## Market Review and Forecast

TORONTO, Aug. 13.—A report has just been issued by the Census and Statistics Office giving the conditions of field crops throughout Canada at the first of the month. The eastern part of the province was hit by frequent rains and good grain crops are reported from all quarters. Hay, potatoes, broom-corn and alfalfa crops are reported to be all from an average to a little above the average crop throughout eastern Canada. The grain provinces, however, have not fared so well with regard to rain, which has done much to improve prospects there. Manitoba, and Saskatchewan both report poor grain crops through lack of moisture. Unless these provinces get rain at once, they will not likely reach more than half a crop. The United States Department of Agriculture report a corn crop surpassing any ever grown before. Wheat prospects, however, are poor through the United States. Barley, rye and potatoes will give large crops.

### WHEAT.

The poor prospects for a wheat crop in the United States have made themselves felt on markets, both in the U.S. and in Canada. Small crops in the Canadian west have also tended to make for a strong wheat market. Already some new Ontario wheat in the market. Quotations: No. 1, Northern, 2.40; No. 2, 2.37; No. 4, 2.25; Ontario winter—No. 2 winter, 2.25; No. 3 winter, 2.25; No. 4 winter, 2.25; No. 5 winter, 2.25; No. 6 winter, 2.25.

### COARSE GRAINS.

With no new grain yet ready for the market, little has been done in the coarse grain marketing this week. The strengthening grain market, which followed the United States crop report, has, however, been felt. Quotations: Oats, C. W. No. 2, 80c; other grains not moving. Montreal quotations: Oats, C. W. No. 3, 82c to 83c; extra No. 3, 82c to 83c; corn, 22.25 to 22.40; barley, medium, 21.25.

### MILL FEEDS.

The mill feed market is very strong in sympathy with the upward trend of the grain market. The demand for bran for shipment to the United States is steady, and prices are running high. Carlots: best, 22c; middling, 21.75 to 21.85; good, 21.50 to 21.65. At Montreal, best, 23c; middling, 22.50; good, 22.00; No. 2, 21.50 to 21.65. At Montreal, best, 23c; middling, 22.50; good, 22.00; No. 2, 21.50 to 21.65.

### HAY AND STRAW.

The hay crop throughout eastern Canada is a little above the average. In some districts exceptionally good yields have been harvested. The United States also reports a bumper crop this year. Track, Toronto, extra No. 2, \$15.50 to \$16; mixed, \$9 to \$10; straw, carlots, 37 to 38; carlots, 10 to 11.60.

### HIDES AND WOOL.

Country Markets—Beef hides, fat, carlot, 30c to 32c; dressed or bob calf, \$1.75 to \$2.50 each; horsehides, country No. 1, 1.25 to 1.50; No. 2, 1.25 to 1.50; horsehair, 35c to 40c; farmers' stock, 35c to 40c; quality, fine, 60c; coarse, 55c. Washed wool, fine, 70c; coarse, 55c.

### EGGS AND POULTRY.

Eggs are remaining firm. The supply of eggs at present is unusually low, due not only to the season, but also to the scarcity of feed. Eggs at country points are selling at from 57c to 58c a dozen, and wholesalers are producing at the retail trade at 45c. The retail price at Montreal is 45c. Live weight Dressed, Chickens, spring: 20c to 25c to 30c; Hens over 5 lbs.: 15c to 20c to 25c; Roosters: 14c to 20c to 25c to 30c; Ducks: 12c to 20c to 25c to 30c; Turkeys: 16c to 20c.

### DAIRY PRODUCE.

The hot weather which was general throughout Ontario for a week or so had its effect upon pasturage, and the demand for butter is steady at good prices. The butter market is paying the following prices: Creamery, sold, 25½c; Dairy, 25c; 30c; 35c; 40c; 45c; 50c; 55c; 60c; 65c; 70c; 75c; 80c; 85c; 90c; 95c; 100c; 105c; 110c; 115c; 120c; 125c; 130c; 135c; 140c; 145c; 150c; 155c; 160c; 165c; 170c; 175c; 180c; 185c; 190c; 195c; 200c; 205c; 210c; 215c; 220c; 225c; 230c; 235c; 240c; 245c; 250c; 255c; 260c; 265c; 270c; 275c; 280c; 285c; 290c; 295c; 300c; 305c; 310c; 315c; 320c; 325c; 330c; 335c; 340c; 345c; 350c; 355c; 360c; 365c; 370c; 375c; 380c; 385c; 390c; 395c; 400c; 405c; 410c; 415c; 420c; 425c; 430c; 435c; 440c; 445c; 450c; 455c; 460c; 465c; 470c; 475c; 480c; 485c; 490c; 495c; 500c; 505c; 510c; 515c; 520c; 525c; 530c; 535c; 540c; 545c; 550c; 555c; 560c; 565c; 570c; 575c; 580c; 585c; 590c; 595c; 600c; 605c; 610c; 615c; 620c; 625c; 630c; 635c; 640c; 645c; 650c; 655c; 660c; 665c; 670c; 675c; 680c; 685c; 690c; 695c; 700c; 705c; 710c; 715c; 720c; 725c; 730c; 735c; 740c; 745c; 750c; 755c; 760c; 765c; 770c; 775c; 780c; 785c; 790c; 795c; 800c; 805c; 810c; 815c; 820c; 825c; 830c; 835c; 840c; 845c; 850c; 855c; 860c; 865c; 870c; 875c; 880c; 885c; 890c; 895c; 900c; 905c; 910c; 915c; 920c; 925c; 930c; 935c; 940c; 945c; 950c; 955c; 960c; 965c; 970c; 975c; 980c; 985c; 990c; 995c; 1000c.

### ANOTHER LONG-DISTANCE RECORD FOR CANADA.

LAKELVIEW QUESIN 3rd, owned by W. H. T. PRESTON, was sired by the senior two-year-old, but established a new high-water mark for Canada in producing 28½ lbs. milk, testing 4.21 per cent. butter fat, equivalent to 15.01 lbs. the better. This was after calving on the 23rd day. Boneross Ormsby, whose record for 70 days was 27½ lbs. milk, 14.28 the butter, set two weeks ago the grand-dam of this heifer, Queen Inka De Kol, in the record in the same division 18 mos. after calving, by producing 21.55 lbs. butter, testing 4 per cent., making 21.55 lbs. butter, and is only equalled by two other cows. The record of 100 lbs. milk, 14.28 the butter, makes the sixth Canadian record for a heifer. Queen Inka De Kol, in the same division, eight months after calving.

NEW YORK DISTRICTS. HERTZ INCORPORATED, owned by W. H. Shaw, Newark, Ont., is now the world's champion in the 30c and 60-day divisions as a 2-year-old. Her records are as follows:  
7 days.....11½ lbs. Butter  
14 days.....12.5 lbs. " " " " " "  
30 days.....2,262.6 122.01  
60 days.....2,566.6 122.01  
This great record is a Canadian record, and individual as well as an A.I. product. Her reputation is due to the fact that she is a good sire and development. In fact she might stand well up in the money at any fair.
