ROSSLAND, B. C., THURSDAY, OCTOBER 29, 1903

Eighth Year, Number 52

IMPORTANT TO MINES

Developments of Week of Special Interest Here.

Details of Operations at Local Mines and Mills.

The past week has been fraught with interest in the Rossland camp...

The foregoing intelligence is the most important and interesting...

At the White Bear mine considerable advances were made in connection with the new headwork casing...

The Kootenay mine did not secure a fair start in the shipping line...

Shipments from the Rossland camp for the week ending October 24th and for the year to date are as follows:

Table with columns: Week, Year, Le Roi, Centre Star, War Eagle, Le Roi No. 2, Jumbo, Spitzee, I. X. L. (milled), Kootenay, Iron Horse, Velvet, White Bear, O. K., Homestake.

Totals... \$760 325,114

AMONG THE MINES.

LE ROI.—The past week has witnessed no departure in the working plans of the mine.

JOSIE.—The Le Roi Two company is practically confining its mining operations to the Josie mine.

SPITZEE.—Sinking has now been started in the men in a contract was let during the week for the work.

WAR EAGLE.—The events of the week have produced no feature of special interest so far as the contract stopping has been under way practically on all levels down to and including the 700, while development has been continued at greater depth with satisfactory results.

CENTRE STAR.—Continued operations along conventional lines are reported from the mine for the week.

KOOTENAY.—The mine is now shipping regularly, the ore for reduction being drawn from the fourth, fifth and intermediate levels.

THE BEST INVESTMENT IN ROSSLAND—AN ADVERTISEMENT IN THE ROSSLAND MINER.

JUMBO.—The stopping on the first level has been continued as usual. The principal feature of the development work under way is the winze from the No. 1 on the ore body.

WHITE BEAR.—The week has seen no alteration in the working plans. The mine work is practically confined to the drift at the 1000 level.

I. X. L.—The O. K. mill was operated steadily under the Craven lease, and the results were satisfactory.

GIANT.—The management has not as yet put into effect its plans for increased activity at the property.

BOUNDARY SHIPMENTS. Shipments from Boundary mines last week and for the year to date are as follows:

Table with columns: Week, Total, Granby, Mother Lode, Snowshoe, B. C., Emma, Sunset, Ore Denoro, Morrison, Athelstan, Winnipeg, Providence, Elkhorn.

Totals... 18,368 518,054

\$1700 IN GOOD GOLD

EXCELLENT RETURNS FROM I. X. L. CLEAN-UP ON SUNDAY.

ABOUT THE OPERATIONS AT THE MINE UNDER CRAVEN LEASE.

Slightly over one hundred ounces of gold valued at \$17 per ounce was the outcome of Sunday's clean-up at the I. X. L. mine.

The conditions at the I. X. L. in respect to the present operations have attracted much interest among Rosslanders.

The amalgam taken off the plates during the two weeks previous to the clean-up was retorted on Sunday at the O. K. mill.

The separation of the bullion and mercury, the former was taken to the blacksmith and melted into a brick.

The amalgam taken off the plates during the two weeks previous to the clean-up was retorted on Sunday at the O. K. mill.

General News Of the Kootenay

EAST KOOTENAY.

The Cranbrook Herald is informed by reliable parties that the Sullivan company will not do anything on their smelter until next spring.

The nickel ore discovered by Jack Mean and Frank Douoran has proven to contain good values in gold and nickel.

Harry Melton, Richard Helme and J. Johnson have located a group of six claims on Baker mountain.

A new lumber company has been formed at Mayook siding, just below Fort Steele Junction.

One of the most promising mineral claims in this section is the Glenore, near Three Forks.

The total amount of ore shipped from the Slocan and Slocan City mining divisions for the year 1902 was approximately 30,000 tons.

A daring hold-up occurred near the coke ovens at Morrissey.

