CANADA'S manufacturing in 1913 is much larger than it was in 1910, but only the 1910 figures are available. The above map gives the figures for 1910 only. In 1890 the total products of Canadian factories were valued at \$369,000,000. In 1900 they were not much greater, amounting only to \$481,000,000. During the last decade the increase was tremendous, and the total was \$1,166,000,000. The decade the greatest growth is shown in the Western Provinces. The total manufacturing in the West in 1900 was \$32,130,000; in 1910 this

had increased to \$207,500,000. If the West does as well in the next ten years, Eastern Canada will have to look to its laurels.

The following table gives a list of the leading manufacturing cities in each province, with the total value of the products produced each year according to the 1910 census. The numbers correspond also with the numbers in each province on the map. During the past three years there have been few changes in seniority; perhaps the most notable change would be that of Medicine Hat. Several very important towns

are left out of the Ontario list on account of its length. These include Bowmanville, Bracebridge, Brockville, Chatham, Collingwood, Galt, Goderich, Hawkesbury, Huntsville, Ingersoll, Kingston, Lindsay, Midland, Niagara Falls, Oshawa, Owen Sound, Paris, Penetanguishene, Preston, St. Catharines, St. Thomas, Sarnia, Steelton, Stratford, Wallaceburg, Waterloo, Windsor, and Woodstock. All of these produce more than two million dollars worth of products every year. Welland is also in this class, although not so placed by the census returns.
