A Visible Planter

Operator sees all planting
operations. He sits be-
hind and not in front

HOOVER PLANTER

Accuracy is Assured

The Only 99% (ninety-nine
per cent.) Perfect
Planter

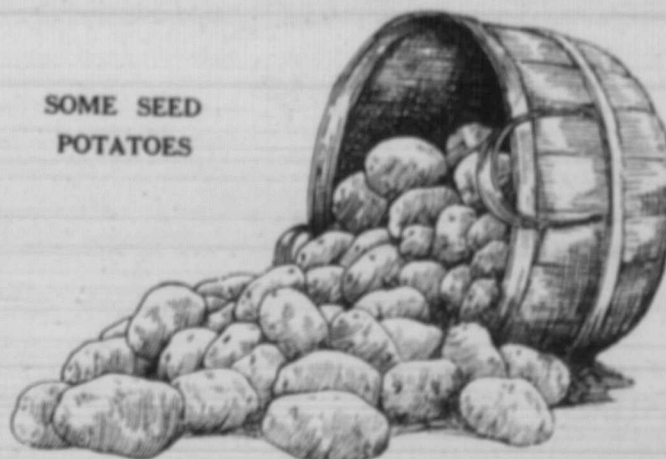

Concave tired wheels. Both
wheels drive.

Equipped with roller bear-
ings.

Disc Coverers and Hillers.

We believe it is as honestly
built as the John Deere Plow
or we would not sell it.

SOME SEED
POTATOES

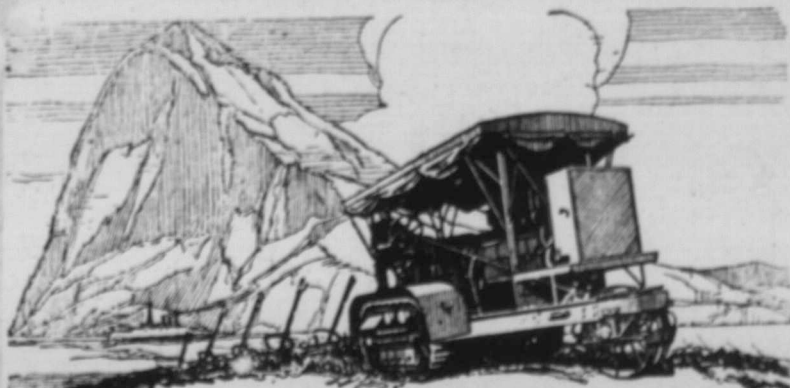

Give nature a chance. The
Hoover Planter means Pota-
toe assurance to YOU.

See your dealer and place
your order early. If he does
not handle the Hoover Plan-
ter write us direct.

Why pay a fancy price for high class seed potatoes like these and take a chance on planting them with a low grade
planter. It is dangerous. Buy a Hoover and be safe.

A GIBRALTAR for STRENGTH

Long experience in machinery manu-
facture—careful selection of best
wearing materials—right design and
solid construction have made the "Cater-
pillar" 75 Tractor a Gibraltar for
strength.

It is built to stand the most severe
service—from its powerful, reliable
four-cylinder motor to its simple,
long-wearing, efficient "Caterpillar"
track. And because of its track, it is
able to do work that can be per-
formed by no other kind of tractive
power. The superiority of the "Cater-
pillar" 75 Tractor has made it the first
choice, not only for the work of the
farm, but also for military needs. In-
vestigate this tractor—write today for
full information.

The HUNgry Gophers Spring Drive

They charge by thousands and thousands; hoping to ravage the
tender wheat, and satisfy their greed at the expense of the farmer.
But, when they meet the Allied defense of grain, poisoned with

"GOPHERCIDE"

their drive is checked—their massed attack is shattered—and the
wheat fields of the west are dotted with their dead.

"Gophercide" is a perfect solution of strychnine, which entirely
dissolves in warm water without the aid of acids or vinegar; and is so
disguised that gophers smack their lips over it, and it curls them up.

Don't take chances this year. Get "Gophercide" right now—soak
the wheat in it, and sprinkle the poisoned grain about the holes of the
gophers. It will save your wheat crop. Your druggist or general store
has it, or will get it for you.
