

SAFE FROM TYPHOID

"Fruit-a-lives" the Best Preventative

There is practically no danger of Typhoid Fever as long as you keep the bowels regular with "Fruit-a-lives."

Typhoid is an inflammation of the bowels, due to a germ. This germ enters the body in milk, water or food. If the bowels are constipated, the germ remains in the body long enough to attack the delicate lining and thus Typhoid begins.

"Fruit-a-lives" acts directly on the liver, kidneys and skin, and cleans the system of all impurities. "Fruit-a-lives" will not cure Typhoid—but it will cure Constipation, assist Digestion and tone up the system—thus preventing Typhoid.

50c. a box, 6 for \$2.50, or trial size, 25c. At all dealers, or from Fruit-a-lives, Ltd., Montreal, Ottawa.

OPERATION HER ONLY CHANCE

Was Cured by Lydia E. Pinkham's Vegetable Compound

Lindsay, Ont.—"I think it is no more than right for me to thank Mrs. Pinkham for what her kind advice and Lydia E. Pinkham's Vegetable Compound has done for me."

When I wrote to her some time ago I was a very sick woman, suffering from female troubles. I had inflammation of the female organs, and could not get on my feet. I was confined to my bed and the doctor said I would have to go through an operation, but this I refused to do. A friend advised Lydia E. Pinkham's Vegetable Compound, and now, after using three bottles of it, I feel like a new woman. I most heartily recommend this medicine to all women who suffer with female troubles. I have also taken Lydia E. Pinkham's Liver Pills and they are fine."—Mrs. EMMA STANLEY, Lindsay, Ontario.

We cannot understand why women will take chances with an operation or drag out a sickly half-hearted existence, mistaking the efforts of the doctor for living, without first trying Lydia E. Pinkham's Vegetable Compound.

For thirty years it has been the standard remedy for female ills, and has cured thousands of women who have been troubled with such ills as: displacements, inflammation, ulcers, fibroids, tumors, irregularities, eriodic pains, backache, indigestion, and nervous prostration.

QUEBEC—BEGINNING TO FEEL CRAMPED

Desire to Stretch Out and Take in Ungaiva. But With no Change in Representation Unit

Ottawa, Jan. 29.—The province of Quebec, through the government of Sir Lomer Gouin, has entered the field as an applicant for wider boundaries. The request the Quebec government is practically identical with the one made to the Laurier government when a general re-constituting of boundaries was under consideration some years ago. It was determined that time by resolution of the house of Quebec should not affect the unit of parliamentary representation as determined under the British North America Act. That Quebec asked for, and apparently still anxious to obtain, is an extension include practically the whole of the eastern peninsula of Canada. The goal is that the entire district of Ungava comprising all territory lying between Hudson Bay and Hudson Strait, and the strip of easterly coast now belonging to Newfoundland. The conditions suggested by the province, that the claims of the Indian inhabitants be adjusted by the province, and the extension be without effect upon unit of representation, were not considered by the government.

By aging man is more impressed at a "ring of old boys" than by what he does see than by what he does hear. He has his friends who are none.

MIGHT A BAD COLD.

DEVELOPED BRONCHITIS. E COULD HARDLY SPEAK.

ronchitis begins with a tightness in the chest, difficulty of breathing, and there is a dry, harsh, cough.

A few days more begins to be attacked with white, but later of a pink or yellow color and is occasionally streaked with blood.

are the first symptoms of bronchitis the use of Dr. Wood's Norway Pine Syrup and thus prevent it becoming chronic and perhaps turning to consumption.

Edward Travers, Campbellton, writes—"I thought it my duty to let you know what your careful medicine has done for me. I had a very bad cold which developed into bronchitis. I was so choked up I hardly breathe. I tried many times but they did me no good. I had almost given up in despair, and advised me to try Dr. Wood's Norway Pine Syrup, so I got a bottle and it was completely cured. I can assure you I cannot say too much in its praise, as it is all you claim and more."

Wood's Norway Pine Syrup is in a yellow wrapper, three pine in trade mark, price 50 cents, manufactured only by The T. M. Co., Limited, Toronto, Ont.

EDNA MAY DEVOTEE OF HOME LIFE

MUSIC COMEDY QUEEN FINDS MUCH THAT IS BETTER THAN FOOTLIGHTS GAVE

Miss May, who in private life is the wife of Oscar Lewinson, a millionaire, declares the stage is not in it with her. She has now for the most weaned prima donna before the footlights. What makes her view on this subject particularly interesting at this time is the fact that the former stage favorite has been married to Mr. Lewinson for more than four years.

Miss May was generally credited with being wedded to her art and to about the last person one would imagine as likely to become reconciled to the prosaic career of a married woman of letters. As the wife of Fred Tyson, former champion bicycle rider, she cherished none of the domestic views she now expresses and continued to earn her living in the chorus of Hammerstein's production of "Santa Maria," until the break with hubby came and the course was asked to divorce them. But then she was what Dooley might call "a mere scrub of a girl," and could not have had much luxury at her disposal if she left the stage and depended upon the income of her bicycle man. Now she lives almost regal splendor and is able to gratify every whim.

