Builders' Exchanges in Convention.

There was held in Washington during the past week the annual convention of the National Association of Builders' Exchanges. Representatives of many of the contractors' and builders' organizations in the United States and Canada met together for discussion of matters relating to the building interests.

Magnets for Handling Glass.

It has been proposed to use electro-magnets for lifting and handling large panes of glass. This is accomplished by placing a piece of sheet iron under the glass, and applying one or more electro-magnets on the upper face of the glass. The electro-magnets attract the sheet iron, and thereby hold the glass suspended while moving.
