

YOUNG FOLKS

The Stones on The Roof.
Marjorie and Robert had their lesson for the morning, and it was still half an hour before bedtime. Marjorie crept up behind her father, who was sitting before the open fire, and whispered something into his ear. Father laid down his newspaper.

"What kind of a story?" he asked, with a smile.
"Oh, a story of the time when you went to school and had to study, as Bob and I do," answered Marjorie.

"That was a long time ago," said father.
"But lots of things happened then, didn't they?" persisted Marjorie.

Father admitted with a laugh that many things happened in those days, and that probably a story was hidden somewhere among them.
"Did I ever tell you about the magic-lantern exhibition in our school-house?" he asked.

"No, please tell us about it," said both Marjorie and Robert at the same time, and Robert added, "What is a magic lantern, anyway?"
"Well, it is not so exciting as a movie show," said father, "but it was the best we had when I was a boy. It was a simple affair. Perhaps you have heard of it as a stereopticon. A young man in our town had one, and arranged to give an entertainment at the schoolhouse on the North Road one Saturday night late in the fall. My brother George and I hatched a foolish plan to add something to the programme."

"Beside the schoolhouse stood a great willow tree with branches that stretched out over the roof. It was our plan to climb up in the tree and drop a lot of stones on the roof of the schoolhouse. It sounded silly and it was just as silly as it sounds, but as we talked over the thing it seemed to us that it would be the greatest sport. We did not intend to disturb the entertainment itself. We were not so bad as that; our plan was to drop the stones just as the entertainment closed, and give everyone a good scare. Then we were going to slip out of the tree and run home."

"George and I filled a basket with stones—most of them about the size of a hen's egg, with two or three as large as our heads—and hid it behind the schoolhouse Saturday afternoon. When evening came and the little red schoolhouse was filled with the people of the neighborhood, we tied a rope to the basket, climbed up into the big willow and drew the basket up after us. Then we made our way carefully out on one of the main branches that extended over the roof, and settled down to wait our time."

"But of course something had to go wrong. George and I were trying to tie the basket below the limb in such a way that both of us could easily reach it, when the rope slipped, the basket tipped over, and in an instant all the stones went crashing and banging to the roof, six or seven feet below us, and rolling from there to the ground. What a racket they made!"

"But while the stones were clattering off the roof, something worse happened. George had reached out quickly when the basket tipped. He lost his balance, swung an instant to and fro and then went sprawling to the roof. The fall was not far enough to hurt him, but he had to cling tight to the ridgepole to keep from rolling over the eaves to the ground after the stones."

"You may be sure I was well frightened; but when George called up to me that he was not hurt and that I had better get out of the tree and run for home, I tried to follow his advice, although I did not want to leave him there. I hesitated an instant too long, for half a hundred persons were rushing through the schoolhouse door by that time, and we were trapped—George on the roof and I in the tree."

"It was light enough for everyone to see us, and there was no escape. When we were both on the ground at last we expected to be punished well, for we knew that we deserved punishment; but my father, who was in the crowd, simply marched us into the schoolhouse and made us take seats facing the audience. There we had to sit all through the entertainment, feeling very much ashamed and wondering all the time what was to happen to us when we got home."

"And did your father punish you when you got home?" asked Robert, as his father paused.

"Do you think we deserved punishment for the silly joke we tried to play?" asked father.
Robert thought a moment. "It seems to me that you did," he said at last.

"Well, that's what my father thought," said father, laughing, "and he was usually right. And now it is time for you to go to bed."—Youth's Companion.

Unique Collection.
When the Prince of Wales came home on short leave a few weeks ago he brought with him another interesting lot of battlefield relics to add to his already unique collection. His Royal Highness has put aside a special cabinet for the reception of his trophies, in which he takes a great pride. His latest collection is a well-assorted of things curious and wonderful, from the great Somme offensives, and these he has now ticketed and put in their places. At the present rate of progress the collection bids fair to become historic.

