THE FARRINGTON CREAM RIPENER

A careful study of all conditions clearly demonstrates that proper methods of cream ripening more closely affects the quality of the butter than any other portion of the process.

Causes of Poor Body. One of the principal causes of poor body in butter is the custom which many buttermakers have of allowing their cream to remain standing for some time after being skimmed before cooling. When this is done there is a tendency to melt the butter fat and no amount of cooling later will secure the desired body. This difficulty is entirely overcome with the Farrington Ripener, for the cream can be placed in the machine as fast as skimmed and cooled at once.

Uniform Ripening Increases Yield.

Increased Yield Represents Increased Profits.

About Uniformity. It is an impossibility for any creamery not using a cream ripener to have their make of butter absolutely uniform under all conditions. With the Farrington Ripener the contents is always under the control of the buttermaker and absolute uniformity can be secured. The cream can always be cooled and held at the same temperature each day, the same amount of starter added and held the same length of time. Where an open cream vat is used the buttermaker is always at the mercy of the weather. Buttermaking experts all agree that the improvements in process to be looked for in the near future are along the cream ripening line. If you have failed of producing a uniform high grade of butter in your creamery, investigate carefully the conditions governing the care of your cream from the time it left the separator until it was churned, and you will undoubtedly locate the cause of your trouble. Write for descriptive circular of the Farrington Ripener.

CREAMERY PACKAGE MFG. CO

Cowansville, Que.

General Agents for Alpha-DeLaval Separators.

Boilers and Engines, Australian Boxes, Refrigerating Machines, Flgin Style White Ash Tubs, Hansen's Butter and Cheese Color and Rennet Extracts, Wells, Richardson & Co.'s Improved Butter Color, Spruce Tubs, Stearns's Style Spruce Tubs, Victor Combined Churn and Worker, Ideal Skim Milk Weigher.

Provan's Patent REVERSIBLE

Carriers, Fork and Slings

For Round Iron, Wood, or Angle Steel Tracks

Have now become a Standard of Excellence with the Farmers of Canada and the United States. At the World's Fair, Chicago, 1893, the only medal and Diploma given on Hay Carriers, Forks and Slings, was awarded to us on these Implements. Following is a copy of the Judges AWARD: "For open trip hook to receive the sling; automatic clutch, adjustable for size of load desired; ingenious design of stop block, which enables perfect control of carriage; no springs required for locking car which has motion in all directions; compact form of fork which can be tripped in any position; the car is reversible and of double action; for novelty, ingenuity and usefulness, excellence of material and construction." Manufactured by

James W. Provan, Oshawa, Ont., Canada.
Special Discount for Cash. Correspondence Solicited.
