

PRaise IS GIVEN RED CROSS WORK

Speakers Laud Efforts at N. B. Division Meeting Here

Doing Much in the Interests of Health—Reports on Various Activities.

Red Cross work to promote better health was commended by Dr. H. A. Farris of the Saint John County Hospital this morning at the opening session of the N. B. Division of the Admiral Beatty Hotel.

R. T. Hayes, president, was in the chair. Rev. C. G. Lawrence said that Jesus Christ had chosen his workers from the busy people—those who were practical—not from kings and people of high estate.

REPORTS PRESENTED.

Reports were given by Mrs. L. P. D. Tully, convener of hospital committee, Mrs. Nora Foss, matron of Lancaster Military Hospital, Dr. H. A. Farris, Saint John County Hospital; Miss Brownell, River Glade Hospital; Miss Jessie Lawson, supervisor of Junior Red Cross; Mrs. Walter C. Allison, convener of emergency work committee; Miss Hulota Dykeman, Lady Byng Camp; Mrs. Margaret Lawrence, publicity work.

Dr. Farris said education was still very necessary in the Maritimes, where the death rate still was alarmingly high. The climate was not so blame, but conditions through ignorance were. He expressed his admiration for the work of the Lancaster Hospital, in her short report, appreciation of the cheer brought by the visitors from the Red Cross Hospital committee. He said that the Red Cross was the chief source of education to the people by its methods of information and its excellent work through the Junior Red Cross.

Miss Brownell told of the work being done at River Glade sanitarium. She said that the hope of the peace of the nations rested in a league of the children, as proposed in the Junior Red Cross in exchange of courtesies.

JUNIOR WORK.

Mrs. Lawson stressed the international work of the Junior Red Cross as a comparatively new feature. She quoted from Sir Philip Gibbs, who said that the hope of the peace of the nations rested in a league of the children, as proposed in the Junior Red Cross in exchange of courtesies.

FINANCIAL REPORT.

Ralph G. McInerney, honorary treasurer, said the 1925 budget called for expenditure of \$6,500, besides upkeep of the Junior branch and the home nursing fund. He said that the balance of the office, to date \$28,433 had been expended, which averaged within the budget. The sum of \$7,900 had been allocated to the division by the central council, but for this work; \$2,000 for home nursing; \$500 for publicity and organization. Of this the central council still owed the division \$275.

A grant of \$755.81 was made to the division during the year for Kings county deposits of returned soldiers. There is at present a bank balance of \$2,440.68 and \$6,000 in bonds, but of this total of \$8,440.68 the sum of \$8,240.83 belongs to the Junior Red Cross, home nursing, Kings county deposits and publicity and organization.

So that they actually had on hand \$4,191.81 for the general work of the division, or a sufficient sum to cover the ordinary expenses for only eight months. The year closes on Jan. 1.

BIRTHS.

BELL—At the Evangeline Home, to Mr. and Mrs. T. Moffett Bell, a son, Sept. 9, 1925.

DEATHS.

BELEA—At the residence of H. L. McAvour, 38 Millidge avenue, on Sept. 9, 1925, Sarah C. widow of R. Addison Belea, in the 82nd year of her age, leaving to mourn two sons and five daughters.

Service That Is Effective

THOSE little ads on the condensed ad page of The Times-Star are always adding to their reputation for obtaining quick results. Of course the office does not hear about all of them or even a small proportion, but occasionally an instance is reported to The Times-Star. Here is one of today. A lady advertised for a maid and ordered the notice to run for three days. Last evening, after only one issue, she had the maid engaged and installed in her home.

Local News

INQUIRY ENDS

The inquiry into the recent fire in the Frank C. Jewett grocery store in Fredericton was completed by Fire Marshal H. H. McLellan last night. The evidence was not conclusive enough for him to make any charge. It will be placed in the hands of the Attorney-General.