SAWYERS, COX MAKERS & LABORERS WANTED

FIRSTBROOK BROS., Limited
283 King Street East, Toronto

Advance Spring Fashions

A great deal of voile and muslins will be used this spring. The counters of the stores are already overflowing with voiles of all descriptions; plain, sprigged, figured, striped and checked. Bordered materials, too, will have a place among the fashionable fabrics, whether printed or embroidered and whether of cotton or silk.

Plain voile combined with linen in a matching color has been used in the fashioning of some of the advance spring dresses, and, though unusual, the combination is entirely pleasing.

Voile and Linen Dress

Indian embroideries on sports coats of heavy cream-colored silk make very attractive trimmings, and they are also effective on coats of dark blue serge. These embroideries are worked in silks of heavy mercerized cottons in very bright colorings with a number of colors mixed together. As this is to be a spring and summer of high colors, these embroideries will, in all probability, take very well. Parsols and bags to match the costumes showing such embroideries are also to be had to complete the finishing touches.

These patterns may be obtained from your local McCall dealer or from The McCall Co., 70 Bond St. Toronto, Dept. W.

WHY NOT SQUARE MONEY?

Some of the Advantages of Square Over Round Coins.

A movement is on foot for the introduction of square money into England. Whether it will come to anything remains to be seen; but the idea certainly has its advantages.

What would these advantages be? Well, for one thing, the Mint authorities would save an appreciable amount of packing, from the well-known fact that square money will fit into a square box with less waste of space than will round. This also applies to the case of all large traders and bankers, who have to despatch large quantities of bullion every month.

The private individual will probably be more interested in the matter when he hears that the gross total of money lost every year in England, through coins dropped amounts to many thousands of pounds. This is largely due to the fact that round coins, when they fall to the ground, are apt to roll into unlikely places, from which they are never recovered. A square coin would lie dead where it pitched.

In China coins are pierced with a square hole in the centre. In this way they can be strung together and carried without fear of loss. Might we not learn a lesson from the Orient in this?

Another argument in favor of square coins is urged by artists, who declare that it is almost impossible to get a really artistic design "in the round" when so little space is allowed. A rectangular coin would give the designer a real chance of distinguishing himself.

MARCH WEATHER
RHEUMATIC WEATHER

Victims Can Cure Themselves With Dr. Williams' Pink Pills.

With the coming of March people who are afflicted with rheumatism begin to have unpleasant reminders of their trouble. The weather is changeable—balmy and springlike one day, raw cold and piercing the next. It is such sudden changes of weather that sets the pangs and tortures of rheumatism, lumbago and sciatica going. But it must be borne in mind that although weather conditions start the pains, the trouble is deeply rooted in the blood, and can only be cured through the blood. All the lotions and liniments in the world can't cure rheumatism. Rubbing may seem to ease the pain while you are rubbing, but there its value ends. Only through the blood can you cure rheumatism. That's why Dr. Williams' Pink Pills have so many thousands of cures of this trouble to their credit. The new, rich blood which they actually make drives out the poisonous acid and rheumatism is vanquished. Among many sufferers from rheumatism who have been cured by this medicine is Mr. C. H. McGee, freight store foreman for the G. T. R. at Peterboro, who says:—"In the course of my work I am naturally exposed to all kinds of weather, with the result that about two years ago I contracted rheumatism which settled in my legs. At times I could scarcely walk, and often had to quit my day's work owing to the stiffness and the pain. I tried different remedies without getting any help until I began the use of Dr. Williams' Pink Pills. I used six boxes of these and can say that I am about as well as ever I was. I still take the pills occasionally, and I hope that my experience may be of benefit to some other rheumatic sufferer."

ried without fear of loss. Might we not learn a lesson from the Orient in this?

PALACE A HOME FOR CRIPPLES.
Mutilated Italian Soldiers Housed in Former Dwelling of Kings.

