

FINE WORK OF
LIEUTENANT OF
N. B. BATTALION

With the Canadian Forces, Oct. 17.—(By J. F. B. Livesey, Canadian Press Correspondent)—Better than any general description are the bare records of individual acts of gallantry for bringing home to the reader the true pictures of conditions under which the Canadian corps have waged war since September 27 in this terrible battle of Cambrai.

The following cases, gathered almost haphazardly are entirely typical of the general character of the fighting, which frequently resolved itself into single-handed attacks on the enemy strongholds. Necessarily hundreds and thousands must go unrecorded, equally gallant though they be.

Holding the military medal, being promoted from the ranks, the lieutenant of a New Brunswick battalion personally led an attack in front of Inchy on September 27. The next day near Rallencourt, notwithstanding heavy casualties, he again led the battalion into action, storming his objective. Towards evening the enemy launched very heavy counter-attacks on the brigade front. The brunt of it fell on this battalion, which was formerly a Manitoba unit, and owing to severe casualties the line was temporarily pushed back. After making a personal reconnaissance the lieutenant organized all the elements of the battalion and in co-operation with other units of the brigade counter-attacked and drove the enemy out, re-establishing the line and recovering our wounded lying in front. His gallant personal example inspired the men and contributed largely to the indomitable spirit which, even under trying circumstances, being cheered by his contempt of danger, his initiative and his leadership.

In a night attack by a Quebec regiment on the Marston line a lieutenant who had won his military medal in the ranks, found his platoon held up by machine gun fire from a railway embankment which lay in front of his objective. Realizing that unless silenced the entire advance must be held up he called for two volunteers and attacked. Under continually heavy fire and blinded by fumes the enemy was throwing up, the little party crawled the entire distance. Waiting his chance he ordered bombs to be thrown and rushed the post, killing two of the crew and capturing the third, the remainder falling victims to bombs. Owing to the heat caused by their intense fire he was unable to remove the machine gun, but after putting them out of action, he sent back word that the advance might be resumed.

CORN AND OATS FIRMER.
Chicago, Oct. 18.—Corn prices took an upward swing today, influenced to a considerable extent by current reports that the German U-boats had been called in. Opening prices, which ranged from 8-8 to 11-8 cents higher with November 1.20 to 1.20 1-2, and December 1.16 1-2 were followed by a decided further upturn.

Oats developed firmness with corn. Small dealings suffered to affect values. After opening unchanged to 1.15, the high with November 66 1-8 to 66 1-4, the market continued to ascend.

Provisionary weakness in the hog market. Halls took place, however, when cereals advanced.

IS PTE. F. J. HAMILTON MISSING OR KILLED?
Mr. and Mrs. W. J. Hamilton of this city, who were advised a week ago that their son, Private Frederick J. Hamilton, who went overseas with the 28th Kilties, had been reported missing, received a further shock yesterday when they read his name in the official casualty list issued at Ottawa, under the heading "killed in action."

The private advice to the family from the records office in Ottawa had been only that he was missing with no mention made of his death. Inquiries are being made by the family, through official channels, to ascertain the full particulars.

CATARRH LEADS
TO CONSUMPTION

Catarrh is a much a blood disease as scrofula or rheumatism. It may be relieved, but it cannot be removed by simply local treatment. It causes headache and dizziness, impairs the taste, smell and hearing, affects the voice, deranges the digestion, and breaks down the general health. It weakens the delicate lung tissues and leads to consumption. Hood's Sarsaparilla goes to the seat of the trouble, purifies the blood, and is so successful that it is known as the best remedy for catarrh.

Hood's Sarsaparilla strengthens and tones the whole system. It builds up. Ask your druggist for Hood's, and insist on having it. There is no real substitute.

The New York Supreme Court to obtain possession of \$50,000 in stock of the Goldwyn Pictures Corporation, which she says became hers in part payment for ten weeks' services for which she was to receive \$100,000. NUMBER OF CITY CASES HAS CLIMBED TO 372.
(Continued from page 1)
According to the local physicians, the disease had been apparent in that locality so far back as the hot weather. There had been no pneumonia cases and no deaths. The report was made by Councillor Wm. Jeffrey.

From the parish of Douglas, York county, comes the encouraging report of a clean sheet—no deaths, no influenza and only one pneumonia suspect, but not an influenza type of pneumonia.

Two school teachers in country districts write to Doctor Melvin urging the re-opening of their schools. One teacher started in to argue the matter. Just to show how some parts of the province are getting more than their share of the epidemic a report received from the parish of Canaan, Queens county, states that seventy-five cases of influenza exist there, but there have been no deaths so far. It is a coal mining section.

A Prohibition Sidelight.
A farmer from one of the provincial backwoods districts who arrived on today's noon train was a messenger for drugs and preventive disinfectants. He said that country physicians have run out of supplies in some districts and that isolated communities were now shifting for themselves to combat the influenza. "I am no drinking man at all," said the farmer, "but I am a temperance crank, but I will say that a little alcoholic spirits, such as we have used for years in sweating out colds and stopping worse troubles are very much needed just now."

When asked why he did not get a doctor's prescription for some liquor the old gentleman replied: "From what I read in the papers I am afraid I would be locked up in jail if the detectives found me with a flask in my pocket."

In Fredericton, Oct. 16.—The latest estimate of cases of influenza and similar diseases here is 200. In Devon, Maryville and other neighboring places the number probably equals this. Miss Kate Stewart, who has extensive experience as a nurse, has been appointed visiting nurse for Fredericton during the epidemic. Dr. Robertson of Keswick has been secured to attend the people of Stanley and vicinity, who are without a physician.

HALIFAX SHOWS NO IMPROVEMENT.
Halifax, N. S., Oct. 18.—Thirty-three new cases of influenza among the civilian population and fifteen among the military forces stationed here were reported to the city board of health during the last twenty-four hours. There are now 850 cases among the civilians and between 400 and 600 among the military. J. A. Watters, secretary of the health board, said today that the situation locally showed no improvement.

The Montreal Stores.
Montreal, October 18.—Departmental stores, which have been compelled to close at 4 p.m., may now open at 10 a.m. and close at 7 p.m. The 6 o'clock closing created a transportation problem. The Smallpox Situation.

Dr. G. G. Melvin has taken prompt measures with the smallpox situation in Restigouche county. The lumber camp in which the disease has developed has been strictly quarantined with its occupants, and Dr. Doucette put in charge. The camp is over thirty miles into the depths of the forest lands and in itself quite well isolated. Dr. Desmond will have general supervision of this situation. All roads leading to the camp have been conspicuously placarded with warnings and the lumber bosses in charge of the infected places will make a radical cleanup as soon as the patients recover. (Continued on page 12, third column.)
