They're sure.

When love flies out of the window alimony steps in at the door.

The Crust Should Be of Wafer-like How many women realize that the most critical period in a woman's existence is the change of life, and that the anxiety felt by women as this time draws near is not without Thinness and Crisp and Flaky. Five Rules to Be Observed In the Making of a Perfect Pie.

Although food theorists and food cranks have varying opinions as to the wholesomeness of certain foods, they one and all agree in denouncing ple It is the one dish most ardently condemned, and yet the one dish most universally liked-at least by Americans. Still, notwithstanding the bad reputation pie enjoys, it is a wholetion, or she is predisposed to apoplexy or congestion of any organ, it is at this time likely to become active and, with a host of nervous irritations, make life some dish if properly made.

In making it the average housewife rolls out a heavy, sodden crust, and then spreads it in a thick layer over At this time, also, cancers and tumors are more liable to begin their destructive work. Such warning symptoms as a sinse of suffocation, hot flashes, dizziness, headache, dread of impending evil, sounds in the ears, timidity, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and inquietude are promptly heeded by intelligent women who are approaching the period of life when woman's great change may be expected. the bottom and sides of a pie plate She forgets to rub this crust with the white of egg and immediately puts in the filling of custard, fruit or mince meat, whose juices will later soak into the crust, making it still more sodden She then covers the pie, perhaps, with another layer of this thick pastry and puts it in an oven that is not hot enough. The oven should be so hot that the pastry will brown before the teriod of life when woman's general change may be expected.

Lydia E. Pinkham's Vegetable Compound is the world's greatestremedy for women at this trying period, and may be relied upon to overcome all distressments. butter in it has barely a chance to

melt. The crust will then be crisp.

Another reason why pies are so universally disapproved is that they are be relied upon to overcome an university and support the safely through to a healthy and happy old age. Lydia E. Lard should never be used in a pie or, in fact, in any dish. An eminent physiologist in a leading university says that "lard is the bane of American cookery and is fit medicine can.

Madame Louis Belleau, of 17 Ramsay

St, Quebec, Que., writes:

Dear Mrs. Pinkham:—

"Ly,lie F. Pinkham's Vegetable Compound assisted me to pass the change of life with but very little sickness and pain, and I am pleased to give it my endorsement, for I feel that it is the medicine which every woman should take. I am the mother of three children, and when I reached the age of fifty naturally my health was none too good, and I feel sure that if I had not taken your-Vegetable Compound I should not have passed the climax safely I took it off and on for two years and now find that I am in splendid health and strength and feel younger and better than I did ten years ago. Much praise to your medicine, and may all suffering women learn of its value."

For special advice regarding this im All pie crust, of course, should be of wafer-like thinness. Not only are properly made crusts harmless, but some popular fillings are exceedingly whole some. What, for instance, could be better than a custard or a pumpkin filling? The latter is, as a rule, only a custard rich in eggs, with an addition of pumpkin and a few spices,

which are aids to digestion.

Without doubt all pies should be eaten in moderate portions, especially by delicate persons, but this rule ap-plies to any dish. Even cream is not good for persons under certain condi-For special advice regarding this important period women are invited to write to Mrs Pinkham Lynn, Mass. This Commercial Age.

Kingston, Sept. 12.—"In public and private life to-day men are unblushingly acting dishonestly. Several decades ago they would have cut off their right hand rather than be guilty of such things."

So make Rev. Prof. Ross Sunday evening in an address on the lowering moral standards of this age. There are five rules to observe in the making of a perfect pie. First, rub the undercrust with the white of an egg before putting in the filling to prevent it from soaking into the pastry; second, bake it in the hottest of ovens: third, place it in the lower half of the oven at first against the bottom, later removing it to the upper shelf; fourth, You're uneasy, restless, without appetite. Still worst, you are thin and fagged out. Work must be done, always place crust in the refrigerator to become thoroughly chilled and hard before filling and baking it; fifth, pound the pastry well until it is filled

and fagged out. Work must be done, but where is the strength to come from?

Make your blood nutritious and you'll have lots of strength. Your only hope is Ferrozone, an instant blood-maker, blood-purifier, blood-enricher. It brings keen appetite, digests food and supplies nutrition for building up all the bodily tissues. Ferrozone makes muscle and nervefibre, increases your weight, instils a reserve of energy into the body that defies weariness or exhaustion from any cause. To have virility and healthy vigor use Ferrozone, which all dealers sell in 50c, boxes. with air spaces.
Volumes could be written on the correct treatment of pastry. Any of the recipes in standard cookbooks will do, however, if a few details are carried

There ists than Dr. Hamilton's Pills. They maintain that bracing health every woman so earnestly desires; they uproot disease, and bring strength that lasts till old age.

"No medicine could be more beneficial than Dr. Hamilton's Pills," writes Mrs. Mary E. Ayrton, of Victoria. "I have been strengthened my digestion is better, I have improved in color and feel considerably better since using Dr. Hamilton's Pills," Sold everywhere, 25c. per box or five boxes for one dollar. are also many good cold meat ples which are welcome at pienics. When preparing a chicken or meat ple it is always better to add a little baking powder to the regular rule for ordinary

