The price of linen hosiery is expected to rise in the near future.

ent to the fishery supplying business will open. As a result of the change in the tariff, which comes into effect soon, the price of pork will, of course, be easier and no doubt freights on this class of goods will also decline as they have on flour, so that prices will be considerably modified. Owing to the change in the duties it was difficult to get the prospective prices for the week, but pork will be considerably lower than heretofore. The imports for the week were 885 bbls. by the S.S. Rosalind from New York.

Beef—The market in beef, which took on some activity last week, failed to show a continuation of this feature during the present week and the business done was of a negligible character. However, most importers of the article look to see considerable activity in the market soon with the opening of the supplying season, while extra business is sure to accrue from the work now being done on the Number, at Grand Falls and other parts of the country. Like pork, the beef market will be affected by the lower tariff on such commodities and cheaper meat all round must be the result. There is not much beef held in stock here now and henceforth there should be fair consignments coming this way. Only a few barrels came to hand by the Rosalind during the week.

Molasses—Importers of molasses say that there is none in stock here now but that the cargoes now on the way from Barbados should soon arrive. Despite any alteration in the tariff as regards this article the prices will be higher than usual owing to the fact that, as compared with last year, there will be a very pronounced shortage in the crop. The prices quoted in the local market during the week were for fancy 85c. per gallon and for choice 85c.

Sugar—The easier aspect in the sugar market noted last week still continues and the general impression is that for the present at least prices are as low as they well can be and not much further decline will ensue.

If all the predictions for a heavy world crop eventuate the price of sugar should be pretty low in the future, but the sugar crop, like every other, is subject to setbacks from various causes and it is unsafe to prophesy as to what the future will bring forth. The imports of sugar for the week were 225 barrels by S.S. Rosalind from New York and the price quoted wholesale in the local market is \$9.00 per 100 lbs. for granulated and \$8.60 for brown.

Hay and Oats—There is now a fair demand for hay and some considerable business is being done in this article which is quoted wholesale in the local market at \$38.00 per ton. There is a fair market also for oats of which 511 sacks were imported by the S.S. Rosalind from Halifax. The prices, wholesale, in the local market are black P.E.I. \$3.70 per bushel; P. E. I. white, \$3.60; white No. 2 feed, \$3.45; and mixed, \$3.40.

Miscellaneous—The miscellaneous imports for the week were: 150 bbls. and boxes apples, 1,555 pcks. fruits

and vegetables, 245 crates cabbage, 1,025 pcks. beans, 200 pcks. butter, 600 rolls roofing paper, 900 rolls felt, 35 pcks. lard, 40 pcks. cranberries, 114 pcks. coal tar, 30 bbls. hams, 300 tcs. butterine, 22 pcks. hardware, 500 pcks. milk, 360 bbls. wire, 300 cases hardware, 267 boxes tinplates, 200 bales hemp, 223 pcks. flour, 300 pcks. confectionery, 520 cases onions, 150 boxes soap, 215 pcks. peas, 200 cases canned goods, 100 pcks. margarine, 225 pcks. window glass, 105 boxes fruit, 384 bars iron, 100 buckets, 404 pcks. lard, 25 puns. rum and 4,500 cases whisky.

"Abie's Irish Rose" will be staged at the Casino Theatre on Tuesday and Wednesday, May 6th and 7th, and "The Chinese Puzzle" on Thursday, May 8th, in aid of Mount Cashel Orphanage.—apr28.31

Theory of Isostasy Contents World is Solid to Its Core.

Chicago, April 28. (A.P.)—Isostasy, the theory for the establishment of which Director John Hayford, head of the College of Engineering at Northwestern University, was awarded the Victorian Medal by the Royal Geographic Society of Great Britain, is explained by the director as a force beneath the surface of the earth tending to equalize pressure at all points.

"It adds much to strengthen the evidence that the world is solid throughout," Hayford said. "In a measure, it also explains earthquakes. On the Japanese coast and the western coast of the United States there are high mountains adjacent to great ocean depths. The 'Isostasy' demonstrates that earthquakes under such conditions are not due to action of subterranean gases and lava on the earth's crust, but to the deeper movement of the earth's bulk, due to tremendous pressure."

He declared that where gases and fire exist they occupy pockets in the earth's crust, and that the center of the earth is not a molten mass.

Director Hayford's studies of isostasy have been translated and are now being used and referred to by scientists of every nation. Many geologists have accepted his theory.

"Isostasy advances the supposition that rocks are lighter under the high parts of the American continent than the low parts," he said. "If the theory is true, then there is a hydrostatic pressure in the rocks of the earth everywhere at about 70 miles below sea level. Under the depths of the Atlantic, rocks are four per cent heavier than under Pike's Peak. Hence, the relation of the elevation above sea level on the one hand and the density of the rocks of that section of the globe down to a depth of about 70 miles on the other hand, is such that a column under any square mile of the earth down to 70 miles below sea level weighs nearly the same as any other such column."

Director Hayford began work on his theory in 1900. Since then he has conducted more than 800 plumb line comparisons. He said that the pull of the earth on a pendulum has been measured in 200 places in the United States, a second proof of isostasy.

