BETTER THAN HARD COAL

Soft coal so free from soot that it does not make whistlers on stove covers or pipes and does not make soot on the walls. It is far better than Hard Coal for general household use. Quicker to light, takes less to make a fire, cheaper in price and can also be used for open fires and small heating stoves. Such a coal is Broad Cove soft coal. The main thing is to insist on getting the genuine article. No other soft coal burns just like Broad Cove. You will know it by the above characteristics.

Top Coats

ARGUES AGAINST REDUCTION OF MARITIME RATE

Ottawa, March 24.—Saying that Montreal manufacturers work under heavy taxes totalling ten times as much as the St. John concerns, Huntley Drummond, president of the Canada Sugar Company, argued before the railway commission yesterday in a hearing on the eastern and western freight rates appeal, against a pending application of the maritime referees for removal of the arbitrariness which prevent them from competing in the prairie west. He said that the maritime rate had received a reduction some time ago, but that not a cent of this went to the consumer, the manufacturers getting it all.

FELLOWSHIPS IN MEDICINE

Washington, March 24.—Establishment of fellowships in medicine to increase the supply of qualified teachers in medicine, in clinical and laboratory subjects and in curative and preventive aspects was announced yesterday by the National Research Council. The fellowships, supported by appropriations of the Rockefeller Foundation and the general education board, will be open to Americans or Canadians of either sex holding or qualified to hold degrees of doctor of medicine or doctor of philosophy from approved universities.
