The Crisis at Home.

It would appear that a compromise has been made between Premier Asquith and his Radical supporters and Labour allies. Although the estimates foreshadow big expenditures for the year on the Navy and other services, supply is being asked for only six weeks with the clear intent and avowed purpose of tying up the administration of public affairs, if the House of Lords is not amenable to the pressure which will be exercised to induce them to agree to the annihilation of the power lately used against the Finance Bill, and to a marked curtailment in their power of blocking indefinitely legislation unconnected with finance, but which is objectionable to its members. It cannot be disguised also that the course outlined is meant to coerce the Crown into co-operating with the Ministry in curtailing the powers of the House of Lords. Although there are 125 of a majority in favor of doing something with the House of Lords, there is no unanimity amongst them on any definite plan. Moreover, as this is a grave and radical constitutional change, it should be submitted to the electors to find out whether they endorse the Asquith Cabinet scheme or the Tory Balfour-Rosebery plan. Certain it is, the Lords will insist on going to the country on the Government's plan, and if the electorate pronounces in favour of the Government scheme, and sends back Asquith with a decisive majority, and Asquith refuses to continue in office without Royal guarantees of co-operation to curb the House of Lords, the majority in the House of Commons have an effective weapon in their control over the purse strings to insure the successful carriage of their scheme to a successful issue. Probably before that stage is reached the Lords will submit.

"Constipation For Three Years."

Had Dizziness, Bad Breath, Headaches, Bad Color, Poor Appetite. Dr. Hamilton's Pills Cured Quickly

Those who doubt if constipation and chronic stomach trouble can be cured, need only read the striking testimony of Mrs. B. C. Curran, of Westport, to know that even if all else had failed, certain cure attends the use of Dr. Hamilton's Pills.

"For full three years I have suffered the torture of biliousness, constipation and stomach disorders. I had terrible pains in my head. My appetite faded away and when I did eat anything it disagreed and made me very sick for hours after each meal. The active pains in my stomach and the dizzy headaches I had to endure almost set me wild. Some times attacks came on so severely that I had to go to bed. I would feel so worn, depressed and utterly miserable that for hours I wouldn't speak to my family. My system was poisoned with wastes and nothing helped me till I used Dr. Hamilton's Pills. Without this grand system-cleaning remedy I would still be sick, but each day brought me better health and spirits. I was cured and made as strong, ruddy and healthy looking as one could wish, and will always use and recommend Dr. Hamilton's Pills.

Thousands who are in an ailing, low state of health need nothing else but Dr. Hamilton's Pills. They cure blood disorders, pimples, rashes, bad color, biliousness, liver, stomach and kidney troubles. Mild, certain and safe. Beware of imitation and substitutes, 25c. per box or five boxes for \$1.00, at all dealers or The Catarhozone Company Kingston, Ont.

Man in Bad State.

By the shore train last night there arrived a man named Patrick Fulford to go to the General Hospital. He belongs to Boat Harbour, P.E., and was accompanied by a man named Peter Moores with whom he has lived. He is an old man, and in January his right leg became swollen, then became very sore and since mortification had set in. He was lifted from the train in a quilt last night, and kept in the station until the ambulance, which Inspector Collins telephoned for, came and took him to Hospital. It is likely the limb will be amputated.

THE HEART A GREAT WORKER. What a wonder is the heart. Day and night it works away pumping tons of blood through the body and is supplied with rich, red blood such as is formed by Dr. Chase's Nerve Food. While sending supplies of nutrition to other parts of the body the heart renews and rebuilds its own wasted cells and so retains health and strength.

The Venango is due here from Liverpool on Friday, and after discharging at Halifax will return here to take cargo for Liverpool.

PROOF THAT NONE CAN DOUBT.

That Dodd's Kidney Pills Always Cure Rheumatism.

Conclusive Evidence Given by Durham Brown, of Brantford, Ont.—How and Why the Cure is Effectuated.

Brantford, Ont., Mar. 11.—(Special)—That Rheumatism is caused by diseased Kidneys and that Dodd's Kidney Pills cure both the sick Kidneys and the Rheumatism is again proved in the case of Mr. Durham Brown, of No. 2 Spring Street, this city.

"I was troubled with Backache and other well-known symptoms of Kidney Disease," Mr. Brown states. "I also suffered from Rheumatism in my right side and hip to the extent that I was always while at my work in agonizing pain.

"After taking one box of Dodd's Kidney Pills I found an improvement and after taking six boxes I found both my Kidney Disease and Rheumatism entirely cured."

Mr. Brown is only one of many cases in which it has been proved beyond a doubt that the natural way to cure Rheumatism is to remove the cause. The cause of Rheumatism is uric acid in the blood which crystallizes at the muscles and joints. Well Kidneys strain the uric acid out of the blood. Dodd's Kidney Pills make well Kidneys. That's why Dodd's Kidney Pills always cure Rheumatism.