"Hello there! Where are you going?" "I came home and found my favorite bread was not on the table and I am just going to buy what I like best 'WALSH'S MILK BREAD,' made only by The Central Bakery."—apr15.121

The Terror That Flieth

London Daily Express: However bitterly we may hate war, however keen may be our desire for disarmament and the reign of reason, we cannot afford to expose this country to horrors of which the great war gave us no more than a hint. Our insularity no longer protects us, and even if we still hold precarious predominance at sea we cannot thereby escape destruction from the air.

MINARD'S LINIMENT FOR HEADACHE.

"The Loves of Pharaoh"

OVER 100,000 PEOPLE IN CASTE.

THIS TREMENDOUS MOTION PICTURE SPECTACLE

At The Majestic Theatre To-Day

THE MOST SPECTACULAR LOVE DRAMA EVER FILMED.

Tsingtao Becomes Naval Base

Tsingtao, China, March 18. (A.P.)—The naval base here is practically established with the acquisition of buildings to serve as administrative offices and barracks for the marines. The six vessels composing the Chinese fleet here are undergoing repairs and will, it is said, be put in as good shape as possible considering their age, which is from 20 to 40 years.

Poincare and Nationalism

Chinonati Times-Star: France has greater problems to solve than any other country to-day, problems that include protecting herself from the forty-eight invasion of her soil from the East, for her history from Roman days has been of successive hordes' seeking to overwhelm her. So far as we can see, Poincare remains the man of this hour in France's history. Poincare at least stands for French nationalism, and nationalism is the most constant political quantity in French history.

Frau Krupp Gives Land for Park

Essen, Germany, April 3. (A.P.)—Frau F. A. Krupp, widow of the famous industrialist, recently celebrated her seventieth birthday by...

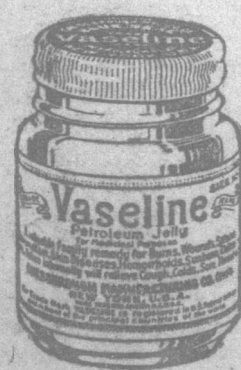

giving 31 acres of woodland to this city for a park. The area is equipped specially as a recreation ground for workers and their families.

Serve toasted crackers, cheese and Guava jelly with the after-dinner coffee.

Just received from Burgess, 600 pounds FRESH HALIBUT, not cold storage.—W. E. BEARNS.

The next time you make any sweet pickle, add a little chopped mint. Mix diced boiled carrots with boiled peas, and serve in cream sauce.

A Simple Home Remedy

You will need it every day for the countless little hurts that come up. For burns, cuts, scalds, sunburn, windburn; also for chapped hands and skin. Pure, soothing and healing. Take it internally for coughs, colds and sore throats. It is tasteless and odorless and gives great relief.

Trade **Vaseline** Mark

Petroleum Jelly (Send for a copy of our free booklet "Inquire Within") CHESEBROUGH MANUFACTURING COMPANY (CONSOLIDATED) 17 STATE STREET, NEW YORK. All "Vaseline" Products can be obtained in Drug and General Stores throughout Newfoundland.

--Buick is the Standard of Comparison

For the sixth consecutive year, Buick has been awarded First Place at the American Automobile Shows during 1923, for having done the largest volume of business during the preceding year.

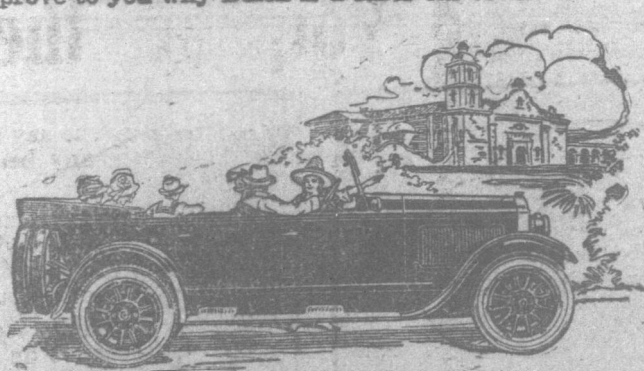

During 1923 Buick produced and sold 218,286 high grade motor cars for which the public paid \$302,752,950—the production of the next leading make was 145,167 cars—therefore Buick beat its closest competitor by over Seventy Thousand cars.

Public opinion as indicated in the above figures of sales is absolute proof that—Buick is the best value in the world.

In designing Four-Wheel brakes on all its models, Buick has added greater safety to a car already recognized for its sturdiness, high grade construction, power, beauty, comfort and efficiency—these Brakes were given an exhaustive road test of 150,000 miles, before being perfected by the Buick engineers.

Being the largest distributors of cars in the city, we own and operate an up-to-date Garage, to give Buick owners every up-to-date Service—we also keep on hand a complete stock of spare parts.

Before buying a car call and see the latest Buick models on display at our Show Room. "Phone us and we will gladly send a 1924 Buick to your address for inspection and demonstration—Let us prove to you why Buick is a safer car to drive.

BERT HAYWARD.
