WHEN ACCIDENTS HAPPEN

your first need is to end the pain—to apply something that will give you relief, and permit you to go on with your work or pleasure, as the case may be.

Here's where Zam-Buk is so splendid. Nothing ends the burning sensation in a scald or burn, the stinging pain of a cut or scratch, or the ache and soreness of a bruise, like Zam-Buk.

Another thing! Zam-Buk ensures you against the danger of an injury "taking the wrong way."

A most important feature of Zam-Buk is its germ-destroying power. If Zam-Buk is applied immediately an injury is sustained, there is never any danger of festering or blood-poisoning, as it destroys all germs and protects the injury from infection.

These qualities, combined with unusual healing power, are responsible for Zam-Buk's world-wide reputation.

Be ready for an emergency by getting a box of Zam-Buk to-day. It will keep for an indefinite period and still retain its strength and purity.

Zam-Buk

is no less effective in the treatment of skin diseases, blisters, ulcers, etc. All dealers of Zam-Buk Co., Montreal, Canada.

PEPS

the real breathable tablets, make the throat, chest, and lungs cold resisting. When a nasty cold or a coughing bout foretells the revival of your old bronchial trouble, the best thing to do is to take Peps at once to strengthen and

PROTECT

the chest. When a Peps tablet is taken from its preserving silver wrapper and allowed to dissolve in the mouth, it gives off powerful medicinal and germicidal fumes that immediately circulate with the breath through all the air passages, and destroy any germs that have got into

YOUR

nostrils and throat. At the same time the sore, inflamed membrane is soothed, healed, and protected, phlegm is released from the bronchials, breathing is made easy, and that distressing cough and throat soreness disappear.

By this direct treatment Peps keeps trouble off the

CHEST

and lungs, and the worst weather can be faced without fear of evil consequences. It is the safest plan to always have a few Peps handy to arrest a cold, and prevent it reaching the lungs or starting bronchitis and chest weakness.
