PRODUCTION QUESTION PRESSING. REATER production was given a place in sion, and as a result a petition is being sent to is to confess an entire ignorance of Britain and the Government asking that tractors be sup- her people. plied free for the use of the county, and that ile, when over 12 inches in size, be also given without charge. This, the councillors think, would help to reduce the cost of living.

There will be two opinions on the advisability of granting the council's request, but there will be nothing but approval of bringing the production question before these boards so largely composed of agriculturists. The pity is that it was not given a prominent place in the December sessions.

Theories are being advanced in all parts of the country for increasing the supply of labor, and thus helping to make the production of 1918 greater than Canada has ever experienced. Some of these schemes are feasible and others are of doubtful value, but it is high time that some of them were accepted and put into operation if they are going to be of any use this

Spring may be early or it may be late, but it is almost certain that it will be here before full preparations have been made for its recep tion. What arrangements have been made to secure assistance from the cities for the farmers? Has there been any real organization of labor resources so that when the land is ready for the workers the workers will be ready to take up the labor? The assistance given by school boys last year is said to have been valuable; has an extension of this plan of service been decided upon for this year?

There is so much to be done and so little time to do it all, that immediate action is absolutely necessary. Conferences which meet and adjourn without actually doing anything just represent so much time wasted. It was natural to expect that the Governments would have given some lead this year, but nothing is forthcoming from them, so the people must act.

The suggestion has been made, and may be worth taking up, that all city men, capable of helping on the farm in any capacity, in their of the times they will require extra help for two finding it next to impossible to secure work. or three weeks, the work and the volunteer might be brought together.

now, and not put off until the work is waiting cations for clerical positions, and do not fall

of prime necessity.

Mr. Hanna was supposed to be the same stand, and form the basis of fair criticism.

BRITAIN'S REVOLUTION.

D RITISH labor is unanimous in desiring to see control of the Government pass into its hands, but it will not countenance a revolution, in the generally accepted sense of that word. There is every expectation that a general election will be held in the old land within a few months, and many believe that power will pass to a united Liberal-Labor party, with the Laborites holding the balance. If this eventuates for; on Sunday night the cause for thanksgiving the "revolution" will have become an accomplished fact without any of the horrors and was that he bloodshed which have been looked upon as inseparable from revolutions. It will have been

There has been, in Canada, considerable whispering about the possibility of a revolution the opinion that there was a definite movement | their dues." towards such an end. They have confided this view to their friends, who, in turn, have passed it on until it became generally known. To those of one large school to serve half a dozen com-Britain, such talk has always appeared to be he perhaps neglected the transportation diffimerely the foolish vaporings of those who have culties. Even under the present plan many chilof Britain after a cursory visit to the islands. home.

That such an idea could gain ground in Britain seemed an impossibility.

What was there to cause a bloody revolt? Not hatred of mass for class. There was envy and there was a strong belief that the landed classes who owned and kept in idleness large tracts of good land should be made to give them up to production. To a very great extent this has been done without difficulty. There were

has been done without difficulty. There were wrongs to be righted, but in recent years there has been evidenced a desire on the part of Parliament to act on behalf of the masses without waiting to be forced. Hatred did not, and we believe does not exist.

Desperation must be felt before an armed revolution takes place, and there was no desperation in Britain. The laboring classes have not been beaten and whipped and treated as dogs as they were in Russia. They have not had their share, perhaps, of the good things of life, and have not wielded the power to which their numbers and the value of their labors entitled them, but they have been gaining steadily, and have been able to see ahead the time when they should possess their full rights.

Revolution in Britain would be a world calamity, and is unthinkable. To believe in such a possibility is to think of the laboring classes as an irresponsible, brainless mob, and to think that is to confess an entire ignorance of Britain and here people.

Ralph Cooke started from his board from his beards smile on has face, for the day was the one, on which as self-satisfied smile on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on which her pooped more for the day was the one, on has face, for the day was the one, on has face, for the day was the one, on which her say for the beaution in twas keeping and the would show them at the bank that public opinion could not one of the same and the world of the was in the world of the was the principle of the businesses. He had walked well into the heart of the business section of the city before he was accosted by one of the targers. "Buy a tag! Buy a tag!" was the cry he heard, and he saw a box showed invitingly in front of him. He looked into the face of the young woman hefore him, refusal on his lips, but it changed to an exclamation of where has this fact been better illustrated than in their arrangements for permitting the peoples of Courland, Poland and Lithunania "self-determination."

He had walked well into the heart thought of calling on her in the even-fore he was accosted by one of the targers. "Buy a tag!" buy a tag!" was the cry he heard, and he saw a box showed invitingly in front of him. He looked into the face of the young woman before him, refusal on his lips, but it changed to an exclamation of surprise. "Peggy Wensley!" he cried "Whatever are you doing here?" "Ralph—Ralph Cooke!" Her surprise was as great as his, and she almost embraced him with joy. To think that I should meet you way out here, and I haven't seen you for four larger answered the door herself for leaves and preference for tall men, and she was so homely that she had found it easy to forget. Shortly after seven Ralph rang the doorbell at the address Peggy had given him. It was an early hour, but here, and I haven't seen you for four answered the door herself for

It was at first believed that the Teutonic plan was to hold a referendum of the peoples while they were under the German military's thumb. This was bad enough, since it was to be expected that by threats of dire punishment and all kinds of horrors the people would be inand all kinds of horrors the people would be induced to express their preference for Germany as a protector. But it was not quite certain enough for the Huns. They had discovered that bullying did not always work satisfactorily, Belgium having given them a lesson in this remember. As he was leaving she remembered the mission she was fulfilling that day.

