

E. W. TAYLOR

It has long been the study of the most scientific minds in this country as well as in Europe, as to the best method of improving and preserving our eyesight the experience of those whose power of vision requires help, advise the use of some artificial lense.

YOU should be able to read letters in above name at 20 ft. distance, and letters of small type, as above, at 15 inches off.

If you cannot do so, a pair of glasses, properly fitted, may aid you.

I have had over thirty years' experience in fitting Spectacles, and was almost the first to introduce scientific testing in Prince Edward Island.

A few minutes spent with us will enable us to tell whether Glasses will benefit you or not.

E. W. TAYLOR
