Removing Wool from Sheepskins.

Having got the skins in the yard, they are first beaten on a wooden block with a mallet to bruise the congealed blood on the necks; they are then thrown into water to rinse the dirt and blood from the wool, and are then hung over trestles for the water to drain out. The skins are next lime-washed on the flesh-side, and folded down the back so as to make the bellies match together. They are then left for an hour or two, so that the lime will set a bit. They are then hung by the thick part of the back of the head upon tenter hooks in large, dark closed sheds or rooms, and in about two days in the summer the wool will come off quite easily. The sheds have to be heated in the winter. —*Australian Agriculturist.*

Meaning of Scientific.

Canon MacColl tells an amusing story. "A friend of mine," says the canon, "once shared the box seat with the driver of the stage coach in Yorkshire, and being a lover of horses he talked with the coachman about his team, admiring one horse in particular. 'Ah,' said the coachman, 'but that 'oss ain't as good as he looks, he's a scientific 'oss'. 'A scientific horse,' exclaimed my friend. 'What on earth do you mean by that?' 'I mean,' replied Jehu, 'a 'oss as thinks he knows a deal more nor he does.'"

THE SPRAMOTOR FIRST

A TRIAL of Appliances when conducted by a BRITISH GOVERNMENT is sure to prove a valuable asset to the WINNER.

Rival manufacturers would gladly have us let the result of the Contest of Spraying Apparatus die, but how would this suit the purchasers of this kind of apparatus, who have been buying apparatus that has not been satisfactory in use and has caused more people to delay the practice of spraying than all other causes combined?

Send for full particulars in our copyrighted catalogue on the diseases affecting fruit trees, vegetables etc., and their remedies.

Over 100 GOLD MEDALS AND THE HIGHEST AWARDS have been granted the Spramotor in three years.

Sixty-eight outfits are in use by the Ontario and Dominion Governments for experimental work. Adopted by six American and European Governments.

Certificate of Judges' Award:

THIS IS TO CERTIFY that at the Contest of Spraying Apparatus held at Grimsby, under the auspices of the Board of Control of the fruit experimental stations of Ontario, in which there were eleven contestants, the Spramotor, made by the Spramotor Co. of London, Ont., was awarded First Place.

Agents Wanted.

H. L. HURT, H. PATTIN, Judges.
