MORE THAN 100 SCIENTIFIC EXPEDITIONS IN FIELD

By DAVID DIETZ

The pioneers on the last frontier, the research workers of science, carry their search to the distant stars with their giant telescopes and into the normally invisible world with their high-powered microscopes. But not all the work is carried on in sheltered observatories and laboratories. The four corners of the earth are being searched for the acts upon which the sciences of history, evolution, archeology, biology and others are based. Buried sites that tell the stories of lost civilizations, fossils of huge monsters that reveal the early days of the world, skulls of prehistoric men that disclose the path of evolution—these are some of the things sought by the scientific explorers. Others are going into the interior of Asia and Africa, and to the islands of the Pacific and the Atlantic, to make collections of the fast disappearing wild animal life so that when the day arrives that these creatures are extinct, future generations may visit museums and see what they once looked like. The American Museum of Natural History of New York has eight expeditions in the field. The Field Museum of Natural History of Chicago has 14. Other expeditions bring the grand total to more than 100. Though every part of the world is covered by them, the chief expeditions centre around 10 important regions. The first important centre is Asia. Three great expeditions are there. The first is the Third Asiatic Expedition under Roy Chapman Andrews, the discoverer of the dinosaur eggs. The second is the Smithsonian Institution expedition, headed by Dr. Ales Huxford, world famous authority on reptiles. Fossils is seeking the cradle of the human race. The third is the James Simpson-Roosevelt expedition, headed by Theodore Jr. and Kermit Roosevelt, seeking big game. The next two great centres are the

MAGNESIA BEST FOR YOUR INDIGESTION

Warns Against Doping Stomach With Artificial Digestants. Most people who suffer, either occasionally or chronically, from indigestion, have now discontinued disagreeable diet, eaten food and the use of harmful drugs, stomach tonics, medicines and artificial digestants. Instead, following the advice so often given in these columns, they take a teaspoonful or two tablets of Bisulphate of Magnesia after meals with the result that their stomachs no longer trouble them, they are able to eat as they please and they enjoy a much better health. Those who use Bisulphate of Magnesia never dread the stomach of acid and food corruption, which can be obtained from any food drug store. It instantly neutralizes the stomach acidity, even the most violent. It ferments food, and without the slightest pain, but certain to get pure Bisulphate of Magnesia especially prepared for stomach use.

PLANS CONVENTION FOR YOUNG PEOPLE

Religious Education Committee of Presbytery Arranges All Day Gathering Oct. 12.

A convention for the young people of the Saint John Presbytery of the United Church of Canada will be held in St. Andrew's church, Saint John, on Oct. 12, in three sessions, commencing at 10 a. m., 2:30 p. m. and 7:30 p. m. The religious education committee of the Presbytery last night planned for the convention. It was decided to hold a banquet and to invite three delegates from each church in the Presbytery to attend.

FORTY CONGREGATIONS.

The Presbytery's bounds extend from Sussex to St. Stephen and it has to congregations on its roll. The religious education committee, of which Rev. J. S. Bonnell is chairman and C. E. Styles, secretary, will arrange the program and speakers will include Rev. Frank Langford of Toronto, Rev. F. M. Milligan, maritime secretary for young people's work, and several of the ministers in the Presbytery. Committee conveners to arrange for the convention were named as follows: Billeting committee, Frank Merrill; banquet conveners, tables, George Will; soliciting, Miss Estelle Barie; general arrangements, Rev. J. S. Bonnell, and promotion committee for the convention, Rev. J. J. Pinkerton, with C. E. Styles assisting. The speakers at the convention will present the claims of the United Church upon the young people of the Presbytery.

How Little She Knows.

(Edmonton Journal). With affairs of state absorbing so much of our attention, we are apt to overlook news of very great importance in other fields of human interest. A pronouncement that very intimately concerns the mind of us all was made by the lady who edits the leading American fashion review, on arriving in New York the other day from Europe. This was that there would be no radical seasonal changes in women's costumes in the immediate future. "A woman will be quite all right," she declared, "in wearing a last year's hat by changing the trimmings slightly."

LITTLE JOE

Fashion Fancies

By Marie Belmont.

THE kick pleat of last season is still with us, but in a slightly different form. The pleated inset is usually folded in several times, instead of once, so that it gives more fullness. Above is shown a most effective street frock for Fall, of wool crepe. This is an ideal material for the early season, as it furnishes some warmth without being too heavy. Cream battle collar and cuffs, hand made, are used to finish the neck and cuffs. The belt is of tooled leather.

TWINS

A city and a chorus girl. Are much alike, 'tis true. A city is built with outskirts. And a chorus girl is too.—C. M. Pounce. Yellow was the most popular color for wedding gowns in early Rome.

