Arbell Industries is Canada's most prominent manufacturer of work benches and work bench systems for the light industrial, high technology, laboratory, and educational applications. The product, marketed under the brand name Arlink, is locally made from approximately 100% Canadian materials.

The unique Arlink Series 8000 System was initially developed to satisfy the demands of the manufacturing sector to enhance production techniques while using absolute minimum floor space. In addition, the system is fully modular, has flexibility of configuration, and the adjustability to meet today's ergonomic requirements.

Arbell Industries markets the Series 8000 System throughout North America, Europe, Middle East, Far East, and Australia through a network of dealers and distributors based in major centres. To assist sales on a global scale, present promotion material is printed in six languages, namely; English, French, German, Spanish, Italian, and Dutch. Others will be added as the need arises.
