We give here a description of the points of interest to you, that together make possible our claim of the best Farm Gate on the market. We use the best steel tubing that money will buy. The filling consists of a heavy No. 9 Galvanized Wire. Each wire, both upright and line wires, is wrapped twice around the frame, making the most secure fastening of filling possible. The special and distinct feature is our method of bracing. Two braces to each gate. Each brace consists of two pieces of heavy angle iron, bolted together over the filling and forged around the frame at both the top and bottom. There is no other gate on the market with a brace that braces both the filling and

the frame. It would seem impossible for a factory to sell a gate of this description for the price we ask. It would be impossible for us to do so if we used old-fashioned business methods, but with our enormous capacity and our low cost of selling by our Direct-from-factory-to-farm method, we are in a position to do so. Our small profit, as you will see, is based on a very large volume of business, and it is necessary for us to sell enormous quantities of these gates to continue to sell them at the prices we quote. We cannot guarantee this offer for any length of time. Send us your order to-day at this SPECIAL PRICE OFFER. Remit by Post Office Order, Money Order or Draft.