FREDERICTON MARKET

Prices in Fredericton yesterday were: Chickens, 40 to 45 cents lb.; fowl, 25 cents lb.; lamb, 10 to 20 cents lb.; veal, 8 to 14 cents lb.; butter, 35 to 40 cents; eggs, 35 to 40 cents doz.; apples, 25 to 30 cents; potatoes, \$2.25 bbl.; corn, 25 cents doz.; potatoes, \$2.25 bbl.; corn, 25 cents doz.; sweetbreads, 10 cents doz.; cucumbers, 40 cents pk.; tomatoes, 25 cents; ripe tomatoes, 5 cents lb.; cabbage, 60 to 80 cents doz.; celery, 10 cents bunch; cauliflower, 10 to 20 cents each.

PRESENTATION

Last evening members of Dominion Lodge No. 445, I. O. G. T., honored one of their members, Miss Margaret Winnifred Foster, who is soon to leave to make her home in Fredericton. The presentation was made by a grand chief templar, presented her a handsome hand bag and extended the best wishes of the lodge for a prosperous future. Miss Foster made a fitting reply. Refreshments were served by the ladies of the lodge.

ARTHUR'S LAST VISIT

The steamer Prince Arthur arrived at 6:30 o'clock this morning from Boston on her last trip here this season. She had 62 passengers and a small shipment of fruit. The Prince Arthur will sail again on Friday evening. During the remainder of the season the steamer Governor Dingley will operate as usual with two trips a week. It is expected that the Governor Dingley will run until the latter part of October.

FAIRVILLE WEDDING

The residence of Mr. and Mrs. George Stevens, Fairville, was the scene of a pretty wedding last evening, when their son, John E. Stevens, and Miss Hazel B. Williamson, daughter of Mr. and Mrs. Currie Williamson, of Albert county, were married by Rev. F. J. Leroy, of the Church of the Good Shepherd.

The ceremony took place under an arch of greenery, dahlias and sweetpeas. The bride wore white satin with a high collar and coronet of pearls, and carried a bouquet of sweetpeas and maiden-hair fern. The groom was dressed in a tuxedo. The ceremony was held at 8 o'clock. The Harmony Orchestra furnished music during the evening. Mr. and Mrs. Stevens left for a honeymoon trip to Fredericton. They will reside in Fairville. The numerous beautiful gifts included silver, cut glass and linen.

Miss Mackenzie and Miss Paget Finalists

RIVERMEAD GOLF CLUB, OTTAWA, Sept. 10—Miss Ada Mackenzie, Miss Paget, and Miss Helen Paget, Ottawa, will compete in the finals for the ladies golf champion ships of Canada as a result of their victories this morning. Miss Mackenzie defeated Mrs. M. Ross, Ottawa, 6 up and four to play, and Miss Paget winning from Miss D. Virtue, Millbrook, one up.

TWO PASS EXAMS

Of the eleven candidates who wrote the electrician's examinations on Friday evening last only two succeeded in passing. They were E. N. Stockford and Thomas Clark.

TALK WITH TAILS

The ground squirrel, prairie dog and other species use their tails in talking to each other by means of signals, say scientists. Some birds, especially the "flicker tails" also use their tails for code messages, they say.

DOLLS TO SANTA LAND

A large shipment of dolls and toys was recently sent to boys and girls of the most northern settlements of North America. The last 1,000 miles of the journey was by dog sled.

SPEED IN WASHINGTON

Washington Monument is to have an elevator that travels 200 feet a minute. It will replace the present cable car, which has a speed of 100 feet a minute. The elevator shaft is 538 feet high.

ARGUMENT OVER PRISONER'S WORDS

Captor of Alfred Arsenault on Stand in Murder Trial at St. Andrews. Special to The Times-Star. ST. ANDREWS, Sept. 10—The case of the King vs. Alfred Arsenault, accused of murdering Alpheus Hays, a 62-year-old man, was further continued this morning. The entire time of the court this morning was taken up with the witness, Levi W. Goodell, town marshal of St. George, who was recalled and examined by J. B. McNair and counsel for the prisoner on the night of the murder.

BIRDS FLY LOW

Birds rarely fly more than 1,000 feet from the ground, a German scientist, after making a study from an airplane, reports. He also reports that but few birds fly faster than 25 miles an hour.

CLINIC FOR ESKIMO

The Eskimo suffer from tonsillitis and adenoids. So Dr. Curtis and Dr. Charles A. Pryor, Philadelphia, plan to establish a clinic for tonsil treatment at Florence Cove, Labrador.

