

Use a Watch as a Compass

Point the hour hand to the sun and the south is exactly half way between it and the figure XII. For instance, suppose the time is 4 o'clock, p. m., point the hand indicating 4 to the sun, and II on the Watch is exactly south, the other points are then easily seen.

WE RECEIVED a lot of pretty
Pocket Watches for the boys and girls
which they can prove the
best, good timekeepers and cheap.
