Costs You Nothing

to try this wonderful new Aladdin coal oil mantle lamp 10 days right in your own home. You don't need to send us a cent in advance, and if you are not perfectly satisfied, you may return it at our expense.

Twice the Light on Half the Oil

Recent tests by noted scientists at 14 leading Universities, prove the Aladdin gives more than twice the light and burns less than half as much oil as the best round wick open flame lamps on the market. Thus the Aladdin will pay for itself many times over in oil saved, to say nothing of the increased quantity and quality of pure white light it produces. A style for every need.

Over Three Million

people now enjoy the light of the Aladdin and every mail brings hundreds of enthusiastic letters from satisfied users endorsing it as the most wonderful light they have ever seen. Such comments as "You have solved the problem of rural home lighting"; "I could not think of parting with my Aladdin"; "The grandest thing on earth"; "You could not buy it back at any price"; "Beats any light I have ever seen"; "A blessing to any household"; "It is the acme of perfection"; "Better than I ever dreamed possible"; "Makes my light look like a tallow dip"; etc., etc., pour into our office every day. Good Housekeeping Institute, New York, tested and approved the Aladdin.

We Will Give \$1000

to the person who shows us an oil lamp equal to the Aladdin (details of this Reward Offer given in our circular which will be sent you). Would we dare invite such comparison with all other lights if there were any doubt about the superiority of the Aladdin?

Get One FREE

We want one user in each locality to advertise and recommend the Aladdin. To that person we have a special introductory offer under which one lamp is given free. Just drop us a postal and we will send you full particulars about our great 10 Day Free Trial Offer, and tell you how you can get one free.

Largest Manufacturers and Distributors
of Coal Oil Mantle Lamps in the World.

Men With Rigs Make Big Money

delivering Aladdin lamps. No previous experience necessary. One farmer who had never sold anything in his life made over \$500.00 in six weeks. Another says: "I disposed of 34 lamps out of 31 calls."

No Money Required We furnish capital to reliable men to get started. Ask for our distributor's Easy-System-of-Delivery plan quick, before territory is taken.

223. It is being issued by the Ontario Department of Agriculture, Toronto.

"Plant Lice on Currant and Gooseberry Bushes," is the title of a circular by Edith M. Patch, being issued by the University of Maine, Orono, Maine, which is also distributing Bulletin No. 227, entitled, "Powdery Scab on Potatoes." The author of the bulletin is Dr. W. J. Morse.

Apple Crop Prospects

The present season, so far as production is concerned, and speaking broadly for the whole Dominion, is a most satisfactory one. The crop is large and the fruit is clean and of good size. Such a condition is exceptional, and if the means of distributing and marketing were normal, the growers would unquestionably reap abundant returns.

The foreign market, however, at the present time is greatly demoralized. In practically every section of the country the growers are exceedingly pessimistic regarding the ultimate distribution of their fruit in a satisfactory manner. This feeling is particularly marked among independent growers, who have in previous years relied upon the itinerant buyers to purchase their fruit. Many of these buyers are not operating this season, and even in cases where they have quoted prices, their offers are far from alluring. The consequence is that growers are practically at a loss as to any means of selling their crop. Many of them have had no experience in marketing, having formerly sold their fruit on the trees or packed in the orchard. Cooperative associations are not so seriously affected. Being groups of growers under capable management and with experience in disposing of previous crops, most of the associations have established connections upon which they can place some reliance in the present season. The average over the whole Dominion for early apples is seventy-eight per cent., for fall apples seventy-eight per cent., and for winter apples seventy-four per cent. This gives a total crop of seventy-six per cent., which is an increase of twenty-eight per cent. over that of 1913.

HARVESTING

On account of the very exceptional conditions which are at present existing throughout the world, there are certain features which Canadian fruit producers should keep in mind when harvesting their crop. There is a general laxity on the part of consumers in making purchases, and the demand for any inferior fruit from present indications, will be slight. It is therefore desirable that only the better grades should be packed and shipped, at least until a more equable state of affairs is reached. There should be a satisfactory home market for the better grades, and the growers would be wise to limit their shipments to such grades and hold the lower grades for later sales. The main thing to bear in mind is that, just as long as the demand for fruit is limited, it should be supplied only by the better grades and every barrel of No. 2 or No. 3 apples that is placed on the market interferes to just that extent with the sale of higher grades.

FOREIGN CONDITIONS

The crop in Great Britain is larger than was anticipated early in the season, and the markets are well supplied. Large quantities of bananas and pineapples, originally intended for European points, have been diverted to British markets, with the result that the public are being well supplied at low prices. Local apples, pears, and plums are all excellent crops.—Dominion Fruit Crop Report.

FRUIT MACHINERY CO.

INGERSOLL, ONT.

Manufacturers of Fruit Sprayers

and a complete line of

Apple Evaporating Machinery

Our complete POWER SYSTEMS for evaporating, when installed by our experienced millwrights are the most practical, sanitary and labor saving to be found anywhere. Our prices and terms always reasonable.