In this, however, she is no different than Edna May, who in private life is the wife of Oscar Lewinson, a millionaire, declares the stage is not in it with her. She has now for the most weaned prima donna before the footlights. What makes her view on this subject particularly interesting at this time is the fact that the former stage favorite has been married to Mr. Lewinson for more than four years.

THE CHILD IN THE DIVORCE CASE—ROOSEVELT DRIVEN TO THE AUTO—THE OLD SPANISH SWINDLE NEARLY LANDS A VICTIM

(Times Special Correspondence) New York, Jan. 27.—In her repudiation of stage life some of the former admirers of Edna May, the once sprightly diva of musical comedy discern a sly dig at Edith Barrymore, Viola Allen and Margaret Hillington who, after marrying rich men and vowing that they would be happy ever afterward, are now in the hands of the law, returned to the limelight of the footlights.

Miss May, who in private life is the wife of Oscar Lewinson, a millionaire, declares the stage is not in it with her. She has now for the most weaned prima donna before the footlights. What makes her view on this subject particularly interesting at this time is the fact that the former stage favorite has been married to Mr. Lewinson for more than four years.

As a concession to the automobile Colonel Roosevelt has built a broad macadam road from his home on the corner of Sagamore Hill to the public highway below. For generations the Roosevelt family had used a narrow road which wound up the side of the hill through the trees, with several sharp turns. When the automobile was introduced the family learned the mysteries of the machine and operated it himself, except in extremely cold weather.

At a recent demonstration against home rule in Omagh, Ireland, Sir Edward Carson and the Marquis of Hamilton, who are the leaders in the movement, are reviewing the procession from the base of the monument.

KILLS THE DANDRUFF GERM

Stops Falling Hair—Others Imitate and Make Similar Claims, But the Genuine and Original Dandruff Germ Destroyer is Newberr's Herpicide

The discovery of the dandruff germ as the cause of all hair troubles is not a recent event. Prof. Unger gave the germ theory to the world in 1887 and two years later Schabrand by his experiments with a rabbit proved beyond a doubt the actual existence of this germ.

On the heels of this establishment of the germ theory came the discovery of Newberr's Herpicide. This was the first and only remedy for the destruction of the dandruff germ.

There have been other preparations alleged to kill this germ, stop falling hair and itching of the scalp. Newberr's Herpicide really does these things. For this reason it has long been known as the original remedy and the only one that is genuine.

Don't be fooled by preparations which are trading upon the marvelous success of Herpicide. Remember, you take your reason into the bargain and the medicine employed to eradicate it into parting with its valuable success by precipitating a run on it, made its president an avowed enemy of the officers of the company who stood by him in the days of the panic and subsequently were in jeopardy because of their loyalty to him, the retiring president, bought the Corporation Trust Company, so that the boys will not get out in the cold.

For sale by all druggists. Applications at good barber shops. The Herpicide Company, of Detroit, Mich., Dept. B., will send a sample bottle and booklet upon receipt of 10c. in postage. E. Clifton Brown, Special Agent, Waterloo and Union streets.

tended from the start. Thorne says—Judge Gery and H. G. Frick went to Washington and held their famous conference with President Roosevelt resulting in his giving control of the Steel Trust to take over the Tennessee stock of the Trust Company "to relieve the pressure" on it by supplying it with ready cash. The "saving" of the Tennessee stock and the medicine employed to eradicate it into parting with its valuable success by precipitating a run on it, made its president an avowed enemy of the officers of the company who stood by him in the days of the panic and subsequently were in jeopardy because of their loyalty to him, the retiring president, bought the Corporation Trust Company, so that the boys will not get out in the cold.

NO ALUM, NO LIME PHOSPHATE

R.VIVE SHEEP RAISING IN NEW BRUNSWICK

Local Capitalists Have Conference With Dominion Expert

W. T. Rich, dominion government sheep raising expert, met a group of local capitalists and others interested in sheep farming, last evening in the offices of Wm. Thomson & Co. and discussed with them the establishment of sheep ranches in this province along modern lines. The local men will furnish more exact data regarding local conditions and on further investigation Mr. Rich will report more definitely on the amount of profit that could be made on the money invested. It is expected that this movement will be the beginning of a revival of this business in New Brunswick.

Mr. Rich is very enthusiastic about the possibilities of the province for sheep raising. He says that the climatic conditions are ideal for raising the best mutton and the highest quality wool and that the situation gives New Brunswick a unique position for taking advantage of the world's markets. He criticizes the methods that have been in use in this province in the past and insists that the most intelligent care must be devoted to the care of the sheep. With proper handling, he says that it should be the most profitable branch of farming here although requiring very little capital and very little labor.

He criticizes the methods that have been in use in this province in the past and insists that the most intelligent care must be devoted to the care of the sheep. With proper handling, he says that it should be the most profitable branch of farming here although requiring very little capital and very little labor.

Mr. Rich is very enthusiastic about the possibilities of the province for sheep raising. He says that the climatic conditions are ideal for raising the best mutton and the highest quality wool and that the situation gives New Brunswick a unique position for taking advantage of the world's markets. He criticizes the methods that have been in use in this province in the past and insists that the most intelligent care must be devoted to the care of the sheep. With proper handling, he says that it should be the most profitable branch of farming here although requiring very little capital and very little labor.
