Co., Boston, and 10 plans—

Only 20 sets remain for sale of the first edition. Cloth uncut,

PRICE \$45.00.

(IN CANADA.)

Opinions of the Press.

The story of the taking of Quebec has been told a hundred times. It is told again in these volumes with circumstance and lucidity.

The Spectator.

"And yet we are almost inclined to condone the fault when the immediate outcome of it is the magnificent series of volumes whose title stands at the head of this article but to speak of him (Wolfe) as Mr. Doughty does frequently, of him, the victor in one petty skirmish, as one who can only fittingly be compared with Nelson, the man of a hundred fights and of the battles of giants, is carrying hero worship into the region of the grotesque.—*The Edinburgh Review.*

"Stage by stage the process of the siege unfolds itself with a fullness which the scale of Parkman's work rendered impossible, and with a precision which he did not always attain.—*The Times, London.*

Students desiring to know the true inwardness of this far-reaching event in American History, must inevitably hereafter turn first to Dr. Doughty's scholarly and well-considered volumes.—*American Historical Review.*

An Imperial work which it would be impossible to overestimate.—
Sir Gilbert Parker, M. P.
