BULLETIN No. 407

MOLASSES

OTTAWA, July 16, 1918.

GEO. W. TAYLOR, Esq.,
Assistant Deputy Minister of Inland Revenue.

SIR,—I beg to hand you a report upon Molasses. The work reported, covering 165 samples, must be regarded as complementary to that detailed in Bulletin No. 312 (April, 1915) and is intended to furnish a basis for standardization of the article.

The excellent summing up of this work, written by Mr. L. E. Johnson of this staff, who was placed in charge of the investigation, makes it unnecessary for me to do more than recommend its publication in extenso.

The results now furnished together with those reported in Bulletin No. 312, will, I trust, be found to establish a basis for the standardization of Molasses.

I beg to recommend publication as Bulletin No. 407.

I have the honour to be, Sir,
Your obedient servant,

A. MCGILL,
Chief Analyst.

“ Dr. A. MCGILL,
Chief Analyst.

DEAR SIR,—I beg to report, herewith, analyses of molasses collected during October, 1917. In all, one hundred and sixty-five (165) samples were examined as follows:

At Halifax sub-laboratory.....	20 samples
“ Winnipeg sub-laboratory.....	36 “
“ Vancouver “ “	12 “
“ Ottawa “ “	97 “
	165
