

- (c) The approval of the government to which the person is subject when the materials or services are classified or when the furnishing of such materials and services requires the communication of classified information.

ARTICLE VI—Non-Research Quantities of Materials

A. The Commission will sell to Atomic Energy of Canada Limited, a wholly-owned corporation of the Government of Canada, under such terms and conditions as may be agreed, such quantities of uranium enriched in the isotope U-235 as may be required in the power reactor programme in Canada during this period, subject to any limitations in connection with the quantities of such material available for such distribution by the Commission during any year, and subject to the limitation that the quantity of uranium enriched in the isotope U-235 of weapon quality in the possession of Atomic Energy of Canada Limited by reason of transfer under this Agreement shall not, in the opinion of the Commission, be of military significance. It is agreed that the uranium enriched in the isotope U-235 which the Commission will sell to Atomic Energy of Canada Limited under this Article will be limited to uranium enriched in the isotope U-235 up to a maximum of 20 per cent U-235. It is understood and agreed that, although Atomic Energy of Canada Limited intends to distribute uranium enriched in the isotope U-235 to authorized users in Canada, Atomic Energy of Canada Limited will retain title to any uranium enriched in the isotope U-235 which is purchased from the Commission until such time as private users in the United States are permitted to acquire title to uranium enriched in the isotope U-235.

The Government of Canada, or its appropriate agent, will give to the Commission a first refusal of any special nuclear materials which the Government of Canada may desire to transfer outside of Canada, where such special nuclear materials have been produced from the irradiation of fuel elements enriched with U-235 purchased from the Commission under the terms of this Agreement.

In addition, any special nuclear material transferred by Atomic Energy of Canada Limited to the United States may be re-transferred to Canada on such terms and conditions as may be agreed.

B. The Commission will continue the present understanding with Atomic Energy of Canada Limited, a wholly-owned corporation of the Government of Canada, covering the sale of uranium of normal isotopic composition for use in the NRX and NRU reactors.

The Commission will also sell to Atomic Energy of Canada Limited such quantities of uranium of normal isotopic composition, and to the extent practical in such form, as may be required for the power reactor programme in Canada and under such terms and conditions as may be agreed, subject to the availability of supply and the needs of the United States programme.

C. The Commission will continue the present understanding with Atomic Energy of Canada Limited, a wholly-owned corporation of the Government of Canada, covering the sale of heavy water for use in the NRX and NRU reactors. The Commission will also sell to Atomic Energy of Canada Limited,
