**Which is Your Choice?**

*Sloppy, leaky wooden troughs,  
or clean, durable Concrete?*

Wooden drinking troughs are about  
as reliable as the weather.

They are short-lived and require re-  
placing every few years—not to mention  
continual patching to keep them in repair.

The best of wood cannot withstand,  
for long, constant dampness and soaking.  
Its tendency to rapid decay soon shows  
itself in leaks and stagnant pools of  
water around trough.

Contrast with this the durability,  
cleanliness and well-ordered appearance  
of Concrete.

**Which?**

The dampness which destroys lumber  
only intensifies the strength and hardness  
of Concrete.

You can impair a wooden trough with  
comparatively little use; but it takes a  
powerful explosive to put a Concrete water  
tank out of business.

**Which**  
is your choice—expense-producing Wood,  
or money-saving Concrete?

We'd be glad to send a copy of our  
book, "What the Farmer Can Do With  
Concrete,"—Free—if you'll ask for it.  
It tells the many uses of Concrete in plain,  
simple language—tells how to make

Dairies	Horse Blocks	Stalls
Dipping Tanks	Houses	Steps

**Cause and Cure of Headache**

The cause of headache as you know,  
is the stoppage of the circulation result-  
ing in pressure on the delicate nerves of  
the head. In time nature will start the  
blood going again, but meanwhile we suffer  
and are unfit for duty.

Assisted by two ZUTOO Tablets,  
which by the way are as harmless as the  
soda they contain, nature will remove  
the pressure and stop the headache in  
twenty minutes. Why continue to suffer?  
Why be unfit?

It is really remarkable how many  
people now use ZUTOO to cure their  
headaches. Do you? If not, why not?
