month?

Is there a gnawing sensation in stomach?

Do you feel faint when stomach is empty?

Do you see specks floating before your eyes?

Have you feeling of emptiness in morn-

If you are troubled with some of the above symptoms, mark them on the piece of paper, cut it out and mall to me, also write any other information you may wish to give me about your case. As soon as I receive your letter I will study it over carefully. This is no trouble to me. I will then make a diagnosis, giving my opinion of your case, and if it be suitable for my treatment, will tell you just how much this course of treatment will cost. This I always make as reasonable as possible, leaving you perfectly free to think the matter over carefully, and then take treatment from me or not, just as you consider best.

THE PORT HOOD COAL CO., Limited

HEAD OFFICE, - - HALIFAX, N.S.

ncorporated by special Act of the Province of Nova Scotia, Chapter 150 of 56 Victoria. Confirmed by subsequent Acts: Chapter 108 of 59 Victoria, Chapter 174 of 61 Victoria and Chapter 181 of 63 Victoria.

DIRECTORS:

GEO. E. FAULKNER, ESQ., Halifax, President. HON. GEO. E. FOSTER, P.C., Toronto, Vice-President.

H. G. BAULD, ESQ., Halifax (Bauld Bros. & Co., Merchants). W. A. BLACK, ESQ., Halifax (Pickford & Black, Steamship Owners). ALEX. McNEIL, ESQ., Halifax and Port Hood (Vice-President of Mining Society of Nova Scotia). LORNE C. WEBSTER, ESQ., Quebec (G. M. Webster & Co., Coal Merchants and Vessel Owners). EVAN THOMPSON, ESQ., Halifax and Elmsdale (Manufacturer and Merchant).

CLARKSON & CROSS. Toronto.

BUSINESS MANACER: WILLIAM LITHGOW, Halifax.

The Colliery is situated in Inverness County, Cape Breton. The coal areas of the Company somewhat exceed ten thousand acres. The various known seams thereon in descending order

No. 1-Outcropping at seaside two miles south of Company's present works, showing at crop a thickness of 8 ft.

A total thickness of thirty-three and a half feet. The quantity of coal in the above area must certainly be four hundred millions of tons, and probably much

PORT HOOD is the only safe deep water harbor on the west coast of the island of Cape Breton. It lies about 25 miles north of the Strait of Canso and 40 miles east of Prince Edward Island. It is nearer to the St. Lawrence and New Brunswick ports by more than one hundred miles than the coal in the Sydney field. The unrivalled advantage of having the larger seams outcrop at PORT HOOD Harbor is that the Company can ship by water during nine months of the year from bankhead of mine to vessel, a distance of some 700 yards.

Capital (Common) Stock Issued = \$750,000 Coupon Bonds Outstanding = = \$750,000

TO BE ISSUED \$250,000 in 2,500 Shares of cumulative Six per cent. Preference Stock bearing date the 30th June, 1902, all subscriptions to be accompanied by a deposit of Ten per cent.; a further Fifty per cent, to be payable on or before 2nd July, 1902; and the remaining Forty per cent, on 30th September, 1902. Allotments will be made on applications received before the close of business on the 31st day of May instant,

Issuing Agents: The Imperial Trusts Company of Canada, Toronto.

Dividends to bear such rates as may from time to time be declared upon the Common Stock of the Company. During a term of fifteen years the said preference shares shall be entitled to receive additional dividends aggregating six per cent. per annum, payable in two half-yearly amounts on 30th December and 30th June of three per cent. each, which preferential dividends shall be cumulative. After 30th June, 1917, all preferences shall cease, but the holder may either retain his shares as Common stock of the Company or he may elect, within thirty days thereafter, to have his shares redeemed in Cash, when he shall become entitled to receive the full amount of

said shares, together with a premium thereon of ten per centum and all accrued dividends.

The present fixed charges upon the profits of the Company are confined to the interest on an issue of \$750,000, of six per cent. Coupon bonds, and ten cents per ton upon all coal sold, to be set aside as a sinking fund for the redemption of said bonds. After payment of these Coupons, of the Sinking fund and of the Preferential dividend upon the above issue of 2,500 shares, a careful estimate of workings during the first and second years shows that there should remain for distribution some \$50,000 of annual profits, an amount sufficient to pay an additional dividend of five per cent. per annum, and the same rate upon the Common stock of the Company. This estimate rests upon an output of three-fourths only of the capacity of the present equipment, which equipment is equal to at least 1,000 tons per day; while this latter quantity, by the addition of the requisite machinery, will in

the future be very largely increased.

In a recent circular regarding the export trade of the United States it is stated that "the Coal Exports of the United States of the Unite have increased from \$10,640,000 in 1896 to \$22,300,000 in 1900." The Port Hood Coal is admirably adapted for

The seam of bituminous coal now being mined outcrops above tidewater in the harbor of Port Hood. It is seven and one-half feet thick throughout the workings, which are even now considerably over two miles in extent, and are all new workings. There cannot be less than seventy millions of tons of coal in this one seam. The aver-The Marvellous Unicycle and Bicycle age quantity in each of the other six is believed to be quite as much as in the one proven. All seven seams can be reached from the present yard either by shaft or by slope, so that the shipping facilities and yard arrangements now being constructed are of a permanent character, and they add directly to the value of the property.

A portion, perhaps one-third, of this issue is to be employed in the erection of miners' dwellings. The revenue therefrom has been disregarded in the above-named estimate of future workings. A larger portion is to be used in extending the shipping pier into water deep enough to accommodate large ocean vessels and to erect a breakwater to permit the loading of them in all weathers. The remainder of this issue is to be used in the extension of the mine workings to a depth of 2,000 feet, the construction of a washing plant, of more rolling stock and in the purchase of a tug and barges.

The Coal property is all covered by the usual Provincial Leasehold grants to this Company. The equipment throughout is the best in quality and the most modern in design obtainable, and the utmost nomy in time and labor has been aimed at in the handling of the coal. Distribution will be by water at a single handling to the hold of a vessel. A railway, by which connection can be made with the Intercolonial Railway, passes within fifty yards of the bankhead.

It is proposed to list these shares on the Toronto Stock Exchange during the current year.

Additional information can be obtained upon application to the Company's Office in Halifax, N.S., from the Imperial Trusts Company of Canada, Toronto, Ont., and G. M. Webster & Co., Coal Merchants, Quebec. Dated Toronto, Ont., May 12, 1902.
