

ASSESSMENT APPEALS

Decrease in the suburbs and an increase in Central Districts.

There is an increase of 195 in the appeals against the assessment of property of 1934 over the appeals against that of 1933.

The number of appeals by wards is as follows: First Ward, 182; Second Ward, 225; Third Ward, 287; Fourth Ward, 333; Fifth Ward, 423; Sixth Ward, 612.

One of the reasons given for the increase in the central portions of the city and the decrease in those from the suburbs is that since the fast trolley system had been introduced many people are moving from the central part of the city to the suburbs.

I used it both internally and externally morning and evening for a week at the expiration of which time I was completely cured."
