

PROOF

That Farmers all over the World are Discarding Common Cream Separators for

SHARPLES DAIRY TUBULARS

We will mail to you, free, large pictures showing the immense number of common cream separators recently exchanged for Sharples Dairy Tubulars. These pictures would cover more than one page of this paper, and are positive proof that farmers all over the world are discarding common machines for Sharples Dairy Tubulars. These pictures show just a short time accumulation of these discarded common machines. Write for these pictures at once.

Sharples Dairy Tubular Cream Separators contain neither disks nor other contraptions, yet produce twice the skimming force, skim faster and skim twice as clean as common machines. Because Dairy Tubulars are so simple, they wash many times easier and wear several times longer than common separators. Tubular sales exceed most, if not all, others combined. Tubulars probably replace more common separators than any one maker of such machines sells. The World's Best. The manufacture of Tubulars is one of Canada's leading industries.

When Writing Mention This Paper.

Most Convenient
Easiest on Horses

Dain

Pull Power Press

By long odds the most convenient hay press on the market. You can set the Dain between two stacks or at the middle of a stack. You don't have to fork the hay so far or set the press so often. Shape of hopper, and location of feed table and platform make press very easy to feed. You can stand on either side and keep out of the dust. If you are doing the tying you can stand up all the time. Not necessary to walk around the press, as you can readily reach over and tie the wire. The bales come out of the press away from the dust. They are smooth and clean.

You can set the Dain Press quickly, as it does not have to be level. You can bale hay on the floor of a bank barn without leveling the power.

As the Dain is the original pull power press, it has patented features found on no other press. No pitman or other large obstruction for the team to step over. The power is applied direct, and an ingenious device equalizes the draft, maintaining an even, moderate load. The Dain is thus very, very easy on the horses.

Every part of the Dain is made stronger than actually necessary. Made of steel throughout. No toggle joints or other delicate parts. It is the most durable press as well as the one that makes the smoothest bales and has the largest capacity.

Write today and we will tell you of a co-operation plan whereby purchasers of Dain Presses can get more money for their hay.

"BAKER" Wind Engines.

The "BAKER" Wind Engine is built for heavy duty. Neat and compact in design. Do perfect work because they are built on principles that are absolutely correct, and the easiest running mill made.

The wheel is built on a hub revolved on a long stationary steel spindle. As a result there is less friction.

It has a large number of small sails without rivets. The small sails develop the full power of the wind.

The engine is so constructed that the gears cannot wear out of mesh.

Has ball-bearing turntable, and self-regulating device.

All working parts are covered with a cast shield, thus protecting same from ice and sleet.

We make a full line of steel towers, galvanized steel tanks, pumps, etc.

All goods fully guaranteed. Write for catalogue No. 58.
