## All Streets to be Boulevarded, with Concrete Sidewalks

---

This subdivision will be most attractive not only because of its natural beauty, but on account of its up-to-date modern improvements. All the streets are sixty feet wide, the central twenty-four feet will be as fine a roadway as can be found anywhere, while on either side there will be four feet of concrete sidewalk with gutters and fourteen feet of boulevard. It does not take a very great stretch of imagination to picture what a beautiful subdivision it will be when these improvements are carried out. Sewers and water pipes will be laid at the same time that the streets are made and the owners are now urging the municipality to carry out these improvements at once. It is hoped that before this booklet is issued they will have commenced to cut out the streets.