T. T. McVittie, P. L. S., of Fort Steele, has secured the contract for surveying the Bull river iron mines.

Chris. Tobiasen is negotiating the sale of his Senator claim in Summit camp.

George Arthur Rendell, of the Eholt Trading company, returned home after taking some samples of Waterloo ore to the Hall Mines smelter.

The Kootenay Consolidated company has finished its assessments on six of the Duncan river claims.

A party of men arrived in camp on Thursday to work on the Hunter V. tramway.

The Fisher Maiden has 16 inches of solid ore in the upraise from the lower tunnel.

Five tons of ore is being packed down from the Nanstog group on Lemon creek.

The Ruth shipped 102 tons last week. Under the contract lately taken by Frank Malcolm to mine the ore the property is producing much heavier than previously.

If the litigation covering the water rights question between J. M. Harris and the Slocan Star were settled, that mine would employ 150 men this winter.

The long delayed magnetic separator for the Payne zinc plant arrived last week.

THE STOCK MARKET

Business on the local exchange has kept at a low point for the week.

ARE LE ROI DIRECTORS. Messrs. Waterloo and McMillan Concluding British Columbia Visit.

George S. Waterloo left yesterday for the Boundary and will leave Phoenix in the course of a few days for England.

Waterloo is a director of the Le Roi and deputy chairman of the Snowshoe and Copper Mines.

Mr. McMillan, who is managing director of the Le Roi, Mr. Waterloo spent some days looking into the company's affairs here and at Northport.

The fact that lower grade ore can now be treated profitably and other reasons lead Mr. Waterloo to the conclusion that the outlook for the Rossland camp is brighter than for some time past.

From the standpoint of one interested in politics here and in the Old Country Mr. Waterloo does not hesitate to say that it is desirable that any government in British Columbia should be backed by a strong majority in the council.

He is a strong supporter of Hon. Joseph Chamberlain's recently announced policy, and believes it will ultimately meet with success.

Mr. McMillan will spend a few days here on concluding his Boundary business and then leaves for London.

NUNCIO AT PARIS. Receives Instructions from the Pope at a Private Audience.

ROME, Oct. 27.—The pope has received Monsignor Lorenzelli, nuncio at Paris, in private audience.

He gave him lengthy instructions on his attitude regarding the French campaign against the religious congregations, and also as to the policy he should follow in the matter of President Loubet's projected visit to Rome.

THOMPSON SUSPENDED. WASHINGTON, Oct. 27.—Secretary Hitchcock today ordered the suspension of Asa R. Thompson, receiver of public moneys at the public land office at La Grange, Ore., who was indicted yesterday for bribery.

"And there will be others," said Mr. Hitchcock, "whenever similar circumstances are discovered." He declined to say more concerning the reputed land frauds.

SUING FOR COMMISSION. BOSTON, Mass., Oct. 27.—To recover \$50,000 for work as agent in bringing about the sale of the Canada, Atlantic and Plant S. S. Imperial, Frank J. Kimball of New York today began suit in the supreme court against Alfred S. Hayes, A. W. Perry and F. J. Daggett, the purchasers of the steamship line.

GENERAL ARBITRATION. A New Haven Man's Views of the Boundary Case.

NEW HAVEN, Conn., Oct. 27.—Thos. Berkeley, a member of the Institute of International Law, and formerly of the Chamber of Commerce, gave an address before the Yale law school today on the subject of a general arbitration treaty between the United States and Great Britain.

He saw progress to this end in the settlement of the Alaska boundary dispute, and after the presidential election he hoped for a treaty between Great Britain and the United States, with possibly France included.

STOCKS IN NEW YORK. NEW YORK, Oct. 27.—Amalgamated Copper 35 1/2, Canadian Pacific 118 1/2.

It is reported there is the owners have a bonanza. J. Philbert, late proprietor of the McLeod hotel, has purchased the interest of A. Hoyt in the Ymlr butcher's shop, and will maintain the reputation of the establishment.