N. Y. CRIMINAL IS MURDERED

"Eleven Fingers" Frank Williams is Shot From Doorway

Wife Refuses Call of Police to Aid in Finding the Slayer.

NEW YORK, Sept. 10—Six shots were fired from the doorway of 218 East 108th street, and "Eleven Fingers" Gufrida, alleged opium peddler, thief, burglar, bootlegger and bookmaker, fell dead. His assailant escaped, leaving only the vaguest clues.

LIKELY REVENGE

According to Detective Thomas E. Enright, "Eleven Fingers," whose real name was Frank, alias Frankie, Williams, had been known to the police as a dangerous character for years, engaging in almost every form of crime, and had served two terms in the penitentiary. The killing, he said, probably was in revenge for some crooked deal.

Assistant District Attorney McLaughlin, when notified of the murder, got in touch with Gufrida's home at 108 East 110th street, by telephone. He talked to Gufrida's wife, Carmela, 25 years old, requesting her to come to his office and lend what assistance she could in tracing the murderer. She replied, according to Detective Enright, "I don't want the police. What good is it now he's dead?"

HIS SOBRIQUET

A scar on the left hand indicated where Gufrida's eleventh finger at one time grew. Detective Enright told how the man had come to lose it. "Some detective tracked the name 'Eleven Fingers' on him seven or eight years ago," the detective said, "at the time of an arrest for burglary. From then on he was commonly known to the police and to others by that name. About five years ago I was standing on a corner with some policemen, who had just been assigned to this precinct. It was some sort of Italian festival, and I happened to spot 'Eleven Fingers' in the crowd.

"He actually had eleven fingers. The eleventh finger was sort of stubby. It was between the index and the thumb on his left hand. When I saw him there I called to him, 'Come over here! I made him show his eleventh finger to the new men. I told them, 'You see that? Well, that's 'Eleven Fingers, and I'm telling you right now, boys, take a good look at him, and don't forget who he is.'"

"A few days later I ran across him again. He came up to me and said, 'I'm getting dropped because I'm eleven fingers. I'll fix that.'"

COOK OF SCHOONER HERE IS MISSING

Alexander McLean Was Last Seen at 1 O'clock This Morning. The police were notified this morning by the captain of the schooner Ellen Little that Alexander McLean, cook on the schooner, was missing. He was spoken to by a member of the crew at 1 o'clock this morning in Prince William street. At that time he did not have his coat or hat with him. He is 48 years of age and his home is at the Pettigill wharf. Some fears were expressed that the man may have fallen into the harbor while returning to his vessel.

SAINT JOHN HARDWARE HOUSE SHOWS HOW TO LIGHT FIRES WITHOUT PAPER OR KINDLING; HOW TO REDUCE LABOR AND HOW TO BEAUTIFY HOME AT LOW COST

Well Arranged Booth of W. H. Thorne & Co., Ltd., of Great Interest to Exhibition Visitors—One of Largest Hardware Organizations in Maritime Provinces.

In a fine sixty feet booth, lighted by nearly one hundred electric lamps, the old established hardware and sporting goods house of W. H. Thorne & Co., Ltd., King and Prince William street, is showing to Exhibition visitors that life can be made worth living, "work" taken out of housework and any home made comfortable.

Their attractive booth, representative of the Thorne department store, shows on a small scale what may be accomplished in the home. It is complete with the King and Prince William street building. Divided into three sections, the booth shows the housewife in both city and country turn towards labor saving electric appliances, their first cost being so reasonable and their upkeep almost negligible. Forecasting this new trend of thought, W. H. Thorne & Co., Ltd., were one of the first organizations in this part of the country to meet the growing electrical department needs of the housewife in both city and country turn towards labor saving electric appliances, their first cost being so reasonable and their upkeep almost negligible.

