Alkali in Shampoos
Bad for the Hair

If you want to keep your hair looking its best, be careful what you wash it with. Don't use prepared shampoos or anything else, that contains too much alkali. This dries the scalp, makes the hair brittle, and ruins it. The best thing for steady use is just ordinary unperfumed coconut oil (which is pure and practical), and is better than anything else you can use. One or two spoonfuls will cleanse the hair and scalp thoroughly. Simply massage the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, and the hair fine and silky, bright, lustrous, fluffy and easy to manage.

You can get unperfumed coconut oil at any pharmacy, it's very cheap, and a few ounces will supply every member of the family for months.

Removes Hairy Growths
Without Pain or Bother

(Modes of Today.) It is not necessary to use a painful process to remove hairy growths, for with a little delicate handy you can keep the skin entirely free from these beauty destroyers. To remove hair, make a stiff paste with a little powdered delatone and water. Spread this on the hairy surface and in about 2 minutes rub off wash the skin and the hairs are gone. To guard against dis- appointment, be careful to get real delatone.

BARGAIN SPECIAL IN

The annual meeting of the St. Martin's Telephone Company was held yesterday afternoon at 3 o'clock in the law offices of Barnhill, Ewing & Sanford, Princess street. The usual reports were read and adopted, showing that the company was in a very flourishing condition. The same officers and directors were re-elected, and are as follows: President, W. A. Ewing; vice-president, Richard

O'Brien; secretary, George Black; directors A. W. Mackin, Robert Carson and T. B. Carson. "How did your husband's gardening turn out?" "Not well so far," responded the serious woman. "The outdoor work gave him such an appetite that he ate the potatoes instead of planting them!"

The Man Who Banished Corns

Blue-jay was invented by a scientist of distinction. By a man whose lifetime has been spent in the study of surgical dressings. This is a master's method—correct, complete and efficient. And the millions of people who know it, never think of enduring a corn.

All in One

The first step is to stop the pain. This is done by removing all pressure—by the soft protecting ring marked A. The next step is to gently cause the corn to disappear. This is done by the remarkable B & B Wax, which no corn can resist. This bit of wax—marked B—is centered on the corn. It cannot spread. So, unlike old-time methods, it acts on the corn alone. C is rubber-coated adhesive. This snugly wraps the application, protecting everything. You apply this Blue-jay in a jiffy. The corn pain stops at once. The wrapping is comfortable and you forget it. In two days you remove it and the corn can be lifted out. Only rare corns need a second application. This is the scientific way, the easy, sure and right way to end corns. You will never return to any wrong method when you try a Blue-jay once. Try it tonight!
