

## Questions

particularly of the hon. member, I would ask that it be printed in *Hansard* and considered as read.

**Mr. Speaker:** Agreed?

**Some hon. Members:** Agreed.

[*Editor's Note: The above-mentioned answer reads as follows:*]

The National Harbours Board advises as follows: 1. The 55-acre container facility at Pier C in Halifax completed in August of 1971 with two cranes and two berths appears fully adequate to meet short run current demands. Its capacity can be expanded if demand warrants with the addition of one or two cranes.

2. Studies of both long term and short term demands are now in progress by consultants who will recommend the most suitable location for any additional container handling facilities that may be required. The consultants Gibb Albery Pullerits and Dickson were recommended by the Port Task Group of the Metropolitan Area Planning Committee and the studies are financed jointly by the Province and the Federal Government DREE. Publication of the consultants' report is a decision to be made by the Metropolitan Area Planning Committee.

3. The National Harbours Board after receipt of the Consultants' Report will recommend when and where new container ships berths should be constructed. The Minister will report to the House after due consideration the action to be taken on those recommendations.
