present year-is already being felt in the increased volume of premiums of the remaining Companies; and while, in a business such as ours, subject to a large extent to elements beyond human control, it is impossible to forecast the probable results of any one year, we may safely rely upon the law of average asserting itself, and may fairly assume that by conducting our business on lines laid down by past experience, and adhering to a policy of just and liberal treatment of our insurers, we shall in the future, as we have heretofore, earn fair profits for our Shareholders upon their capital.

"A full consideration of the present conditions and prospects of the business, which I have briefly outlined, has led the Directors to consider the question of increasing the capital stock of the Company, and believing that such action will be advantageous at the present time in strengthening in proportion to the growth of its business the financial position of a home institution which already stands high in public confidence, they have taken advantage of the present gathering of its Shareholders to call a special meeting at the close of this regular meeting to approve, as required by the Act of incorporation, of an additional invoce of these additional issue of stock.

"I cannot close without bearing testimony to the zeal and watchful care manifested by our Managing Director in conducting the business of the Company, and the efficient manner in which the other officers have fulfilled their respective duties during an unusually trying year, and expressing our ap-preciation of the active and loyal services of the Managers of our various Branch Offices and the agents of the Company generally throughout its wide field of operations."

Mr. George A. Cox, Vice President of the Company, said : "In seconding the adoption of the report last year (when, after paying a ten p r cent. dividend, we carried \$75,000 to the Reserve Fund), I pointed out the necessity of providing in favorable years for less fortunate ones, such as the experience of all companies leads them to look for when fire losses exceed what may be regarded as an average ratio. The past year has been one to impress this lesson upon all Companies. The experience of the 'Western,' however, I am glad to be able to add, has been more fortunate than a majority of Companies operating in the same field. In Canada our loss ratio is (as it has been for several years past) below the average of all Companies do-ing business here, while in the United States losses incurred, and a marked reduction from we compare favorably with the Home and the handsome profit balance which we were Foreign Companies which make returns to
