CORRESPONDENCE SOLICITED.

Argument vs. Fact

All the argument in the world in favor of the old fashioned, out-of-date, wooden dry-kiln truck, will not avail against the simple statement of fact that a steel truck is not only infinitely better in every way, but much cheaper, too, in the end. A man's common sense teaches him that. But there's a difference even in steel trucks. **WE CLAIM**, and hundreds of dry kiln users bear out the statement, that

The Standard Channel Steel Roller Bearing Truck

is the best truck yet devised. Two men can handle the biggest load on it; it cannot break down; heat and dampness of the dry room does not affect it; it will last a lifetime; it never needs repairs; the amount saved in material and repairs alone in one year will more than pay for the entire cost. This is the actual experience of users. No theory about it.

We make 'em for crosswise and endwise piling and for flat and edge stacking.

We furnish them with **THE STANDARD IMPROVED COMPRESSION DRY KILN**, or sell them separately to users of other kilns.

Ask for our New Truck Booklet. It illustrates and describes our different types of steel trucks, and also our steel transfer cars. It contains, too, testimonials from many people who have thrown away their wooden truck and adopted our new steel truck.
