INDEX

Division, Rules for, 76; the Fallacy of, 162.

E

Empiricism, the Doctrine of, 337. Enthymemes, 41, 126.

Enumeration, as the Starting-point of Induction, 185; Judgments of, 305. Episyllogisms and Prosyllogisms, 127. Equivocation, the Fallacies of, 159.

Ethics, its Standpoint compared with that of Psychology, 316.

Euler, 110.

Evolution, the Law of, 262; the Application of the Law of, to Thought, 264. Excluded Middle, the Law of, 72, 297. Experiment and Observation, 180; Advantages of employing, 180.

Explanation and Observation, 177; the Problem of, 182.

Extension and Intension of Terms, 55.

F

- Fallacies, Classification of, 152, 246; Syllogistic, 149; Inductive, 245; the Source of, 245; of Interpretation, 154; occasioned by Language, 246; of Reasoning, 157, 254; of Observation, 250; Individual, 257.
- Figures of the Syllogism, 113; the Special Canons of the four, 117; Determination of the Valid Moods in, 120; the Perfect, 123; the Imperfect, 123; Reduction of, 123; the Organic Relation of, 125, note.

G

Galen, 123. Generalization, Danger of hasty, 256. Genus, its Definition, 68. Guericke, 239.

Н

Hegel, Quotation from his Logic, 11; his Influence on the Development of Logic, 31.

Herschel, J., 30.

Hypothesis, Reasoning from an, 230; the Employment of, to explain Common Events, 231; Darwin's Use of, 232; the Necessity for an, 233; Formation of, 234; the Function of Analogy in suggesting, 223, 236; the Proof of, 237; Requirements of a Good, 240.

1

Identity, the Law of, 38, 288; Jevons's Interpretation of the Law of, 289.

Ignoratio Elenchi, 166.

Imagination, its Part in the Formation of Theories, 234.

Individuality, Judgments of, 315.

- Induction and Deduction, 2, 24, 329; the Baconian Method of, 28; Mill's Emphasis on, 31; the Problem of, 172; Perfect and Imperfect, 187.
- Inference, Mediate and Immediate, 92; the Nature of, 324; as distinguished from Judgment, 318; the Paradox of, 325; as a Development of Judgment, 323; and Number of Instances, 344. (See also Reasoning.)

Instances, the Value of Numerous, 345. Intension and Extension of Terms, 55.

Interpretation, of Propositions, 92; Errors of, 154; Judgment a Process of, 266.

J

James, 7.

- Jevons, his Account of Perfect Induction 187; his Calculation of Chances, 195; his Interpretation of the Law of Identity, 289; his Principle of the Substitution of Similars, 289.
- Judgment, the Starting-point of Knowledge, 266; as a Process of Interpretation, 267; and Concept, 268; the Universality of, 274; the Necessity of, 276; *a priori*, 279; as involving both Analysis and Synthesis, 279; as constructing a System of Knowledge, 284; its Relation to Inference, 318.
- Judgments, of Quality, 300; of Quantity, 304; of Enumeration, 305; of Measure, 305; of Causal Connection, 307; of Individuality, 315.