They talked for nearly han and she was living in the city she told him she was leaving in the city she told him she was leaving in the city she told him she was leaving

was to be permitted, but the method of express- of his coat. "I was so delighted to meet you I was to be permitted, but the method of expressing choice was picked by the Huns. The peoples were not to vote on it, but the representative bodies and leaders of public opinion were to make this decision. As these representative bodies were principally composed of men selected by the German administration, the result was not in doubt.

"I was so delighted to meet you I didn't think of it," he said, as he slipped a coin—the largest piece of silver he had—in her box.

As he hurried to the bank his thoughts were on the girl he had just left. She was more meautiful than when he had last seen her, and although he had only spoken to her for that brief time, he wondered how he could have forgotten her so easily. She was different from other girls—sult was not in doubt.

"I was so delighted to meet you I didn't think of it," he said, as he slipped a coin—the largest piece of silver he had in the largest piece of silver he had just was more meautiful than brief time, he had just seen her, and although he had only spoken to her for that brief time, he wondered how he could have forgotten her so easily. She was different from other girls—she with its nurse. They will be here soon, and then you can see the baby. I wish they would come."

Possibly the German mind cannot fathom the distaste of the Allies for such deceit and trickery. It probably seems to the Teutons that this is the most any people could desire. They cannot bring themselves to believe that the common people have any rights are opposed to Prussianism. This is one of the lessons the common people have any rights are opposed to Prussianism. War Flour Good Flour

By Caro M. Brown
Chemist—Lake of the Woods Milling Company Limited

'N the interest of food conservation, it has been proved most economical to insist upon a standard loaf of bread from all bake-shops, and this is only possible when a standard flour is manufactured. In order to , effect this standardization of flour all over Canada, the Government requires that the mills make not less than 74 per cent flour from wheat, that is 74 pounds of War Flour is to be made from 100 pounds of wheat. This is only very slightly more than most mills are already extracting.

Not "Graham" Flour

The slight increase of flour extracted will be true flour, and not bran or dust. Formerly this slight amount of flour had been allowed to go into the feeds for animal consumption, but when every grain of wheat counts as it does now, this is too extravagant a practice. There need be no apprehension as to the quality of Government Regulation flour. It is NOT to be "Graham," nor even so-called "Whole-wheat" flour, and it is NOT flour mixed with Bran and Shorts. It will be simply pure flour as taken from the wheat berry, purified and sifted exactly as in the past; but, instead of several grades, such as FIVE ROSES, HARVEST QUEEN, LAKEWOODS, etc., being separated, all the flour will be blended together and only one brand will be on the market.

Colour More Creamy

The War Flour will not have quite the white colour of FIVE ROSES, but for all practical uses it will give identical results in baking. Flavour, texture, general appearance and nutritive value will not be impaired in any way.

Excellent Baking Results

Foreseeing that some regulation of this sort was imminent, we have been trying out in our Laboratory recipes for Bread, Cakes and Pastry, using the new "War Flour," our idea being to ascertain if any modification of present methods should be adopted. There need be no fear that the new flour will make unpalatable bread, cake or pastry. We were more than pleased with the results, and found that for bread no variation seemed to be necessary.

Some Suggestions for Housewives

In making pie crust and puff paste, we have obtained the best results by using very slightly less water than with FIVE ROSES. The crust was flaky, crisp and well-flavoured. For cake, we followed exactly the same recipe in using FIVE ROSES and the War Flour; the cake from the War Flour was equal to that from FIVE ROSES in lightness and texture,

was excellent in flavour and of a rich, creamy colour. As the War Flour will be rich in gluten, care should be taken in making bakingpowder biscuit and pastry not to work it or handle it any more than is absolutely necessary, as this toughens the gluten, resulting in a texture less tender and flaky. It will require a little study and ingenuity on the part of each housewife to adapt her favourite recipe to this flour, but the little time given to this will be more than repaid by the results obtained.

Lake of the Woods Milling Company Limited Makers of Five Roses 18:our

Montreal :: Winnipeg

FIVE ROSES IN KHAKI.—To conserve wheat so essential to the Allied Cause, your favourite brand is now being milled according to Government Regulations. But the name "FIVE ROSES" which, for over a quarter century, has been a positive assurance of quality is still your protection. Users of "FIVE ROSES Government Grade" Flour are assured of the best available flour under all conditions. Fortunate possessors of the famous FIVE ROSES Cook Book can bake with the new FIVE ROSES with practically no change in their present recipes and in the certainty of excellent baking results.
