## "HERRINGBONE" LATH

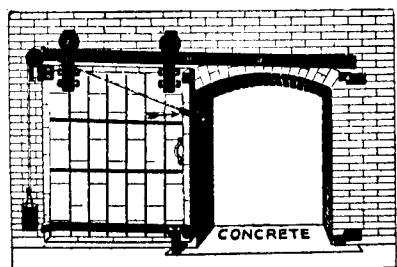

is undoubtedly the most rigid **Expanded Metal Lath** in the world. It is consequently the easiest to erect and the easiest to plaster. "**HERRINGBONE**" does not spring away from the trowel—any plasterer can get better results on it than on any other expanded metal lath. 27 gauge "**HERRINGBONE**" is frequently preferred to ordinary lath of 24 gauge, and when applied to studding at even 16 in. centres, it satisfies every demand.

"**HERRINGBONE**" LATH is unequalled for both interior and exterior construction. Write for a free sample.