Mr. Hoyt's many friends in the camp regret the severance of his business connection, and wish him success wherever he locates.

Business on the local exchange has kept at a low point for the week.

MORE ELMORE ORE MILLS

Two Companies Figuring on Oil Plants Now.

Evolution of Important Factor in Camp's Future.

That Rossland is to have at least one more concentrator on the Elmore oil process, and probably two, is now practically assured.

The prospect of this activity opens a vista of prosperity that must gratify the Rosslanders who have stuck to the camp through its bright and dark days with unswerving faith in its ultimate future.

A Stanley Elmore was seen yesterday by a representative of The Miner and asked as to the probability of further Elmore plants going in at an early date.

Two mines were suggested as having the subject under consideration. Mr. Elmore replied that both mines had been in negotiation with the Canadian Ore Concentration company, and one—the most important—had reached the stage where he believed a final settlement of the arrangements was only a matter of detail.

Just at the moment he could not divulge the name of the company, but expected to do so prior to his departure from the camp a week or ten days hence.

This plant would be on a large scale. The second mine mentioned had been negotiating with the company for some months, and the results secured at the Le Roi Two works were expected to turn the scale without further delay.

In event of various companies concluding to adopt concentration it may be expected that actual construction work will be postponed until next spring.

During the winter the machinery required would be ordered, and if expedition is used the plant should be ready for delivery about the juncture when building would be sufficiently far advanced to receive the machinery.

The ultimate outcome would be the same as though construction were started during the winter, owing to the time required to build machinery when manufacturing are pressed with orders.

It is now taken as a matter of course, in view of the statements emanating from Alexander Hill, consulting engineer, that the Le Roi Two company will proceed with extensive enlargements of their Elmore works next summer.

This will practically make a new mill out of the plant. The Rossland Power company's plant will also be in full operation by that time, and only two new concentrators are started the city will have four concentrators by next summer.

The activity thus to be developed will reach wide proportions. As a starter the mines will naturally proceed to treat the dumps that have been collected from year to year in the past.

The supply of material thus available will only last for a limited period, and thereafter the milling ore will be stopped. Increased crews of miners will be required for these operations, and another important feature is that the development of the low grade ore bodies is likely to reveal increased areas of higher grade ores.

The latter has been a feature of such operations in all camps.

The outlook for increased activity in the Rossland camp is brighter today than it has been for a considerable period.

POPLAR ORE. Samples from the Home Run Showing Free Gold.

J. L. Whitney yesterday received a small sack of samples from the Home Run on Poplar creek, which contains considerable free gold and a great deal of red oxide from which gold could be panned.

Mr. Williams, who is in charge of the development work on the Home Run, sent word down by Mr. Agnew that a vein 11 feet in width had been uncovered. This is an entirely new vein and is a valuable addition to the several veins which have already been uncovered of the property.

The company which owns the Home Run has made application for 300 inches of water from Poplar creek.

The people of Poplar in view of the numerous ledges and the richness of the ore, regard the Home Run as one of the valuable properties of the camp. It is located between the Lucky Jack and the Swede group.

PRESIDENT'S BIRTHDAY. WASHINGTON, Oct. 27.—President Roosevelt today celebrated the 45th anniversary of his birthday. Many telegrams and letters of congratulation were received by him.

WORKMEN KILLED. Fatalities Caused by the Fall of a Crane.

URG., Oct. 20.—Nine men and two are missing and four were hurt by the collapse of a crane on the Pittsburg and Wabash railroad bridge.

At the White Bear mine considerable advances were made in connection with the new headwork casing.

Shipments from the Rossland camp for the week ending October 24th and for the year to date are as follows:

Table with columns: Week, Year, Le Roi, Centre Star, War Eagle, Le Roi No. 2, Jumbo, Spitzee, I. X. L. (milled), Kootenay, Iron Horse, Velvet, White Bear, O. K., Homestake.