The war has turned the palace of the Bourbon Kings of Naples into a home for mutilated soldiers, says an Italian writer. Around the exquisite marble table where the guests of the "Roi Soleil" of Naples dined in the garden on hot summer nights—the ladies in powdered headdress and pannier skirts, the men with lace at their sleeves and embroidered coats—to-day are gathered the pitiable fragments of humanity that war has left in its wake. There are neither candles nor massive silver, neither sweetmeats nor rare wines. The Italian Government allows 70 cents a day for their lodging and maintenance, and food is high in Naples.

Once sumptuous chambers of the royal palace have been turned into schoolrooms in the month that the hospital has been running. In one those who wish are taught tailoring. In another shoemaking—the legless naturally, for one must have two hands to make shoes or clothes. Those who have lost an arm are taught telegraphy or typewriting. But many of the latter must begin further back than that and learn to read and write first. For reading and writing in southern Italy are not common accomplishments, so there is a schoolroom—a primary schoolroom—where the alphabet and multiplication table figure on the blackboard in front of these grown children who have known only to give an arm or a leg to their country. And an arm or a leg to these was.

"The clouds float in the air, and the clouds are made of water. Ice floats in water, so ice will float in the air. Let us freeze the clouds, therefore, and send up anti-aircraft guns in balloons to fire upon them." She admitted that she did not know exactly how to freeze the clouds, but she left that to the experts.

"A gentleman invented a circular gun which shot around corners, and not only provided working drawings of his invention, but also a beautiful water-color picture of the Huns being exterminated by its mediation."

"Another man is blessed with 'perspective ideas' and thinks he can find ranges without a base by the aid of perspective. He wandered around with a certificate signed by an adjutant to the effect that he actually had found three ranges correctly. The number he had found incorrectly was not stated."

There's a good way to keep growing boys and girls healthy and happy and that is to give them

Grape-Nuts for breakfast.

This wonderfully nourishing food has a sweet, nutty flavor that makes it popular with children. One of the few sweet foods that does not harm digestion, but builds them strong and bright. At grocers everywhere.

simple peasants is livelihood—their own and their families'.

Which is why some do not study. They are suspicious. Mutilated, they are entitled to a Government pension, and they are afraid that when they have learned a new trade by which they can live the Government will say: "You no longer need help—make your own living." So they sit all day in the sunlit royal garden, with its faience flower pots marked with fleur de lys, and watch the changing lights on the Bay of Naples and think of what life used to hold for them before the war came to change it utterly.

The sea once came to the very wall of the garden where they sit. Below the balustrade was a sea pool where the courtiers of Carlo III. fished from the terrace. Later, when the people of Naples voted the Bourbons out and the house of Savoy in as rulers of United Italy, Garibaldi gave the palace to Alexandre Dumas, and the Government of Italy had no end of trouble to get him back from the famous author. But the soldiers who wander through the spacious rooms of the palace to-day know none of these things. They know only what they have given to their country. They merely wait the issue of war.

SICKLY BABIES

Sickly babies—little ones who are troubled with their stomach and bowels; whose teething is painful; digestion bad and who cannot sleep well—can be made healthy and happy with Baby's Own Tablets. Concerning the Tablets Mrs. Wilfrid Damons, Val Brilliand, Que., writes:—"Please send me a box of Baby's Own Tablets as I would not care to be without them. I have used them for constipation and vomiting and am well pleased with the result." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Hint to Swimmers.
In an address before the leading ear, nose and throat specialists of the United States, Dr. Hill Hastings of Los Angeles recently called attention to the danger of a person's swimming, and particularly diving, when he has a cold in the head. Comparatively few persons realize that it is dangerous, and many even believe that when they have recovered from a cold and are still annoyed by excessive thick secretions in the nose they can find relief by diving or plunging the head under water. The purulent matter washed out is not only a danger to others, says Dr. Hastings, but the diver himself runs a risk of forcing some of the pus into his middle ear. Most specialists have observed that cases of mastoid abscess are common every summer during the swimming season. At the large ear, nose and throat hospitals it is recognized that the swimming season invariably brings on "a crop of mastoids." The advice to keep out of the water until a "head cold" is entirely cleared up cannot be too strongly emphasized.