pie crust. Add one cup of butter to every two cups of flour (pastry flour). Then chop together in a wooden bowl, with an ordinary old fashioned chopping knife until the mixture is broken into small bits the size of peas. Add half a cup of ice water. Mix with a knife, then beat and turn and beat and turn until When a horse proks up a nall in his foot what does the driver do? Does he whip the limping, legging animal and force him along? Not unless he wants to ruin the horse. At the first sign of lameness he jumps down, examines the foot and carefully removes the cause of the lameness. What is called "weak stomach" is like the lameness of the horse, only to be cured by removing the cause of the trouble. If you stimulate the stomach with "whiskey medicines" you you keep it going, but every day the condition is growing worse. A few doses sometimes of Dr. Pierce's Golden Medical Discovery will put the disordered stomach and its allied organs of digestion and nutrition in perfect condition. Ninety-eight times in every hundred "Golden Medical Discovery" will care the worst allments originating in diseases of the stomach. It always helps. It almost always cures. To cure constipation as Dr. Pierce's Pleasant Perfets. They're sure. the whole is smooth, but full of light neas. This pounding and turning is better if done upon a marble board in a cool storeroom or cellar. Never touch the pastry with a spoon or the hand, but with a knife; then put it where it will become ice cold and hard before rolling it out.

There are several variations to this rule which can do no harm. If baking powder is wanted, add a teaspoonful to this amount of flour and butter.

#### ANOTHER CURE BY **CUTICURA REMEDIES**

Captain W. S. Graham, 1321 Eoff St., Wheeling. W. Va., says: "I am so grateful I thank God that a friend recommended Cuticura Soap and Ointment." I suffered for a long time with sores on my face and back. Some doctors said I had blood poison, and others that I had barbers' itch. None of them did me any good, but they all took my money. My friends tell me my skin now looks as clear as a baby's, and I tell them all that Cuticura Soap and Ointment did it."

Mr. H. J. Spalding of 104 W. 104th St., New York City, says: "For two years my neck was covered with sores, the disease spreading to my hair, which fell out, leaving an unsightly bald spot, and the soreness, inflammation, and merciless itching made me wild. After a few applications of Cuticura the torment subsided, the sores disappeared, and my hair grew thick and healthy as ever."

### AND STILL ANOTHER

"For over thirty years I suffered from painful ulcers and an eruption from my knees to my feet, and could find neither doctors nor medicines to help me, until I took Cuticura which cured me in six months. Fmooth, even pie crust is an abomination, and yet many housekcepers think that is the proper way to have it, and sometimes they will even be heard to complain when by accident their pie crust is rough and almost breaking into wafer-like flakes. This flakiness is, however, the proper condition of pastry.

Ples as a rule are better adapted to a winter than a summer diet, because of the butter, which makes them too rich for warm weather fare. Fruit pies, however, are good at all seasons.

## Stomach Cramps. COLIC.

THESE are very painful, and their attacks are often sudden and etimes fatal. The principal seat is in the stomach and bowels, producing severe twisting, cramping and often accompanied by vomiting. If you are troubled in this way, there is only one remedy to cure you, and that one is Dr. Fowler's Extract of Wild Strawberry. It has a record of cures extending over 60 years and we have yet to hear of it failing to either relieve or cure.

MRS. M. SECORD, Bristol, N.B., writes:
"I was terribly troubled with cramps for some time and had several doctors attend me, but their medicine did not do me any good. I got two bottles of Dr. Fowler's Extract of Wild Strawberry and they completely cured me. I would not be without in my house."

REFUSE ALL SUBSTITUTES. THEY'RE DANGEROUS.

THE PLEASING MANTEL.

Desirable Omissions and Commis The decoration of the mantel is often its point of deterioration. A fireplace is recognized as a prominent feature in a room, and when house building is unlertaken its position, design and material are made a matter of careful con-

sideration. In the movable decorations of the mantelshelf, however, there are opporunities often neglected and many times overlooked for contributing toward making an attractive interior. Here is the real, vital center of interest in the entire room, the point toward which the attention is first called, the piace where the eye lingers the longest, says Alice M. Kellogg in considring as follows in the Delineator the ouzzling question of the proper treatment of a mantel: One way to reach a solution is by eliminating first of all objects that are unsuited to their sur-

oundings.
In a formal room—for instance, a reception room, parlor or drawing room—the character of the furnishings and lecorations would be seriously marred by the admission of cheap, trivial ces of bric-a-brac. Whatever degree of elegance is attained in other parts of rooms of this kind should be upheld and maintained by the mantel decora

In rooms devoted to the general use of a household the personal taste of any one member may be subordinated to the more diverse interests of the whole family. In the private sitting room or bedroom the individual preference may assert itself without restraint.

After removing the inappropriate objects from the mantel the inartistic and uninteresting may next be discarded

A TRIM COLONIAL MANTEL

In the latter class which may take precedence? We may all have recollections of some time sitting in a room where the mantel presented to us a row of articles inartistic in shape and unpleasing in color, yet arresting the glance and holding the attention pleasantly by some unique quality. Indian curiosities may serve as a readily understood concrete illustration of this point.

Simplicity is the real beynote to suc cessful mantel arrangement. The confused impression that is made when too many pieces are brought angether in a contracted space is carefully avaided in museums, where the most exten sive collections are carefully placed to show each article to advantage. In Japan the householder purs out of sight most of his decorative possessoms and brings forth a few at a time for his own enjoyment and that of his visitors.

#### A Starch Positive

Thoroughly dissolve the starch in a small quantity of cold water, add it to boiling water and cook until a paste is formed. Apply either hot or cold. In the latter case the poultice be changed or moistened with cold wapossesses all the requisite virtues, lightness, smarthness and the power of remining best, says an exchange.

The Half of Health. Cheerfulness makes love of life, and have of life is half of health. On the contrary, sadness and discouragement hasten old age, says a French physician.

The Keynote of the Room. Be careful in selecting your mantel. m and must be considered in all the other furnishings.
