This precaution'is considered necession sary in order to avoid disaster in case the small parties of troops should col-lide with the Spaniards in force, but not a single skirmish has occurred. The Ubans under Gen. Custilio are doing commendable work as advance pickets. They are thrown out day and night from half a mile to a mile in advance of the United States pickets, along the front and flanks, thus form-ing a double cordon about the army. There are now more than 13,000 men at the front. Drinking water for the the roops at the front is obtained from Rio Guama, a stream full of springs running direct from the mountains. The water is remarkably good, and is now carefully guarded from pollution. The Cubans and American solities bated in it at first, but strict orders have been issued against such prac-tices in the future, and sentifiels have been placed to enforce the orders strict orders have also been issue against eating the great varieties of tropical fruits, the only exception be-started on board one or two transports. Montreal, June 30.-Fallure in love was the ultimate cause of the death of James Edwin Hughes, of No. 60 Menai street, Point St. Charles, whose body was found floating in the Lachine Canal, alove Seigneur street bridge, yesterday. This was brought out at the inquest, which was held at the morgue this morn-ing. Mrs. Hughes stated that her son had fallen in love with a young girl in the neighborhood, but he was not successful and tock it very badly. On the Monday before he died he drew the last of his savings out of the bank and gave his mother a por-tion of it, at the same time telling her that he felt there was a terrible fate before him. From then until Friday he wandreed around, fre-quently saying, "I am going," but when asked where he was going he would become silent. The jury re-turned a verdiet of suicide in a state of despondency. COMPLAINT.