STOMACH MEDICINES ARE DANGEROUS
DOCTORS NOW ADVISE MAGNESIA
Just how dangerous it is to indiscriminately dose the stomach with drugs and medicines is often not realized until too late. It seems so simple to swallow a little of soda, peppermint, or take a dose of cathartics, and the body of the patient is so weak that it is found that gastric ulcers have almost "eaten" their way through the stomach walls. Regrets are then unavailing. It is in the early stages of the disease that the danger is greatest. The stomach contents become heartburn, flatulence, etc., indicates excessive acidity of the stomach and fermentation of food contents that present themselves as indigestion and stomach trouble. To get rid of the dangerous acid and the food contents bland and sweet by taking a little pure bismuth—MAGNESIA—instead of the usual cathartics is an absolutely pure, anti-acid which can be readily obtained from any drug store. It is absolutely harmless, practically tasteless and a teaspoonful taken in a little warm or cold water after meals, will usually result in a quiet, sufficient to instantly neutralize excessive acidity of the stomach and prevent all possibility of the food fermenting.

AMATEUR INVENTORS.
Gentleman Invented a Gun to Shoot Around Corners.

Among the ideas sent in to the Munitions Inventions Department are some extraordinary ones from amateurs anxious to assist the country towards victory. One very helpful one, says a writer in the Atlantic Monthly, was from a lady who desired to exterminate Zeppelins. Her argument was:

"The clouds float in the air, and the clouds are made of water. Ice floats in water, so ice will float in the air. Let us freeze the clouds, therefore, and send up anti-aircraft guns in balloons to fire upon them." She admitted that she did not know exactly how to freeze the clouds, but she left that to the experts.

"A gentleman invented a circular gun which shot around corners, and not only provided working drawings of his invention, but also a beautiful water-color picture of the Huns being exterminated by its mediation."

"Another man is blessed with 'perspective ideas' and thinks he can find ranges without a base by the aid of perspective. He wandered around with a certificate signed by an adjutant to the effect that he actually had found three ranges correctly. The number he had found incorrectly was not stated."

Nature's Best Food

Laxative is the bran which makes up the outer coating of the whole wheat grain. But why eat coarse bran cakes when you can accomplish the same purpose by eating Shredded Wheat Biscuit and at the same time get all the rich, body-building material in the whole wheat grain prepared in a digestible form. A perfect food—just enough protein to build healthy muscle, just enough carbohydrates to supply heat and energy, just enough bran to keep the bowels healthy and active. For breakfast with milk or cream, or for any meal with fruits. Made in Canada.

THE PEACE COMET.

Startling Phenomenon Due to Arrive Next Summer.

Peace is coming; and with peace comes a comet—one of the largest on record—which is due to make its bow to this sphere during the early summer.

"The peace comet," as it is appropriately termed, is travelling at the rate of 131 miles a second, and is 1,134,000 miles per day, and this is its first appearance for 60,000 years. A vivid imagination would be needed to conjure up the happenings of our world when another 60,000 years have passed, and when the 1917 comet makes its reappearance.

A German, by name Professor Wolf, of Heidelberg, is responsible for the 1917 comet, and he first discovered it on April 27th, 1916. Now the American observatories have sighted the spectacle, and have cabled the news to Greenwich Observatory, says London Answers.

We are told that the coming comet will be one of the most astonishing and wonderful of all phenomena. It is exceptionally large, and the nearest point reached by it to the earth will be 104,000,000 miles. Yet in July of this year it will be visible to the naked eye, though astronomers are dubious whether it will outshine in brilliancy the great comet of 1882, which latter actually brushed the sun's corona in passing round the sun, and travelled at the rate of 300 miles a second.

The Lady Spoke Last.

My five-year-old boy and my three-year-old girl were talking. Glen said, "I'm older than you," and was feeling elated over the fact. "I'm always had a ready reply," said, "Well, I'm newer than you."

