

For every visitor we have the same treatment, the same courteous attention, whether he buys a suit or simply looks and for every one the same rule—money back if you want it. No red tape, no "hems or haws"—money talks.

Men have certainly proved the advantage of buying at our mid-summer sale. The odd lots of suits, overcoats and waterproof coats have been slipping out in lively fashion at the generous reductions.

A \$15 suit, waterproof coat, or overcoat (plain or silk front) for \$10.50.

Other qualities in these lines at similar reductions.

FOR SALE—Trotting carts, road wagons, latest designs; delivery wagons, family carriages; sloven wagons, cheap farm horse, harness, Edgemoor's, 115 City Road. Phone Main 647.

CHAIN OF GOVERNMENT EMPLOYMENT AGENCIES FROM COAST TO COAST

Calgary Board of Trade Calls on Borden Government For Labor Action

Calgary, Aug. 8.—The Calgary Board of Trade has passed a resolution calling on the government of Canada to establish a system of state-owned employment bureaus from one end of the dominion to the other.

It was further decided to support the resolution by a letter to Premier Borden asking that immediate steps be taken to have this important measure brought before parliament so that a regular chain of offices may be established from coast to coast. It was pointed out that the inauguration of such a system would enable the government to keep in touch with the labor situation all over the country so that men might be informed where they could or could not find work. The supply of workers would be properly regulated and there would be neither a glut nor a shortage.

**ST. MINUTE WORDS**  
OVER THE CABLE LINES

London, Aug. 8.—The House of Lords today attended by only three peers sitting lasted ten minutes. The bill pending the insurance act was given first reading.

London, Aug. 8.—Alderman Sutcliffe, ad of a famous Glimby shipping m, died last night.

London, Aug. 8.—The July statement of the Board of Trade shows an increase of \$1,486,500 in imports, and \$23,880, in exports.

London, Aug. 8.—Premier Asquith could comfort today to Mrs. Millie Fawcett, the president of the National Union of Women's Suffrage Societies and her non-militant colleagues, who urged him to bring in a government measure bestowing the franchise on women.

The premier complimented his visit on their constitutional methods, which he said were "such a welcome contrast to the criminal proceedings" of militant suffragettes. He, however, declared that he had undergone change of heart in the matter and there could be no question of the government undertaking their desire during the present parliament.

#### ATTEMPTS SUICIDE

Hammond Vale Man Said He Was Getting Old and Not Able to Work

(Sussex Record)

Alexander Scott, Hammond Vale, a man of some 65 years of age, attempted suicide on Wednesday morning by taking Paris green.

He was in the employ of McMonagie Bros., at whose place he was when he attempted to take his life. About ten a. m. he arrived at the home of his brother which is nearly a half-mile from the McMonagie farm and told Mrs. Scott that he was sick. She suggested that a doctor be sent for, but he said he did not want one. On his going into the house she noticed Paris green on his whiskers, and asked him if he had taken any. He said he had. To an enquiry as to why he had done so, he replied that he was getting old and not able to work and that he wanted to put an end to himself.

Dr. McAllister, who had been summoned by phone, made a record trip in his auto, and on his arrival did everything in his power to alleviate the sufferings of the unfortunate man, who is still alive, but in a very precarious condition, and little hopes are entertained for his recovery.

#### DEATH OF MISS PLINT SOON AFTER THAT OF CLERGYMAN BROTHER

In the General Public Hospital yesterday Miss Emma Louis A. Plint, daughter of Mr. and Mrs. John Plint, of this city, but lately of Falmouth, Eng., passed away. Miss Plint was fifteen years of age and had been in the hospital for some time.

Her father, Rev. R. J. Plint, of Chipman, took ill with pneumonia on their constitutional methods, which he said were "such a welcome contrast to the criminal proceedings" of militant suffragettes. He, however, declared that he had undergone change of heart in the matter and there could be no question of the government undertaking their desire during the present parliament.

The funeral of Miss Plint will be held from the residence of her parents, ten Garden street, at three o'clock on Sunday.

### COSTS IN SCOTT CASE OUTDONE

#### German Litigation in Which They Total Millions

DISPUTE OVER ESTATE

Spendthrift Son of Wealthy Manufacturer Not Satisfied With Father's Settlement on Him—Costs Mount to More Than \$2,600,000

Berlin, Aug. 8.—The law costs in the Scott will case in London have been more than equalled by those in another inheritance case tried here, that in which "King" Thyssen, an ironfounder, and his son appeared as litigants. Herr Thyssen, who began life in humble circumstances, is now one of the five or six richest men in Germany, and in industry his importance can challenge that of the Kruppas. His son, after incurring heavy debts, was offered certain terms by the father on the condition that these were to settle definitely the share in the father's estate that should devolve to him at death.

The son maintained that the offer was considerably smaller than he was entitled to, and here lay the origin of the law-suit. The son has twice lost the case, and now has appealed. Already, however, the costs of suit and sundry expenditures are to be added to this minimum. It is estimated that the total costs have amounted to very nearly \$2,600,000.

When the case has been disposed of for a third time (which will be the last) costs exacted by the court to the extent of \$400,000 and counsel's fees amounting to \$104,000 will have to be added, making a total outlay of \$2,600,000, estimated at the very lowest possible figure. The basis of reckoning for this exorbitant expenditure is the amount of money in dispute. The amount was \$14,780,000.

There had also been an enormous change among the commercial classes, while the use of alcohol in hospitals and by medical men generally had decreased. The president made an appeal to the

doctors to endeavor to check the consumption of medicated wines, all of which, he said, were mischievous.

Dr. Shirayama of Tokyo, at a meeting of the section devoted to tropical medicine, asserted that students of the disease of beri-beri had been unable to discover the cause of the malady. He had come to the conclusion that if the disease was caused by deficiency of a certain kind of nutrient, there was no reason why it should not occur among other people than those of the Far East.

Dr. W. L. Brandon, of England, declared that beri-beri was due to the use of rice, which had been deprived of its surface layer of cells containing albumin. He recommended that abolition of quarantine for the disease which had been proved non-infectious.

### HON. MACKENZIE KING AND HIS PARENTS

HON. MACKENZIE KING, HIS MOTHER, AND FATHER—MRS. KING'S DAUGHTER, OF THE LATE WM. LYON MACKENZIE.

An interesting picture of Hon. Wm. Lyon Mackenzie King, formerly of the Laurier government, and his father and mother. The latter was a daughter of the late William Lyon Mackenzie King, who fathered the "rebellion" against the "family compact" or the government of 1867, when there was some bloodshed in Upper Canada, as Ontario was known at that time.

### LESS DRINKING IN ENGLAND

Doctors at International Congress Hear of Improved Conditions—A Study of Beri-Beri

London, Aug. 8.—The very remarkable spread of temperance in the British Isles in every rank of society, was recorded by Sir Thomas Barlow, president of the International Medical Congress, in a speech delivered to several hundred doctors at a breakfast given today in their honor, by the National Temperance League, in the Grafton Galleries.

Sir Thomas said a great improvement in this respect had taken place in the army and navy, where the young officers were setting a good example to their men.

There had also been an enormous change among the commercial classes, while the use of alcohol in hospitals and by medical men generally had decreased. The president made an appeal to the

doctors to endeavor to check the consumption of medicated wines, all of which, he said, were mischievous.