SOME FACTS ABOUT BIG BEN

"What do you think of Big Ben now, children?" asked Tick Tock, the clock fairy. "Isn't he big?" "Bigger than all the other clocks in the world put together, I guess," said Nick. They were up in the clock tower of the Parliament Buildings in London, the Twins were. Big Ben was the name of the clock there. "I'll try to tell you all I can remember," said Tick Tock. "Let me see, his face is twenty-four feet across and his minute hand fourteen feet long. It sticks out a little over the edge of the tower. It is made of cast iron and weighs one hundred and fifty pounds. That is the great pendulum and it swings back and forth to keep Big Ben going. "By the way, my dear, Big Ben has four faces exactly like this one. He isn't two faced, either, for he is as honest as Old Abe. I'll take you along this little hallway and we can pass behind all of the faces. There! Didn't I tell you? The numbers are all two feet long and the space between each minute mark is fourteen inches. Look on your clocks at home and you will see that the spaces are usually smaller than the top of a lead pencil. "Now, come, and I will show you the bells." The Twins followed the clock fairy into another sort of room, and there hung Big Ben and all his brothers, from wooden beams bound with iron. Great chains held the bells in place. "Do they ring like dinner bells?" asked Nancy. "Does someone shake them?" "No, indeed!" said Tick Tock. "These bells never budge. Great hammers strike them. Big Ben strikes only the hours—the other bells strike the quarter and the half hours. The hammer that used to make Big Ben ring was too heavy

ENDS DIARRHOEA, STOPS COLIC

whether in adult or child. The pain, cramps, bowel disorders and discomfort disappear after a dose or two of Chamberlain's Colic and Diarrhoea Remedy. At all drug stores. Never fails.

Montreal Bodies Oppose Rate Order

MONTREAL, Sept. 24—Criticism of the minority order of the Railway Commissioners, in regard to rates on grain and flour to Pacific ports, was heard yesterday at the meeting of the council of the Board of Trade, when a report was received therefrom from the transportation bureau of the board, and action of the Corn Exchange was also reported, the result of the council's deliberations being a decision to employ counsel to present the board's views to the Railway Commission.

Are Women 100 Per Cent Efficient?

How many women do you know who are one hundred per cent efficient? That means every nerve and every fibre of the body pulsating with life and health as nature intended. Do you not know more who are one hundred per cent efficient with aches, pains, nervous, irritable and despondent, making themselves miserable and every one around them? Women in this condition should let Lydia E. Pinkham's Vegetable Compound rebuild and restore them to a normal healthy condition which will make them one hundred per cent efficient and life in worth living. There are women in every section of this country who testify to its merits.

Injections To End Cholera Are Urged

MANILA, Sept. 24—Innoculations against cholera are being resorted to in an attempt to curb progress of the disease in the Philippines. With 11 new cases reported yesterday, the director of the Philippine Health Service issued a statement urging public co-operation in combating the epidemic. He advised inoculations against the disease and asked that anything appearing to be cholera be reported immediately.

Wrinkles Removed "While You Wait"

It has been discovered that the mere application of a spoonful of powdered lemon juice, actually removes wrinkles and creases in fifteen minutes or less! There's no rubbing, no work, and the expense is trifling—less than three cents! It is only necessary to take the mixture over the face, sit down before the mirror and watch those unwelcome wrinkles or lines or worry disappear like magic. The effect is incomparably better than that produced by the most skillful massaging. The mixture, of course, is perfectly harmless. While on the face a pleasant soothing sensation is experienced. It is easily washed off. Aside from its remarkable effect on wrinkles, there's nothing better for bumpy cheeks or chin. No woman who purchases a package of powdered lemon juice from the druggist will regret having done so.

SKULL FRACTURE FATAL

ST. PAUL, Minn., Sept. 24—(Rept. after school because he "couldn't think," Kenneth Bergquist, 9, returned home later than usual, complained of a headache, lapsed into unconsciousness and died. He had fallen from a high wall which he had climbed on his way to school and suffered a fractured skull.

ALBERTA PIONEER DEAD

CALGARY, Alta., Sept. 24—George Lane, owner of the famous Bar-U Ranch and Alberta pioneer, died suddenly this morning at the ranch. He was a friend of the Prince of Wales and in the latter's behalf, purchased the royal manor which adjoins the Bar-U. He was born near Des Moines, Iowa.

HUDSON QUITS PUBLIC LIFE

WINNIPEG, Sept. 24—Hon. A. B. Hudson, former Manitoba attorney-general, and Liberal member in the last parliament for South Winnipeg, announced his retirement from public life last night. Efforts had been made to have Mr. Hudson stand for nomination again in his former constituency. Pressure of private business was the reason given for his retirement.

Average age of marriage in Germany is 23 or the men and 25 or the women.

BOYS TESTED FOR CLASSES AT Y.M.C.A.

Doctors Put 66 Through Physical Examination and Have 100 to Try Out Today.

The medical examination of those who wish to enter the Y. M. C. A. gymnasium classes this season was commenced yesterday afternoon when Dr. O. Evans and Dr. Arthur S. Chesley made physical examinations of 66 boys and found that they measured up very well to the proper standard. The two doctors will have about 100 more boys to examine this afternoon and before their work is complete will have had a great number of boys pass through their hands. The medical examination is carried out at the beginning of each season to find out whether the gymnasium pupils are fitted to take the general class work. The record of the examination is kept on file and when a boy is entering the classes several years his yearly record at the examination is sent to his parents. H. T. C. Hutton, physical director of the association, said last night that already many new members had joined the class and he expected the physical department would have a better turn this year than last.

Turk Forces Sent To Irak Frontier

LONDON, Sept. 24—A Jewish telegraph agency report to this city says that four divisions of Turkish troops have been despatched to the Irak frontier. The frontier is a boundary of the Mosul district, thorny subject which is now being discussed by representatives of Great Britain and Turkey.