Visiting Football team.

MR. ARYE OBJECTS.

Editor Evening Telegram.
Dear Sir,—I have noticed lately the papers making references to the bringing here of a football team from the Old Country, and suggesting that the Football League pay its expenses amounting to about two thousand dollars. Surely this must be a joke, and a proposal that would not be entertained by the League for one moment. If it is intended seriously then I think the League delegates should put their foot down on it at once and forever.

It has taken years to accumulate the two or three thousand dollars which to-day lie in the bank to the credit of the League, and I think it would be nothing short of criminal if the past eleven years should be squandered in such a manner. What good would it do, and who would derive any benefit from it? The players to-day will be probably not playing in two or three years time and so that will not permanently advantage the game very much. At the inception of the League I proposed that any funds over running expenses should be devoted to the orphanages. The suggestion was not adopted.

However, I managed to inaugurate games for the benefit of the orphanages, and later the League continued games for the same object. I believe, at one time, the orphanages got as much as three hundred dollars a year. The Charity matches, as I regret to say they were called, were discontinued, but I believe the League made up an amount another way.

Now, sir, if two thousand dollars are taken to finance a football club to come here what does it mean? It means that we are throwing away a sum of money which if safely invested at 6 per cent. would turn in \$200.00 a year for ever, or in other words each of the orphanages would receive \$40.00 a year for all the rest of time.

If the suggestion to give the amount to the orphanages does not meet with approval, then why not the League devote this \$2,000 to the beautifying of the Parade Ground, or something of permanent advantage to the city.

There are too many needy institutions in this city and country to-day deserving financial support for the League, to think of throwing money away on such a worthless object. I hope the League will throw out such a suggestion if it is ever brought before it.

Yours truly,
GEO. W. B. ARYE.

Schr. Beatrice Here.

The schr. Beatrice arrived here yesterday evening, 7 days from Belleoram, with a cargo of fish for Harvey & Co. She left there on the 4th and had fine weather generally with the exception of a few squalls. She met some slob ice Monday and this delayed her a while, but otherwise the run was a fair one.

An Urruly Crowd.

A crowd of cubs hang around the corner of Alexander and Water Sts. nightly and annoy people of the place and passing pedestrians. Last night Const. McGrath was after them, but they evaded him by running through alleyways. If they do not quit the place the police will corral the whole gang.

Hooted From the Stock Exchange.

Special to Evening Telegram.
LONDON, March 11.

A hostile demonstration on the floor of the Cotton Exchange at Manchester, and one directly in contrast with it for friendliness on the corn exchange at Liverpool, was met with to-day by Jas. A. Patton, the Chicago wheat and cotton operator. In the first Mr. Patton was mobbed and escaped injury only by being rescued by the police; in the latter he was greeted with cheering. Mr. Patton will sail to-morrow on the Mauretania. It was known by Mr. Patton that there had been threats of an unpleasant reception should he visit the Cottonopolis, but he refused to believe they would be carried into effect. These threats it is said came from person in the Exchange who had lost large sums as a result of Mr. Patton's operations in Chicago, and from others who held him responsible for yesterday's rise in cotton, and believed that his visit to England had for its purpose the manipulation of the market. Hardly had Mr. Patton reached the floor of the Manchester Exchange before the outburst came. He was hooted and jeered by the throng and surrounded and hustled to the street. The crowd followed even here and did not desist in its demonstration of dislike until the American had been placed in a cab by the Police and started for the railway station.

Meantime Mr. Peary is between the devil and the deep sea, his enemies say and his friends admit, as a result of a recent meeting of the sub-committee of the House Committee on Naval Affairs, which is considering the proposition of rewarding him for his Arctic explorations. Mr. Peary's friends, acting for him, flatly refuse to submit his proofs to the sub-committee. Prof. Gannett of the Geological Survey, a member of the board of the National Geographic Society, which officially decided that Peary reached the Pole, declared that he had Peary's authority for refusing to permit the sub-committee to retain his data.

Although Representative Alexander of New York, a classmate of the explorer at Bowdoin College and his warmest admirer and defender in the House, took issue with the statement and said that Peary wanted the sub-committee to inspect his records he declined to take the responsibility of leaving them at the Capitol.

International Chess.

Special to Evening Telegram.
NEW YORK, March 11.

The twelfth annual cable chess match between representatives of Great Britain and the United States started to-day, the Americans playing in the rooms of the Brooklyn Chess Club and the British experts playing in the rooms of the City of London Chess Club, in the Hotel Savoy, London. The match will terminate to-morrow evening. On each day the play begins at 10 a.m. and continues until 6 p.m., with an intermission between one and two o'clock for luncheon. Two direct cable wires connected the Brooklyn and London rooms. While the contestants were seated at the ten tables the spectators observed the plays and the progress of the matches from ten large chess boards in the walls on which were indicated every move made by the players.