ELECTRICAL APPLIANCES

In these days of cheap electricity it is not to be wondered at that the thoughts of the housewife in both city and country turn towards labor saving electric appliances, their first cost being so reasonable and their upkeep almost negligible. Forecasting this new trend of thought, W. H. Thorne & Co., Ltd., were one of the first organizations in this part of the country to meet the growing electrical department needs of the housewife in both city and country turn towards labor saving electric appliances, their first cost being so reasonable and their upkeep almost negligible.

PAINTS

The recently re-modelled paint department of W. H. Thorne & Co., Ltd., is represented at the Exhibition by a good display of Martin Senour 100 P. Pure Paint, a nicely arranged stock of Alabaster and a good selection of Simms Brushes. Samples of the work done by Canada Paint products is shown, including Sentone, Albs Gloss enamel, Protec Shingle Paint, Auto and Coach Enamels and Wagon Paint.

The Thorne Paint Department is widely of more than passing mention, and is probably one of the best equipped in the Maritime Provinces. Only a short time ago it was completely remodelled in order to meet the requirements of lady shoppers. The glass department was separated from that of paints in order to eliminate the noise and traffic caused by handling and cutting large sheets of glass.

This department, for comfort in shopping, equals that of many other Thorne departments. The floors are polished hardwood, wall fixtures and counters are in polished oak and the decorations are in white enamel. The lighting system is of the best quality, powered through the entire store—high candle-power indirect lamps. Everything required in the paint and varnish line may be obtained from the Thorne paint department, and to any visitor interested in painting or decorating, a trip to this department will be more than worth while.

OTHER DEPARTMENTS

Although the Thorne exhibit gives a very fair idea of what may be seen in three of their great store departments, the other departments are well worth a special visit, and the department heads will be found ready to welcome visitors and show them round. Half an hour in the Thorne store will prove an experience to those unfamiliar with the enormous variety of stock carried, and a visit will be both profitable and entertaining.

NOEL IS INDICTED ON TWO CHARGES

Jersey Proceeds Against Man Accused of Slaying and Kidnapping. Canadian Press. NEWARK, N. J., Sept. 10—Jersey justice is proceeding against Harrison Noel, lawyer's son, and escaped asylum inmate, for kidnaping and murdering a little girl. Noel is charged with the murder of six-year-old Mary Daly, a week ago. He killed the girl to get a car for the abduction. Now the Passaic county grand jury at Paterson is to be asked to indict him for murdering the girl. Actions by two grand juries is necessitated by the different localities of the crime. It is expected that Noel will be arraigned next Wednesday on the Newark indictment, and that sanity proceedings will follow.

WEDDING GIFTS

Canada has a very comprehensive piece of railway legislation to guide its administrators. It is not as complete in some respects as that of the United States but it is fundamentally sound and constitutes probably the greatest legislative achievement of the late Sir Wilfrid Laurier. The work of the tribunal established under the act was never more important than it is today. The personnel should be of the highest. In fact if we consider the magnitude of the question they have daily before them and their effect not only on the commerce of the country but on the future of transportation companies an efficient mode of communication, their members should rank with those of the highest court in the land and should be paid accordingly.

WOULD ENLARGE SCOPE

I would like to see legislation introduced at the appropriate time which would increase the compensation of the members of the commission in order that the best minds in Canada should be procurable and that they should be adequately remunerated for the important duties they must perform. I would like to see the jurisdiction of the commission enlarged even beyond that which it now enjoys and that the legislation under which they operate should declare, as is declared in the United States, that rates must be established having regard to the commercial and industrial interests of Canada, of the transportation interest of the country and the ability of the companies to operate in full vigor and perform satisfactorily their important national functions.

BUSINESS IMPROVING

"I am only re-stating what you already know when I tell you that, judged from traffic returns, business is on the up-grade. Our temporary railway has been similar to that of a man suffering from anaemia. Previous to the war, Canada was absorbing every year a large immigrant population, which was in itself creating a demand for goods, as well as supplying labor. Railways were being extended to provide for the settlement of this incoming population, and cities and industries were expanding in proportionate ratio. Then came the war, with the stoppage of immigration on top of a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood. The great machine of Canada was docked of the red-blooded manpower which formerly was being pumped into it and which helped to keep the wheels turning. Canada had to limp along on its reserve man-power, which was being used to supply a heavy drain of young and adult manhood.