When Your Eyes Need Care

Use Murine Eye Medicine. No Smarting—No Itching—No Stinging. Try it for Red, Weak, Sore Eyes and Granulated Eyelids. Murine is composed of the finest and purest of the "Faint" but used in successful Physicians' Practices for many years. Now dedicated to the Public and sold by Druggists at 50c per Bottle. Murine Eye Salve in Asseptic Tubes, 50c and 60c. Write for Book of the Eye Free. Murine Eye Remedy Company, Chicago, Ill.

Waterproof lap robes for automobile drivers which remain in place should a wearer have to leave a car and walk about have been invented in England.

Minard's Liniment Relieves Neuritis.

A machine for planting forest tree seedlings has recently been invented which is capable of planting from 10,000 to 15,000 seedlings in a day when operated by three men and two horses.

ANY CORN LIFTS OUT, DOESN'T HURT A BIT!

No foolishness! Lift your corns and calluses off with fingers—It's like magic!

Sore corns, hard corns, soft corns or any kind of a corn, can harmlessly be lifted right out with the fingers if you apply upon the corn a few drops of freezone, says a Cincinnati authority.

For little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain.

This simple drug dries the moment it is applied and does not even irritate the surrounding skin while applying it or afterwards.

This announcement will interest many of our readers. If your druggist hasn't any freezone tell him to surely get a small bottle for you from his wholesale drug house.

Two sets of revolving rings instead of one feature a new double egg beater of twice the ordinary capacity.

Minard's Liniment Cures Dandruff.

ISSUE No. 12—17

Gasoline for Wounds.

The ambulance surgeons and many of the field hospitals of Europe use gasoline for the first cleansing of wounds of soldiers brought in from the battlefields. According to a writer in the British Medical Journal, the skin and then the surface of the wound are cleansed by vigorous rubbing with a swab of absorbent cotton soaked in gasoline. Swabs of cotton are wound round a pair of artery forceps or a probe soaked in gasoline, and the wound is cleansed from the surface inward as far as the instrument can be pushed. The process is continued until the swabs come out perfectly clean. The gasoline does not cause any special smarting, and patients do not complain of its use; but if the gasoline is left on the skin and strips of adhesive plaster are applied close together over the dressing, so that they prevent evaporation, the skin will blister. Gasoline properly used seems to clean up not only the surface but the depths of wounds better than anything else that has been tried. It has been used in Canadian hospitals and in many American iron and steel foundries for many years to clean contused or lacerated wounds that contain deeply embedded dirt.

Says She Suffered For Many Years

Then Dodd's Kidney Pills Cured Her Kidney Troubles.

Mrs. Felix Aschaf Found No Relief in Doctors or Hospital Treatment, but Dodd's Kidney Pills Brought a Speedy Cure.

Haldimand, Gaspe Co., Que., Mar. 28th (Special).—Mrs. Felix Aschaf is telling her numerous friends here that her complete recovery from kidney disease from which she suffered for years is due to the splendid work of Dodd's Kidney Pills.

"My trouble started from a strain," Mrs. Aschaf says. "I suffered for years. I was attended by a doctor and was also treated at a hospital. I suffered from stiffness in the joints. I had a bitter taste, especially in the morning, and at times was subject to severe headaches. I had a pressure and often a sharp pain at the top of my head and my skin itched and burned at night."

"Neither from the doctor nor at the hospital did I get any permanent relief. Then I started to use Dodd's Kidney Pills and two boxes did me so much good I feel like recommending them to everyone who has kidney trouble."

Dodd's Kidney Pills cure sick kidneys. Cured kidneys strain all the impurities, all the seeds of disease, out of the blood. That makes good health all over the body. That's why those cured are so enthusiastic in regard to Dodd's Kidney Pills.

The land holding the Eddystone lighthouse is the smallest bit of all the year-round inhabited land in the world.

Marion Bridge, C. B., May 30, '02.

I have handled MINARD'S LINIMENT during the past year. It is always the first Liniment asked for here, and unquestionably the best seller of all the different kinds of Liniment I handle.