Earthquake Shocks.

Special to Evening Telegram.
SAN FRANCISCO, March 11.

A sharp earthquake in some parts of the State, the severest shock since the big one of 1906, was experienced throughout the central part of California last night. The vibrations were long and undulations but slow. The duration was from one to four seconds. The shock was felt as far south as San Luis, but did not extend north of San Francisco. No damage was reported. In San Francisco people were generally aroused. In the telegraph offices nearly every operator left his key. This caused a report that some of the wires were interrupted.

ERIK ARRIVES.—The S. S. Erik arrived at Pool's Island at 5 o'clock yesterday afternoon, having cut through 15 miles of rather heavy ice. Everything O.K.

BUILT A MONUMENT

The Best Sort in the World.

"A monument built by and from Postum," is the way an ill man describes himself. He says: "For years I was a coffee drinker until at last I became a terrible sufferer from dyspepsia, constipation, headaches and indigestion, and was a physical wreck.

"The different kinds of medicines I tried did not cure me, but finally some one told me to leave off coffee and take up Postum. I was fortunate in having the Postum made strictly according to directions on the pkg., so that from the start I liked it. It has a rich flavour and I made the change from coffee to Postum without any trouble.

"Gradually my condition changed. The old troubles disappeared and I began to get well again. My appetite became good and I could digest food. Now I have been restored to strength and health. Can sleep sound all night and awake with a fresh and rested body. Everyone who meets me comments on my getting so plump and rosy.

"I am really a monument built by Postum, for I was a physical wreck, distressed in body and mind and am now a strong, healthy man. I know exactly what made the change. It was leaving off coffee and using Postum."

Read the little book, "The Road to Wellville," in pkgs. "There's a Reason." Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Peary is in A Bad Fix.

Congress Committee to Publish His Proofs Which He Has Sold Out-right in Magazine Contracts. — Won't Get Rank if He Doesn't File Them—While Geographic Bodies Accord Him Title of Polar Discoverer Congress is Not Taking Chances.

Washington, D. C., March 6.—Formal recognition of Robert E. Peary as the discoverer of the North Pole has been given by the leading scientific societies of ten Governments according to advices which have reached the National Geographic Society.

These embrace the National Geographic Society of Washington, the Royal Geographic Society at London and the Geographic Societies at Paris, Rome, Berlin, Antwerp, Brussels, Vienna, Dresden and Geneva.

The decision of the National Geographic Society has been accepted by the societies abroad either by awards of medals or invitations to lecture before them as the discoverer of the Pole.

Peary in a Quandry.

Peary is between the devil and the deep sea, his enemies say and his friends admit, as a result of a recent meeting of the sub-committee of the House Committee on Naval Affairs, which is considering the proposition of rewarding him for his Arctic explorations. Mr. Peary's friends, acting for him, flatly refuse to submit his proofs to the sub-committee. Prof. Gannett of the Geological Survey, a member of the board of the National Geographic Society, which officially decided that Peary reached the Pole, declared that he had Peary's authority for refusing to permit the sub-committee to retain his data.

Wants the Title.

Mr. Peary doesn't want money from Congress, but he does want the title of Rear Admiral of the line. In a letter to a friend he tells why he thinks he should be honored by the Government with immediate retirement in the highest grade, and suggests a number of cases which he believes should be considered as precedents. He is not particularly interested, according to his own statement, in a gold medal or in the thanks of Congress. He does want the rank of Rear-Admiral, wants it badly, and does not mind admitting the fact.

There was much disorder at the last meeting of the sub-committee that no action was taken on anything. Mr. Alexander was requested, however, to see Mr. Peary within the next few days and find out whether he is willing to submit his proofs unreservedly to the sub-committee. His friends seem to think he will not do it inasmuch as he is all tied up with magazine contracts which demand his original data.

It is ten to one that the sub-committee will authorize the printing of every line of Peary's records that it can get its hands on. While Mr. Peary has several warm friends on the sub-committee a majority is understood to demand his proofs, although not through any lack of friendliness for him.

PERMANENT and ARTISTIC.

STATELY HALLWAYS

when decorated with Alabastine, have a lustrous richness. Alabastine is the most durable of all wall-coverings, and so simple to apply that you can do it yourself, and produce beautiful effects.

Alabastine

mixes with cold water, and is applied to the wall with a brush. As the water evaporates, the Alabastine sets hard, and continues to harden, until, in time, it forms part of the wall itself. Ask us to show you a tint card and a copy of "Homes, Healthful and Beautiful," with many dainty, new ideas for the decoration of your home. It will show exactly what Alabastine will do for you.
