

There is a good department of nursing; a new septic ward is being constructed with accommodation for eight patients; new medical school buildings will soon be opened.

The medical graduate who is appointed to this position will have opportunities for practice as an assistant in medicine and surgery, though the major part of his time will be taken up with teaching.

Traveling expenses and living quarters are provided in addition to \$50 monthly salary. The terms: a three-year appointment with the privilege of renewal of contract with two or three additional years, if mutually agreeable.

Christian men who wish to investigate this opening should send full particulars regarding their qualifications to Mr. Wilbert B. Smith, 600 Lexington Avenue, New York City.

MEDICAL PREPARATIONS, ETC.

MORE PHYLACOGEN FIGURES.

“Case histories of 6,324 patients treated with Phylacogens have been sent to us by the attending physicians. They show 5,270 recoveries—83 per cent.”

This statement has just been issued over the signature of Parke, Davis & Co., and a very impressive pronouncement it is. If there are members of the medical profession who have been wont to question the therapeutic efficiency of the Phylacogens, that “83 per cent. of recoveries” should quickly remove their skepticism.

THE PALLID SCHOOL GIRL.

In view of the modern methods of education, which force the scholar at top speed, it is not to be wondered at that the strenuous courses of study prescribed for the adolescent girl more than frequently result in a general break-down of both health and spirits. Each winter the physician is consulted in such cases and almost always finds the patient anemic, nervous and more or less devitalized. In most instances a rest of a week or two, together with an efficient tonic, enables the patient to take up her school work again with renewed energy. Pepto-Mangan (Gude) is just the hematinic needed, as it acts promptly to increase the red cells and hemoglobin, and to tone up the organism generally. It is particularly suitable for young girls because it never induces or increases constipation.
